

Domestic Fundamentals:

Market Outlook: Cotton spot market noticed mostly weak tone on Wednesday.

In The News: India exported 1.209 lakh bales of cotton last week (06-12 April 2015), which was 0.81 lakh bales previous to last week (30 Mar-05 Apr 2015), according to the data released by IBIS and compiled by Agriwatch. Imports on the other hand stood 0.189 lakh bales last week, which was 0.19 lakh bales previous to last week.

There is no scarcity of cotton in the domestic market, said CCI in the response of demand proposed by the textile industry to immediate release of the stocks procured by CCI. Textile bodies like Texpocil and CITI believes that there has been a supply deficit created due to the record procurement by CCI this season which has lead the fiber price to shoot up and the scarcity of the quality cotton in the market. Whereas CCI believe that due to the bumper production and lesser export availability is still higher, despite the record procurement and there is no supply deficit as such. CCI said it has started selling of the fiber and releases 40,000-50,000 bales a day.

Confederation of Indian Textile Industry (CITI) has requested union textile minister Santosh Gangwar to direct CCI to offload the procured stocks as it is making the cotton prices to shoot up in domestic market which has led the problems for textile bodies and private traders are taking the speculative benefits of the situation. CCI on other hand said that as there are 25% more arrivals to come and it would soon liquidate the stocks once 90% of the arrival reaches the market. CCI also said while selling the produce, it would focus on the small and medium textile mills.

According to the USDA's latest WASDE report India is likely to export 849 thousand tones of cotton this season around 7% lower than the estimates of previous month and around 57.87% lower when compared to the actual exports of previous season.

India exported 0.81 lakh bales of cotton last week (30 Mar-05 Apr 2015), which was 1.53 lakh bales previous to last week (22-29 Mar 2015), according to the data released by IBIS and compiled by Agriwatch. Imports on the other hand stood 0.19 lakh bales last week, which was 0.24 lakh bales previous to last week.

India exported around 7.35 lakh bales of cotton during March'15 around 10.03% higher when compared to the exports during previous month. Imports on other remained higher this month by 4.2% at 0.74 lakh bales which was 0.71 lakh bales in February. Cotton exports so far (i.e. Oct'14-Mar'15) stood around 55.5% lower Y-o-Y at 39.4 lakh bales which was 88.6 lakh bales during the same period last year. Imports during the current season so far stood 5.62 lakh bales which was 2.89 lakh bales last year.

Textile minister Santosh Gangwar should direct Cotton Corporation of India to immediately commence selling the cotton through the e-auction to actual users with liberal credit norms, said Southern India Mills' Association (SIMA).

International Fundamentals:

Around 8% of cotton planting has been completed in USA as on April 12 this year, which was 2% last week and 4% last year on same date, according to USDA. The five year average sowing progress is 8% as on date, same as the current sowing pace.

World cotton production is estimated slightly lower this month by USDA at 25.95 million tonnes for season 2014-15 which was estimated 25.95 million tones a month ago. Cotton production on global front was 26.221 million tones during season 2013-14, slightly higher than current season.

USDA has revised the USA cotton ending stocks upwardly. According to the April WASDE report by USDA, USA is likely to have ending stocks of around 958 thousand tones by the end of current season around 4.8% higher when compared to the estimates of previous month and around 79.74% higher when compared to the actual ending stocks of 533 thousand tones previous season.

Outlook

We expect domestic prices to remain range bound to firm in near term.
