

## Domestic Fundamentals:

**Market Outlook:** Cotton spot prices noticed mostly weak tone on Thursday.

**In The News:** South Indian cotton mills in country have terminated the purchase of cotton from Gujarat due to the quality issues being reported in the produce. According to the SIMA (South Indian Mills Association), cotton supplies from Gujarat during December this year are not the up to the mark of the quality standards, although it was good during October and November. Following the reason, the purchase from Gujarat has been fallen down by 60-70 in the current month.

India exported 3.59 lakh bales of cotton last week (21 Dec-27 Dec 2015), which was 3.91 lakh bales previous to last week (14 Dec-20 Dec 2015), according to the data released by IBIS and compiled by Agriwatch. Imports on the other hand stood 0.067 lakh bales last week, which was 0.15 lakh bales previous to last week.

Many of the textile mills in country are willing to import cotton from African region rather than buying it from local traders. Due to the strong demand from overseas particularly Pakistan and China currently, the domestic prices of cotton are ruling quite high which is resulting in reluctant textile mills to buy the local produce. Also, the cotton arrivals are declining, making the supply side to lag.

Due to the robust demand from overseas including Pakistan, Government of India is expected to cut drastically on the cotton purchasing under the MSP operation this season. According to the sources, country spent Rs 160 billion to procure 8.7 million bales of cotton in season 2014-15, surprisingly it could only spend Rs 20 billion approximately to procure 1 million bales of cotton in the current season i.e.2015-16.

Pakistan has surpassed Bangladesh and China being the largest cotton importer from India during the week. According to the data released by IBIS, Pakistan imported 1.82 lakh bales of cotton in the past week that is 14 Dec to 20 Dec 2015. Other major importers were Bangladesh, Vietnam, China and Indonesia and their imported volumes were 0.87 lakh bales, 0.54 lakh bales, 0.23 lakh bales and 0.20 lakh bales respectively.

Cotton exports from India during October-November noticed a rise of 80% a compared t the previous month. India exported around 18 lakh bales of cotton during the October and November, which were 10 lakh bales during the same period previous year. According to the cotton corporation of India (CCI), India is likely to export around 60-65 lakh bales of cotton, whereas Cotton Advisory Board estimates it to be around 68 lakh bales.

Government of Gujarat has announced a bonus of Rs 110 per 20 Kg of cotton, besides the MSP of 810 per 20 Kg if the farmers sell the crop to Cotton Corporation of India (CCI). So cotton farmers now will be getting Rs 920 on every 20 kg of the crop, compared to Rs 810, the MSP announced for the Kharif season 2015-16.

Cotton ending stocks in India is likely to go down by around 8% this year as compared to the previous year. According to USDA, cotton stocks would stand around 2.69 million tons by the end of season 2015-16 as compared to 2.93 million tons previous season.

### International Fundamentals:

According to the latest report of ICAC, average Cotlook A index during the season 2014-15 stood 71 cents per pound, around 22% lower when compared to the index previous season which was 91 cents per pound and around 19% lower when compared to the price during previous to last season which was 88 cents per pound.

During a Ministerial meeting at World Trade Organization (WTO), held at Nairobi, a decision was made to give more importance to cotton form least developed countries by providing duty-free and quota-free access to the developed nations. The decision includes three elements that is market access, domestic support and export competition and the same will be effective from January 01, 2016.

According to the China Cotton Association, the country is likely to import around 1.65 million tons of cotton in 2015-16. China during the current season would be consuming around 7.2 million tons. The ending stocks by the end of season 2015-16 would be around 13.16 million tons as compared to 13.56 million tons in 2014-15.

### Outlook

We expect domestic prices to remain firm in the near -term.
