

## Domestic Fundamentals:

**Market Outlook:** Cotton spot prices remained mostly firm on Wednesday.

**In The News:** India exported 2.634 lakh bales of cotton last week (09 Nov-15 Nov 2015), which was 2.618 lakh bales previous to last week (02 Nov-08 Nov 2015), according to the data released by IBIS and compiled by Agriwatch. Imports on the other hand stood 0.028 lakh bales last week, which was 0.192 lakh bales previous to last week.

Gujarat state agriculture department has revised its first advance estimates for area, production and yield of major Kharif crop in the state for the season 2015-16. Cotton production figures has been revised down in the latest estimates at 92.57 lakh bales which was forecasted to be at 95.29 lakh bales in the previous estimates.

Cotton procurement by Government would be around 20 to 25 Lakh bales this year against the 87 lakh bales during the last year, said Cotton Corporation of India (CCI). As cotton prices are ruling above the MSP of Rs 4100 per quintal in most of the cotton trading states of country, CCI would be buying cotton at higher prices. Also the intervention of CCI is not necessary if farmers are getting the genuine price i.e. prices over and above of MSP.

India exported 2.618 lakh bales of cotton last week (01 Nov-08 Nov 2015), which was 1.449 lakh bales previous to last week (26 Oct-01 Nov 2015), according to the data released by IBIS and compiled by Agriwatch. Imports on the other hand stood 0.192 lakh bales last week, which was 0.124 lakh bales previous to last week.

Cotton production in India during the season 2015-16 according to USDA would be around 6.205 million tons (approx. 365 lakh bales), around 3.5% lower when compared to the production of previous season which was 6.423 million tons (approx. 377.8 Lakh bales).

Cotton exports during the very first month of the season, i.e. October stood 4.63 lakh bales, around 33.5% higher as compared to the export during the previous month and around 2.5 times higher as compared to the exports during the same month previous season, according to IBIS data, compiled by Agriwatch. Imports in October was 0.92 lakh bales around 48.5% lower when compared to the imports in previous month and around 54% lower compared to the imports during the same period last season.

Maharashtra government has started the cotton procurement in state under MSP scheme via Maharashtra State Cooperative Cotton-Growers Marketing Federation. So far only three centers are operating in state but the numbers are likely to reach 17 shortly and it may reach to 96 if CCI outsources its duty to the federation. The chairperson said that during the previous season they procured only 27 Lakh quintal of cotton, but this year they may buy up to 100 lakh quintal.

### International Fundamentals:

Around 42,100 tons of cotton has been imported by China in October, the lowest volume imported at least a decade and around 48.6 percent lower when compared to the same month last year, said industry website citing custom data. Cotton during the initial 10 months of the year stood 1.2 million tones, around 64.3 percent lower as compared to the imports during the same period last year.

According to USDA, around 68% of the cotton has been harvested in USA as on 15 November 2015, which was 58% a week earlier and 64% during the same period last year. The five year average of the harvesting during the same period is however 74%, fairly higher than the current harvesting pace.

World cotton production estimates for season 2015-16 has been revised downward by USDA to 22.99 million tons from 23.38 million tons a month earlier. According to USDA, global cotton output stood at 25.89 million tons in season 2014-15.

### Outlook

We expect domestic prices to remain range bound to weak in the near -term.
