

## Domestic Fundamentals:

**Market Outlook:** Cotton spot market noticed mixed tone on Wednesday.

**In The News:** Around 3.45 crore bales of cotton has been pressed so far all over the country, according to reports of Indian Cotton federation (ICF). ICF believes that cotton growers in states like Gujarat and Maharashtra may switch to crop like pulses and groundnut as they find cotton crop less lucrative due to untimely rains and lower prices.

Following the expectation of the delayed monsoon and lower than expected rainfall this year, the Maharashtra government fears that the situation of cotton belts could get worse and to hedge the risk, the government is planning to promote non Bt cotton seed, which are have lower production costs than the Bt variety of cotton. As per the data of Ministry of Agriculture, the cost of cultivating cotton is highest in Maharashtra which leads to the lowest profit margins.

The monsoon in country is likely to arrive late as forecasted by Indian Meteorological Department (IMD). IMD believes that southwest monsoon will arrive by June 5, on the southern coast of Kerala against the normal start date of June 01. IMD earlier forecasted the onset date of Monsoon as May 30 with the model error of plus-minus 4 days. Monsoon rains during the previous year i.e. 2014, arrived on Kerala coast on June 6.

Cottonseed sale could drop this Kharif season, as reported the industry. Around 4.40-4.50 crore packets (450 gm each) of cotton seed are likely to be sold in the country this season, lower when compared to the 4.75 crore packets sold last year. Currently the industry is holding the stock of 6.5 crore packets, out of which 1.5 crore packets are considered not-so-good quality seeds.

Around 8.82 lakh hectares of cotton have been planted as on 29<sup>th</sup> May throughout the country, approximately 14.25% higher when compared the sowing of cotton during the corresponding period last year which was 7.72 lakh hectares, said Press Information Bureau (PIB).

India exported 0.622 lakh bales of cotton last week (18-24 May 2015), which was 0.416 lakh bales previous to last week (11-17 May 2015), according to the data released by IBIS and compiled by Agriwatch. Imports on the other hand stood 0.128 lakh bales last week, which was 0.383 lakh bales previous to last week.

The loss of around Rs 2,500 crore is likely to incur by government on cotton procurement scheme, which was aimed to save the farmers from the crashing cotton prices held in the current marketing year through September, said Textile minister Santosh Kumar Gangwar. The losses were earlier estimated to be around Rs 4000 crore, said Gangwar. The loss could still be lower than Rs 2500 crore if cotton price improves.

Around eight textile industry association in Tamil Nadu urged the state minister (road transport, national highways and shipping) to relax Cabotage law in order to make transport of cotton from Gujarat to Tamil Nadu easier. Under the law the Indian vessel will be given the first preference for the transportation of good from one port to another and any foreign vessel could get chance only when Indian vessel in not available and the India's maritime regulator issues the license to foreign vessel.

The southwest rains this season are predicted to be below normal for the second consecutive year, according to the IMD. According to the market participants, unlike the other crops, the deficit in rainfall would not impact cotton output and rather it could benefit cotton as it is the desert crop.

### International Fundamentals:

Around 72% of cotton planting has been completed in USA as on May 31 this year, which was 47% last week and 61% last year on same date, according to USDA. The five year average sowing progress is 78% as on date, slightly higher than the current sowing pace.

China imported around 160,800 tonnes of cotton in April, approximately 28.3% lower when compared to the volume imported during the same month last year, according to the official custom data. During the initial four month of the year, imports to China fell by around 38.2 percent year on year to 609,000 tonnes, said China Cotton Association (CCA) citing custom data.

China imported around 160,800 tonnes of cotton in April, approximately 28.3% lower when compared to the volume imported during the same month last year, according to the official custom data. During the initial four month of the year, imports to China fell by around 38.2 percent year on year to 609,000 tonnes, said China Cotton Association (CCA) citing custom data.

### Outlook

We expect domestic prices to remain range bound to weak in near term.
