

Domestic Fundamentals:

Market Outlook: Cotton spot prices noticed mostly firm tone on Monday.

In The News: Cotton ending stocks in India is likely to go down by around 8% this year as compared to the previous year. According to USDA, cotton stocks would stand around 2.69 million tons by the end of season 2015-16 as compared to 2.93 million tons previous season.

Cotton consumption in India is likely to be around 5.50 million tons in season 2015-16, which was estimated to be around 5.55 million tons a month earlier. Although the consumption figures has been revised downward this month by USDA, the same would be standing around 3% higher as compared to the previous year's consumption of 5.33 million tons.

India is likely to export 1.15 million tons (around 67.6 lakh bales of 170 kg each) of cotton in season 2015-16, around 26.3% higher as compared to 0.91 million tons, the volume it exported in the previous season, according to USDA.

India exported 3.37 lakh bales of cotton last week (30 Nov-06 Dec 2015), which was 4.00 lakh bales previous to last week (23 Nov-29 Nov 2015), according to the data released by IBIS and compiled by Agriwatch. Imports on the other hand stood 0.09 lakh bales last week, which was 0.084 lakh bales previous to last week.

Cotton exports from India noticed a remarkable rise in November as compared to the previous month. During November the country exported around 12.46 lakh bales of cotton as compared to 4.63 lakh bales during the previous month and 7.34 lakh bales during the same month previous season. However imports fell to almost half the quantity exported previous month. Cotton imports during November was 0.55 lakh bales, which was 0.92 a month earlier and 1.98 lakh bales during the same month a year earlier.

Cotton Association of India (CAI) has kept intact its cotton production estimates in October release as it was in previous month. Cotton output according to CAI would be around 370.50 lakh bales of 170 kg each during 2015-16 as compared to 382.75 lakh bales in 2014-15.

India is likely to export around 10 lakh bales of cotton to Pakistan as the country has faced the severe crop loss due to rain and flood, said cotton association of India. According to market participants, the situation will lent support to the cotton prices in domestic market.

Cotton production estimates of India are revised down by ICAC at 6.27 million tons, around 0.5% lower when compared to the estimates of previous week, which was 6.30 million tons. As compared to previous year, cotton production in country is likely to fall by around 3.7%, as it was 6.51 million tons previous season.

Interest Equalization Scheme, formerly known as the Interest Rate Subvention Scheme, on preshipment and post-shipment of garments is expected to enhance cotton textile exports from India, said R.K. Dalmia, Chairman, Cotton Textiles Export Promotion Council (Texprocil). Following the rise in cotton textile exports, demand of raw cotton too is expected to surge in domestic market.

International Fundamentals:

Cotton prices are expected to plunge up in international market as the USDA has revised the export figures for the season 2015-16 upwards. According to USDA, cotton exports in the current season would be around 7.69 million tons, around 3% higher when compared to the estimates of previous season. However the export would be on the lower side as compared to the previous season, when it was 7.70 million tons, said USDA.

Cotton ending stocks during the season 2015-16 are expected to be around 22.72 million tons, around 1.6% lower when compared to the estimates of previous month and around 7% lower as compared to the ending stocks of 24.38 million tons in the season 2014-15, according to USDA.

Pakistan is likely to import around 435 thousand tons of cotton in 2015-16, more than double the amount it imported in 2014-15, which was 182 thousand tons. Reason for the same is fall in the production to 1.7 million tons in current season from 2.3 million tons previous season.

Outlook

We expect domestic prices to remain range bound in the near -term.
