

There will be no reports and updates on 25 Dec 2014 as Agriwatch will be closed for the occasion of Christmas Day.

Domestic Fundamentals:

Market Outlook: Cotton market noticed weak tone on profit-booking.

In The News: US Cotton future fell on profit booking.

The China's Xinjiang Department of Agriculture announced on December 23,2014 that Xinjiang cotton acreage total to 29.67 million mu in 2014.

In 2015 decline in US and World acreage is expected on lower prices, and this will leads to retract the supply-side (production). And if, demand also show improvement then cotton prices may show some improvement-Southeast Farm Press.

The cotton procurement by Cotton Corporation of India (CCI)reach to 2.50 million bales — the highest since 2008-09 when the state-run agency purchased a record 8.93 million bales in the entire marketing year and compared with just 40,813 bales in the whole of last marketing year through September 2014. Most of the purchases this year have been from Andhra Pradesh and Maharashtra, the leading producers after Gujarat. One bale equals 170 kg.

| Year | CCI Procurement in Bales |
|-----------|--------------------------|
| 2007-08 | 223305 |
| 2008-09 | 8934830 |
| 2009-10 | 580596 |
| 2010-11 | 152 |
| 2011-12 | 7696 |
| 2012-13 | 2286423 |
| 2013-14 | 40813 |
| 2014-15* | 2493400 |
| *Upto Dec | cember 14 |

According to the Gujarat Agriculture Department, following is the final estimate for 2013-14:

| | | 5 | |
|--------------------------------|-----------------|--|-----------------|
| Gujarat Final Estimate 2013-14 | Area ('000 Ha.) | Production ('000 bales each of 170 Kg) | Yield (in lint) |
| Cotton | 2519 | 10088 | 680 |

Gujarat farmers continue to agitate on cotton MSP, they are demanding to surge it to Rs.1000 per 20 Kg from present Rs.810 per 20 kg.

As estimated by USDA, cotton export from India would be around 1.089 million tonnes this season (2014-15), around 46% lower when compared to the exports in previous season, which was 2.015 million tonnes.

According to Cotton Association of India (CAI) cotton output in the country would stand around 402 lakh bales in season 2014-15, slightly lower than the production of previous season when it was 407.25 lakh bales. The expected fall in production in Gujarat has been considered the reason for the fall in production in the country. Gujarat is projected to produce 122 lakh bales of cotton this season compared to 129.5 lakh bales previous season.

India has relaxed the rules applied to cotton and cotton yarn export in order to boost the export volume from country. The government of India has dispensed the requirement of registration to Directorate General of Foreign Trade (DGFT) for exports of cotton and cotton yarn which was earlier mandatory for the traders along with notification of their targeted export volume for the year. India is expected to produce

400 lakh bales of cotton this year, slightly higher than previous year, but enough to raise the availability as export would be on weaker side, causing demand deficit.

Around 18000 hectares of cotton crop in Jalgaon and 8560 hectares in Dhule have been diagnosed with Cotton wilt, locally known as "Mar" disease caused by Fusarium oxysporum fungus, as reported by Commissionerate of Agriculture, Pune, Government of Maharashtra. As the intensity of the disease is found to be below Economic Threshold Level (ETL), there are fewer chances of any significant losses to occur.

According to latest FAS report released by USDA, production of cotton in India would be around 392 lakh bales in season 2014/15. The yield estimated for the current season is 525 kg per hectare which is lower than the 538 kg per hectare, the average yield of three years. As farmers said, the fall in yield is the outcome of deficit rainfall, which led the lesser numbers of bolls per plant.

According to Cotton Corporation of India (CCI), total consumption of cotton in India during the season 2014-15 would be around 311 lakh bales, 4.1% higher when compared to the consumption of previous year, when the same was 298.88 lakh bales. Mill consumption and Small mill consumption would be around 275 and 26 lakh bales respectively and Non mill consumption is likely to be around 10 lakh bales.

India's minister of state for agriculture Mohanbhai Kundaria said that there is no proposal to increase the minimum support price (MSP) of cotton. According to the minister, Cotton Corporation of India (CCI) has geared up for procurement of cotton at MSP in 341 centers in 92 districts from the 11 cotton growing states.

International Fundamentals:

Pakistan Bureau of Statistics revealed that textile and clothing export surged to \$1.128 billion in November 2014 from \$998.143 million in the corresponding period of last year, an increase of 7.01 per cent.

Cotton from Nigeria is being sold at 70 percent less in the international market, than the price of the same product from other countries such as Burkina Faso, China and India, on account of the fact that Nigeria does not produce Biotechnology (BT) cotton.

Cotton production in China stood 2.2% lower to 6.16 million tonnes in 2014 when compared to the previous year. The reason for this decline is the falling acreage, which decreased around 3% on year on year basis. Deficit in cotton output in China brings delight to the cotton exporting nations as it increases the possibilities of larger cotton export demand from China, the major consumer in the world.

China's decision to keep cotton import up to the quota limit of 894,000 tonnes has kept the market under the bearish pressure. Global prices are moving downtrend amid the expectation of lesser imports by China, the top importer of cotton in the world. According to USDA china is likely to import 1.52 million tonnes, around 50.5% lower when compared to the 3.075 million tonnes of imports previous year.

According to the latest report by USDA, cotton production on the global front would stand around 25.905 million tonnnes this season 2014-15 around 1.09% lower when compared to 26.191 million tonnes previous year.

<u>Outlook</u>

We expect domestic prices to remain firm in near term.
