

Domestic Fundamentals:

Market Outlook: Cotton spot prices noticed mixed tone on Saturday.

In The News: The government should not consider any proposal to relax duty and tax on the import of cotton from India, said the Pakistan Cotton Ginner Association (PGCA) as the same could hurt the domestic market by dumping of cheap raw material. It should be noted that government of Pakistan had imposed 10 per cent duty on imports of cotton yarn, grey and processed fabric specially coming from India which was effective from November 01, 2015.

A nine member committee has been constituted by central government to execute the cotton price control order that will set the prices farmers pay to seed companies to get cotton seeds. However the seed companies including Mahyco Monsanto are not happy with the decision of setting Maximum Sale Price (MSP) by government.

India exported 0.85 lakh bales of cotton last week (18 Jan-24 Jan 2016), which was 1.8 lakh bales previous to last week (11 Jan-17 Jan 2016), according to the data released by IBIS and compiled by Agriwatch. Imports on the other hand stood 0.10 lakh bales last week, which was 0.93 lakh bales previous to last week.

Major importer of Indian cotton during the week was Bangladesh. According to the data released by IBIS, Bangladesh imported 0.27 lakh bales of cotton in the past week (i.e. 18 Jan-24 Jan 2016). Other major importers were Pakistan, China, Vietnam and Indonesia and their imported volumes were 0.26 lakh bales, 0.11 lakh bales, 0.07 lakh bales and 0.05 lakh bales respectively. India imported cotton mainly from Australia, USA Tanzania followed by Turkmenistan and Togo. The respective volumes these countries exported to India during the week are 0.067 lakh bales, 0.020 lakh bales, 0.009 lakh bales, 0.007 lakh bales, 0.001 Lakh Bales.

Cotton production in Andhra Pradesh is likely to fall by around 20% in the current season to 22.18 lakh bales as compared to the 27.51 lakh bales a year ago, according to the second advance estimates released by the State Agriculture Department. However according to the cotton association of India, cotton production in the state would be around 26 lakh bales.

According to the Cotton Association of India (CAI), cotton arrivals are standing lower this year as compared to the previous year. CAI said that, as farmer are holding back their produce in the anticipation of better prices in future, cotton stocks has not been liquidated in the market resulting in the lower arrivals.

Cotton Association of India (CAI) has further slashed down the cotton production estimates for the season 2015-16 to 357 lakh bales. In its October estimates the association kept the production figures at 370 lakh bales and later it revised the same to 362 lakh bales in November. According to the latest estimates the output would be around 357 lakh bales, 25.5 lakh bales or 6% lower when compared to the production figures of previous year which was 382.5 lakh bales.

According to the state agriculture department's second advance estimates, cotton production in Karnataka during the current season would be around 11.68 lakh bales (of 170 kg each), around 47 lower as compared to the production of 22.04 lakh bales previous year. The government has set the production target of 17.13 lakh bales for the current season but due to the deficit rainfall the production was foreseen at 10.99 lakh bales but now it been raised to 11.68 lakh bales.

International Fundamentals:

According to the latest ICAC weekly report, cotton exports on the global front are likely to be around 7.42 million tons in season 2015-16, around 0.3% lower when compared to the estimates of 7.44 million tons previous week and around 3.6% lower when compared to the exports of 7.70 million tons during the previous season.

China cotton imports have moved 9 years low, according the calculation of Reuters. the country imported 188,200 tonnes of cotton in December, around 28.85 per cent lower as compared to the volume in the same month previous year. However till December the total volume for the calendar year stood 1.48 million tons, the lowest level in last nine years, according to Reuters.

According to the Pakistan Cotton Ginners Association, the country has produced around 9.475 million bales of cotton during this season, around 33.5 per cent lower as compared to the 14.251 million bales previous year.

Outlook

We expect domestic prices to remain range bound to weak in the near -term.
