

## Domestic Fundamentals:

**Market Outlook:** Cotton spot market noticed mixed tone on Saturday.

**In The News:** According to the October estimates of ICAC (International cotton advisory committee), cotton production in India is likely to be around 6.37 million ton (375 lakh bales of 170 kg each) in 2015-16, around 2.15% lower when compared to the estimates production of 6.51 million tons (383 lakh bales) in 2014-15.

Pointing towards the lower acreage under cotton this year, CCI's chairman, BK Mishra, said that the cotton production in 2015-16 would be nearly 5-10 lakh bales lower than the previous year's production. He believes that the cotton output in country would be around 370 lakh bales in the current season.

Cotton sowing area as on 01 October recorded at 116.4 lakh hectares throughout the country, according to the data released by the Ministry of Agriculture. The current acreage under cotton is around 8% lower when compared to the acreage at the same time last year and around 1.2% higher when compared to the normal area during the season. According to the first advance estimates by Ministry of Agriculture, the final acreage of cotton during 2015-16 would stand around 116.9 lakh hectares.

In anticipation of good crop this year too, Cotton Corporation of India (CCI) has started its preparation for the procurement under MSP operation. However the agency believe that, due to better prices of cotton prevailing in market, cotton procurement would remain weaker this year by around 30-40 lakh bales against the 87 lakh bales in 2014-15

Ministry of Agriculture has informed Prime Minister office that as Monsanto's patent on Cry 1 gene has expired in 2102 in USA, CICR (Central Institute of Cotton Research )can go ahead to develop the native variety of Bt cotton which can reduce the seed cost of cotton farmers. The domestically developed variety would be available at Rs 150 per kilogram as compared of Rs 2000 per kilogram per kilogram sold by Monsanto.

Indian Cotton Federation (ICF) believes that the cotton output in country would be around 385 lakh bales in 2015-16, same as the current year's output. Considering the situation, we expect prices to rule sideways to slightly weak as stocks are standing in surplus position.

As cotton exports has witnessed steep fall in this season, the cotton textile exporters want the government to accelerate free trade agreement with major overseas buyers including European Union, Australia and Canada in order to widen the export opportunity channel. Although the Indian cotton and cotton textile has been proved price-competitive, but the preference has been given to countries like Bangladesh, Cambodia, Pakistan, South-Korea, Turkey and Vietnam.

According to the first advance estimates for Kharif 2015-16 released by Department of Agriculture and Cooperation (DAC), Ministry of Agriculture, cotton production in country would be around 33.51 million bales (of 170 kg each), fairly lower when compared to the final estimates for 2014-15 which was 35.47 million bales.

### International Fundamentals:

According to the October estimates of ICAC (International cotton advisory committee), world cotton production would be around 23.84 million tones during the season 2015-16, which was estimated 26.11 million tones for the season 2014-15.

According to ICAC, China would remain the largest importer of cotton in 2015-16 but would notice a fall of 12% in its import with the expected volume of 1.6 million tons. During July and August this year, China sold around 60,000 tons of cotton from its reserves but it's still holding 11 million tons in its state reserves, which would definitely suppress the need of imports from other countries.

Cotton imports by China in August stood 70,000 tons, the lowest monthly import since at least year 2005 and around 65.8 percent lower than the imports during the same month last year, as revealed by custom data. The fall in the import is the result of issuance of lower import quota by Beijing in order to amplify the demand of domestic crop.

### Outlook

We expect domestic prices to remain range bound to weak in the near -term.
