

## Domestic Fundamentals:

**Market Outlook:** Cotton spot market noticed steady to firm tone on Friday.

**In The News:** Maharashtra government has started the cotton procurement in state under MSP scheme via Maharashtra State Cooperative Cotton-Growers Marketing Federation. So far only three centers are operating in state but the numbers are likely to reach 17 shortly and it may reach to 96 if CCI outsources its duty to the federation. The chairperson said that during the previous season they procured only 27 Lakh quintal of cotton, but this year they may buy up to 100 lakh quintal.

Despite the expectation of higher production this year, Cotton prices in Maharashtra are ruling above the MSP of Rs 4100 per quintal. According to the market participants, private traders have bought around 1.5 Lakh quintal of cotton from the farmers at the prices of Rs 4150-4450 per quintal.

The government of India will screen each variety of Bt hybrid cotton seed in order to identify the white-fly resistant variety so that it can tell the private seed producer to focus on these particular variety and to save other crop including vegetables from being infected which are grown nearby cotton crop.

Despite the drastic fall in import expectation from China, India is likely to export more cotton this year as compared to the previous. According to the government official, India is likely to export 68 lakh bales of cotton this year, around 18% higher when compared to the previous season as Asian countries Bangladesh, Pakistan and Vietnam are expected to import more cotton.

According to Textile Commissioner, Kavita Gupta, cotton production in the country would be around 365 lakh bales in the season 2015-16, around 4% lower when compared to the production of previous year. She believes that the cotton exports would be around 68 lakh bales, around 18% higher when compared to the previous season. Due to the lower production and higher export the ending stocks in the current season would be standing around 38 lakh bales, around 27% lower when compared to the ending stock of previous season.

Cotton Corporation in India (CCI) has not started the procurement under MSP operation in Punjab. Also CCI got direction from Union Textile Minister, Santosh Gangwar to start procurement in the state, as to insure the genuine remuneration to the cotton farmers as they are already lost a large share of their crop to white fly attack, but until now there are no such operation by CCI, said farmers who are selling their crops to private traders.

Cotton farmers in few markets of Telangana are not interested in selling their crop to Cotton Corporation of India (CCI) due to new rules formulated by the same. Cotton farmers are opposing the CCI rule of rejecting cotton for procurement at MSP of Rs 4100 per quintal if bearing moisture content more than 8%. If the produce contains moisture content up to 12 percent, CCI is paying Rs 3936 per quintal.

The Director General of Foreign Trade (DGFT) issued notice for inclusion of export of cotton fabrics (woven and knitted) and cotton made-ups to leading markets, including African countries under the Merchandise Exports from India Scheme (MEIS). The step taken by government is likely to escalate export as the scheme consist the export benefit of two percent.

### International Fundamentals:

Cotton export in Pakistan has witnessed a growth of 10 per cent during the first quarter of the fiscal year (FY 16) due to the lower domestic prices and higher demand from the overseas. According the data, country exported raw cotton valued USD 55 million during the first quarter of FY16 as compared to USD 50 million during the same period in FY 15.

The recent rise in the cotton prices in Pakistan has improved the import parity. Spinners have booked the import order from India and other exporting nations. So far around 1.4 million bales of cotton has been booked to be imported to country and the volume is likely to go around 2.5 million bales.

According to latest release of International Cotton Advisory Committee (ICAC), cotton imports to China is likely to be around 1.59 million tons in 2015-16, around 11.6% lower as compared to the imports of 1.8 million tons during 2014-15.

### Outlook

We expect domestic prices to remain range bound to weak in the near -term.
