

Domestic Fundamentals:

Market Outlook: Cotton market noticed mixed tone on Saturday.

In The News: Farmers of agriculture crops including cotton could face trouble selling their produce at minimum selling price (MSP) as NAFED, the main agency which undertakes the MSP procurement is through the severe financial crisis. The National Agriculture Cooperative Marketing Federation of India (NAFED) facing the liquidity crunch which is making it impaired to go for any MSP operation. Besides the sum of Rs. 300 crore which is owed to it by central government, it has the hole of Rs. 1200 crore in its accounts book due to an investment fraud.

Cotton production in India would be around 405.50 lakh bales this season (Oct'14-Sep'15) compared to 407.25 lakh bales a season ago, according to Cotton Association of India (CAI). The decline in the crop output is anticipated due to fall in productivity in Gujarat, the major cotton producing state in India. According to CAI, Gujarat is likely to produce 126 lakh bales of cotton this year compared to 129.25 lakh bales last year. The total supply would be around 477.40 lakh bales, domestic consumption is projected to be around 306 lakh bales, and hence leaving the surplus of 171.40 lakh bales estimated CAI in its balance sheet for season 2014-15.

In order to discuss the measures to control the continuously falling cotton prices, Agriculture Minister Radha Mohan Singh has called a meeting and discussed with textile and commerce counterparts. The government has decided to set up more procurement centers primarily in major cotton producing states including Gujarat, Maharashtra, Andhra Pradesh and Telangana. Cotton Corporation of India (CCI) has been asked to procure the produce by setting up procurement centers wherever the prices are ruling below the MSP. To relief the farmers from the price crash, the government has freed the cotton procurement from cap i.e. they agencies would buy the whatever quantity comes to them.

Sharad Pawar, President of Nationalist Congress Party (NCP) has blamed the newly formed BJP government for ignoring farmers in the state. According to him, farmers particularly of cotton and sugarcane are facing troublesome situation as they are getting low prices of their produce and BJP government has also stopped procuring cotton from this year. Furthermore the subsidy of Rs. 300 per quintal which was given to the farmers by the state government has also been terminated.

Karnataka government is planning to introduce a Karnataka Cotton bill, 2014 in order to regulate the cotton prices in the state. The bill foresees the constitution of an authority which would be headed by Directorate of Agriculture Department for setting of prices of Bt cotton seed each year. The department of agriculture has designed the bill on the outline Maharashtra Cotton Seed Act, 2009. The bill would like act safety umbrella by putting the obligation to the seed companies to pay the compensation on the crop failure and supply of spurious seeds. Bt was introduced in year 2002 in India, currently over six lakh hectares of land has been planted for Bt cotton in Karnataka state only.

The agriculture minister of Haryana, O P Dhankar, said that affected farmer will be compensated for the crop loss, if the field study proves the damage in the crop. He also said that the new BJP government formed in the state is dedicated to ensure genuine prices to the farmers for their produce including the paddy and cotton.

Cotton yield is expected to fall drastically in Nizamabad district of Andhra Pradesh due to pest attack in the crop which has led to withered cotton bolls. Around 3.33 lakh hectares was sown for cotton in Nizamabad district and only 30-40% yield is expected in the Kharif cotton.

International Fundamentals:

Cotton Future for March delivery on Intercontinental Exchange (ICE) dropped 2.6% and settled at 58.75 US cents a pound in second half today, the lowest since September 2009. The increasing world cotton inventory is the major factor of this drastic price fall. According to USDA cotton ending stock would stand around 23.375 million tonnes this season which was 22.094 million tonnes in 2013-14 and 11.019 million tonnes in 2010-11.

USDA has raised the world cotton production estimates for the season 2014/15. Output of cotton would be around 26.04 million tonnes in the current season (2014/15) which was projected 25.99 million tonnes last month. According to USDA, global cotton production stood 26.90 million tonnes during previous season (2013/14).

Brazil monthly cotton export stood 148,500 tonnes in October 2014, the highest monthly volume recorded in last two years. The same could lift the estimated export volume for the year 2014, which is 660,000 tonnes forecasted by Conab.

Outlook

We expect domestic prices to remain weak to range bound in near term.
