

#### **Domestic Fundamentals:**

Market Outlook: Cotton market noticed steady to weak tone on Tuesday.

**In The News**: India has relaxed the rules applied to cotton and cotton yarn export in order to boost the export volume from country. The government of India has dispensed the requirement of registration to Directorate General of Foreign Trade (DGFT) for exports of cotton and cotton yarn which was earlier mandatory for the traders along with notification of their targeted export volume for the year. India is expected to produce 400 lakh bales of cotton this year, slightly higher than previous year, but enough to raise the availability as export would be on weaker side, causing demand deficit.

Around 18000 hectares of cotton crop in Jalgaon and 8560 hectares in Dhule have been diagnosed with Cotton wilt, locally known as "Mar" disease caused by Fusarium oxysporum fungus, as reported by Commissionerate of Agriculture, Pune, Government of Maharashtra. As the intensity of the disease is found to be below Economic Threshold Level (ETL), there are fewer chances of any significant losses to occur.

According to latest FAS report released by USDA, production of cotton in India would be around 392 lakh bales in season 2014/15. The yield estimated for the current season is 525 kg per hectare which is lower than the 538 kg per hectare, the average yield of three years. As farmers said, the fall in yield is the outcome of deficit rainfall, which led the lesser numbers of bolls per plant.

According to Cotton Corporation of India (CCI), total consumption of cotton in India during the season 2014-15 would be around 311 lakh bales, 4.1% higher when compared to the consumption of previous year, when the same was 298.88 lakh bales. Mill consumption and Small mill consumption would be around 275 and 26 lakh bales respectively and Non mill consumption is likely to be around 10 lakh bales.

India's minister of state for agriculture Mohanbhai Kundaria said that there is no proposal to increase the minimum support price (MSP) of cotton. According to the minister, Cotton Corporation of India (CCI) has geared up for procurement of cotton at MSP in 341 centers in 92 districts from the 11 cotton growing states.

Heated conversation took place in Rajya Sabha few days back over the drastically falling cotton and Paddy prices. The opposition parties i.e. Congress and Samajwadi Party (S.P.) put forward the issue of falling prices which has led the farmer's distress and the rise in the suicide figures. It also claimed that no instruction to Cotton Corporation of India (CCI) has made to purchase cotton at the right price, as it was in the period of UPA government. The opposition party also reminded the promise of Prime Minister Narendra Modi of paying farmers a price that is 50% more than the cost of production, is not being fulfilled as MSP of cotton is Rs. 3750 per quintal for medium staple and Rs. 4050 for long staple.

Cotton exports from India are likely to fall by 45% this season from major importers China and Bangladesh. During the current season 2014-15, India is likely to export 6.5 to 7 million bales (of 170 kg. each) of cotton, which was 11.8 million bales last year, said Cotton Advisory Board (CAB).

Output of cotton in India is expected to be around 40.55 million bales in season 2014-15, 14.22% higher than the previous year's production of 35.5 million bales, said cotton association of India (CAI). Not only production, acreage, yield, consumption and export have also noticed a rise in last previous years. Acreage of cotton reported 12.65 million hectares 10.28 % higher when compared to the previous year's area. India has great potential in textile export, which is keeping the market prospects higher for cotton in the country.

## **International Fundamentals:**

On reduced acreage this season, cotton output in Australia is expected to fall by almost half in 2014-15, as estimated by Australian Bureau of Agricultural and Resource Economics and Sciences (ABARES). Area under summer crop is estimated 13% lower for 2014-15 at 974000 hectares which would lead to fall in production and hence cotton output in Australia from the summer crop is likely to be around 3.2 million tonnes in 2014-15.

World cotton imports are expected to notice a fall of 15.5% as China, the major consumer, will import lesser this season. China is likely to cut its imports drastically this season due to its increasing cotton stockpiles. Share of China in World ending stocks recorded 62% by the end of previous season.

According to U.S. Department of Agriculture (USDA), cotton imports by Thailand are likely to fall in 2014/15 following the deficit in cotton consumption by textile counterparts. Yarn spinners and fabric weavers in Thailand are facing the problem of higher production cost and weak global economy.

#### **Outlook**

#### We expect domestic prices to remain weak to in near term.
