

Domestic Fundamentals:

Market Outlook: Cotton spot market noticed mostly firm tone on Tuesday.

In The News: Indian Cotton Association Limited (ICAL) with association of technical expertise by Monsanto India Limited, is planning to adopt some of the cotton growing villages in north India, in order to provide assistance to the cotton growers about the better practices for the cotton production, from sowing till harvesting.

After hitting the five year low, cotton price are likely to surge up in near to medium term as the minimum support price (MSP) for the kharif crops are expected to be revised for the coming season and deficit in rain during the upcoming southwest monsoon will lower the cotton sowing. Besides the given situations, farmers are likely to shift for the other kharif crops due to drastic fall in the cotton prices being recorded in the current season.

Cotton production in the country during the season 2014/15 would stand around 390 lakh bales which was estimated 400 lakh bales earlier. Untimely Rain and Hailstorm has affected the crop condition of many crop including cotton. Seeing the current situation, Textiles Minister Santosh Kumar Gangwar said that the cotton output in the country would be around 390 lakh bales against the earlier expectation of 400 lakh bales.

Indian Meteorological Department (IMD), in its first forecast for year 2015 has predicted a below normal monsoon for the country. An El Nino condition has been established in the Pacific Ocean but the intensity has not been predicted yet. The situation of El Nino could lead India, Bangladesh and South Asian countries to notice dry spells during the monsoon. Crops like rice, sugar and cotton could get affected following the situation.

India exported 1.040 lakh bales of cotton last week (13-19 April 2015), which was 1.209 lakh bales previous to last week (06-12 April 2015), according to the data released by IBIS and compiled by Agriwatch. Imports on the other hand stood 0.089 lakh bales last week, which was 0.189 lakh bales previous to last week.

Cotton exports from India is expected to stand around 7 million bales around 29.2% lower when compared to 9.9 million bales last year, said Cotton Corporation of India (CCI). India has exported around 4.5 million bales so far during the season current season (Oct-14 to Sept-15). The cotton exports have tumbled down because of higher stocks on global front and lower demand from China.

Cotton Corporation of India (CCI) has suspended the cotton procurement for a while as cotton prices have moved up in the recent days in domestic market due to the strong demand arriving from the mills. As cotton prices are ruling higher, there is no need to Intervene, said CCI. Besides the huge demand from textile bodies, CCI is not willing to offload the stock in the domestic market as could worsen the glut like situation and also CCI is expected to take a decision regarding the sale of cotton by floating global tender.

International Fundamentals:

Price of US cotton is surging up as there is strong demand for the quality fiber in the market. Australia has harvested only the half of what it produced last year. Brazil crop is facing the quality issues and India high quality crop has been held off the market. According to the market participants, the demand is heading towards USA for the quality cotton which has led the upward movement in the cotton prices.

Cotton future price at ICE gained nearly 4%, around three year high in term of percentage, on Thursday. Following the government report which is showing a surge in overseas demand for US cotton, price of cotton at ICE of most active July contract surged up by around 4% or 2.53 cents at 65.45 cents a pound, the highest close two weeks. In the terms of percentage, it was the largest gain since August 3, 2012 when prices noticed a gain of 4.2%, said Wall Street Journal.

Around 9% of cotton planting has been completed in USA as on April 19 this year, which was 4% last week and 8% last year on same date, according to USDA. The five year average sowing progress is 11% as on date, same as the current sowing pace.

Outlook

We expect domestic prices to remain range bound in near term.
