

**Domestic Fundamentals:**

**Market Outlook:** Cotton spot market noticed mostly weak tone on Tuesday.

**In The News:** Cotton Corporation in India (CCI) has not started the procurement under MSP operation in Punjab. Also CCI got direction from Union Textile Minister, Santosh Gangwar to start procurement in the state, as to insure the genuine remuneration to the cotton farmers as they are already lost a large share of their crop to white fly attack, but until now there are no such operation by CCI, said farmers who are selling their crops to private traders.

Cotton farmers in few markets of Telangana are not interested in selling their crop to Cotton Corporation of India (CCI) due to new rules formulated by the same. Cotton farmers are opposing the CCI rule of rejecting cotton for procurement at MSP of Rs 4100 per quintal if bearing moisture content more than 8%. If the produce contains moisture content up to 12 percent, CCI is paying Rs 3936 per quintal.

The Director General of Foreign Trade (DGFT) issued notice for inclusion of export of cotton fabrics (woven and knitted) and cotton made-ups to leading markets, including African countries under the Merchandise Exports from India Scheme (MEIS). The step taken by government is likely to escalate export as the scheme consist the export benefit of two percent.

Cotton output in India is likely to be around 370.50 lakh bales in the current season that is 2015-16, according to cotton association of India (CAI). As per the latest estimates of CAI, total cotton supply on the domestic front would be around 463.15 and consumption would stand around 325 lakh bales, with the left over surplus of 138.15 lakh bales. For the previous season, CAI had estimated the production of 382.75 lakh bales.

According to Cotton Association of India (CAI), due to the attack of white fly, cotton production in Punjab and Haryana is likely to drop by around 23 percent and 20 percent respectively. Cotton production on Punjab would stand around 10 lakh bales this year as compared to 13 lakh bales during previous year. However in Haryana, cotton output in the current season would be around 19 lakh bales as compared to 23.5 lakh bales. Although Punjab and Haryana are expected to bear the loss in cotton production due to whitefly attack, the maximum fall in the production would be noticed in Karnataka. According to CAI, cotton production in Karnataka is expected to decrease by around 35% to 20 lakh bales due to drought in the state.

Cotton Corporation of India (CCI) is currently holding 12 Lakh bales of cotton produced during the previous season. CCI procured around 87 lakh bales of cotton during the season 2014-15 under the MSP operation. According to the market participant CCI could receive good demand after the festival season as the produce it is holding is moisture free fiber, for which the spinner and textile mills could bid well.

According to the market participant, the steady pace is recorded cotton arrivals due to the commencement of festival season but the same is expected to surge up remarkably after Diwali. All India daily average arrival is hovering around 50 thousand bales.

### International Fundamentals:

Cotton export in Pakistan has witnessed a growth of 10 per cent during the first quarter of the fiscal year (FY 16) due to the lower domestic prices and higher demand from the overseas. According the data, country exported raw cotton valued USD 55 million during the first quarter of FY16 as compared to USD 50 million during the same period in FY 15.

The recent rise in the cotton prices in Pakistan has improved the import parity. Spinners have booked the import order from India and other exporting nations. So far around 1.4 million bales of cotton has been booked to be imported to country and the volume is likely to go around 2.5 million bales.

According to latest release of International Cotton Advisory Committee (ICAC), cotton imports to China is likely to be around 1.59 million tons in 2015-16, around 11.6% lower as compared to the imports of 1.8 million tons during 2014-15.

### Outlook

We expect domestic prices to remain range bound to weak in the near -term.
