

Domestic Fundamentals:

Market Outlook: Cotton prices remained steady to firm. Few of the market remained closed following “Amavasya”.

In The News: India exported 1.29 lakh bales of cotton last week (09-15 Feb 2015), which was 1.37 lakh bales when compared to previous week (02-08 Feb 2015), according to the data compiled by IBIS. Imports on the other hand stood 0.21 lakh bales, which was 0.91 lakh bales previous week.

Government has added raw cotton and oilseed to the list of 38 commodities, which have been exempt from Commodity Transaction Tax (CTT). The exemption of CTT has raised the hopes of commodity exchanges and the segment of brokers that center might consider a regulatory recommendation to reduce levy in the Union budget, if not withdraw it completely.

World cotton production is estimated slightly higher this month by USDA at 25.99 million tonnes compared to the estimates of previous month which was 25.94 million tonnes, although it is marginally lower than the output of previous season which was 26.22 million tonnes. The upward changes in the estimates is primarily due to the higher production prospects in Pakistan at 2.264 million tonnes projected this month which was earlier estimated 2.221 million tonnes a month ago.

Cotton exports from India could go lower than the levels expected at the commencement of the season. USDA estimates cotton export during the season 2014-15 to be around 0.914 (53.7 lakh bales of 170 kg each) million tonnes which was estimated 1.023 million tonnes in January this year. Cotton export is apparent to see fall of 54.5% considering the export of previous season which stood 2.015 (118 lakh bales of 170 kg each) million tonnes.

Cotton Corporation of India is likely to face steepest loss in last six year from the cotton sales. Due to availability of massive stockpiles of cotton in domestic market and diminishing demand from China, cotton market is ruling all time low. CCI has procured around 6.5 million bales of cotton this season so far at MSP. According to the officials, CCI could suffer the loss of around 20-25 billion rupees (USD 322-402 million), based on the currently ruling prices of the fibre. This would be biggest loss since 2008/09.

Cotton output in Gujarat is likely to stand around 105 lakh bales this season compared to 120 lakh bales in previous season, according to Department of Agriculture Economics, Junagarh. The reason for the drop in the production are the late arrival and early withdrawal of monsoon, high temperature during October and November 2014 and leaf reddening disease (Lal Patti), which has affected about 20 per cent of cotton fields.

According to the data released by IBIS, cotton export during January this year was 6.11 lakh bales compared to 30 lakh bales last year during the corresponding month. Cotton import in January was 0.5 lakh bales this year compared to 0.41 lakh bales previous year. Cumulative exports this season during the period of Oct'14-Jan'15 stood 25.6 lakh bales, around 23.8% lower when compared to the export during the same period last season, which was 33.61 lakh bales. Imports on the other hand recorded on the higher side during the initial months of the seasons. Cumulative Import for the period of Oct'14-Jan'15 remained 4.17 lakh bales which was 1.94 lakh bales in the previous season during the same period.

International Fundamentals:

Cotton price jumped a five month high on Tuesday following bullish market sentiments and low exchange stocks. Most active May contract at ICE settled at 64.53 cents a pound, which was last reported on September 19, last year.

China cotton imports during January this year stood 161,200 tonnes 44.9% lower when compared to the imports last year during the corresponding month. In the initial five months of the season 2014/15, china imported 722,600 tonnes of cotton, 49% lower as compared to the imports during the same period last year.

As per the latest estimates of USDA, cotton export the global front would stand around 7.455 million tonnes this season slightly higher of 7.401 million tonnes what was estimated previous month. Although cotton exports estimates are a little higher this month, the same is still lower the actual export of cotton in previous season which was around 8.868 million tonnes. The cause of the upward changes in the monthly estimates is higher export expected from USA.

Outlook

We expect domestic prices to remain range bound to firm in near term.
