

No report will be uploaded on 03 April 2015 following the Occasion of “Good Friday”.

Domestic Fundamentals:

Market Outlook: Cotton market noticed mixed tone on Thursday. Most of the market remained closed following “Mahavir Jayanti”.

In The News: During the initial four months of season, cotton consumption recorded at 1714 million kgs which is 3.5% higher than the consumption during corresponding period last year. Similarly cotton yarn production too remained higher in this year. Cumulative cotton yarn production during the initial four month of the season stood 1368 million kgs around 3.39% higher when compared to corresponding period last year.

The Consultative Committee of Cotton Advisory Board (CAB) has revised the cotton production estimates at 390 lakh bales on Tuesday which was earlier estimated 400 bales in October last year, when season commenced. According to the committee cotton production would be 10 lakh bales lesser which was estimated earlier, consumption by textile mills would be around 278.5 lakh bales, export to be around 70 lakh bales and imports would be around 8 lakh bales.

India is likely to keep sourcing cotton to International market in the coming month of seasons, as stocks of USA and Brazil have almost sold out their produce. Only 32 lakh bales of cotton have been exported so far against the target of 90 lakh bales. Lower export will hence cause the higher ending stocks this season compared to the previous season.

The Cotton Association of India has urged the Cotton Corporation of India, which procures cotton as part of the Government’s Minimum Support Price programme, to formulate a policy to offload the stock in the market.

Cotton Association of India (CAI) estimated cotton output in country during season 2014-15 to be around 396 lakh bales in its February estimates which was estimated 397 lakh bales in January.

Cotton Corporation of India (CCI) has procured 86 lakh bales of cotton this marketing year so far, a little lower than the record procurement of 89 lakh bales in 2008-09. As cotton arrival is expected to last till May this year, cotton procurement by CCI is likely to breach the record level by the end of season. Around 302 lakh bales of cotton has arrived in domestic market until 24 March 2015, compared to 306 lakh bales year ago during the same period, said CCI.

India exported 1.82 lakh bales of cotton last week (16-22 Mar 2015), which was 1.81 lakh bales previous to last week (09-15 Mar 2015), according to the data released by IBIS. Imports on the other hand stood 0.11 lakh bales last week, which was 0.17 lakh bales previous to last week.

Cotton exports from India is picking up as the Indian cotton fiber has become cost competitive in International market since February end. According to the officials, Indian cotton is at least 5 cents a pound cheaper than US cotton and 2-3 cents from African cotton. Lower freight expenses due to proximity of importing regions give India leverage over US and Brazil. Demand from China is negligible but India is getting import order from Bangladesh, Pakistan, Turkey, Indonesia and Vietnam, said Anand Poppat an official of Saurashtra Ginners Association.

International Fundamentals:

USA is expected to lower its cotton acreage this season to 9.428 million acres, -14.6% lower when compared to acreage of 2014 which was 11.037 million acres. The major cotton growing region, Texas is likely to witness a fall of 13.8% in cotton acreage and would plant 5.343 million acres of cotton in 2015, compared to 6.2 million acres previous year, said National Cotton Council (NCC).

Cotton exports from Pakistan has fell down by 15% during the initial eight of the current fiscal year (FY15) when compared to the exports in corresponding period last year. According to the market participants Pakistan cotton is unable to capture world market, despite the lower price of their produce.

China imported 159,100 metric tons of cotton in February this year, 35.3% lower when compared to imports during the same month previous year, according to customs data cited by China Cotton Association (CCA).

Outlook

We expect domestic prices to remain range bound to firm in near term.
