

#### **Domestic Fundamentals:**

**Market Outlook**: Cotton spot prices noticed mixed tone on Tuesday.

**In The News**: Department of Agriculture, Ministry of Agriculture (MoA) in its second advance estimates, has revised the cotton production estimates downwardly for the season 2015-16 at 306.92 lakh bales (of 170 kg each). For the season 2014-15, the estimate was 346.23 lakh bales according to the first advance estimates for the season.

India exported 1.794 lakh bales of cotton last week (08 Feb-14 Feb 2016), which was 2.29 lakh bales previous to last week (01 Feb-07 Feb 2016), according to the data released by IBIS and compiled by Agriwatch. Imports on the other hand stood 0.129 lakh bales last week, which was 0.104 lakh bales previous to last week.

Major importer of Indian cotton during the week was Bangladesh. According to the data released by IBIS, Bangladesh imported 0.76 lakh bales of cotton from India in the past week (08 Feb-14 Feb 2016). Other major importers were Pakistan, Vietnam, Indonesia and China and their imported volumes were 0.50 lakh bales, 0.21 lakh bales, 0.17 lakh bales and 0.09 lakh bales respectively. India imported cotton from USA, Argentina, Australia followed by Mali and Egypt. The respective volumes these countries exported to India during the week are 0.045 lakh bales, 0.028 lakh bales, 0.024 lakh bales, 0.015 lakh bales, 0.014 Lakh Bales.

The Foreign Agriculture Services (FAS), division of USDA has lowered the production forecast for India in its latest report to 356 lakh bales. The reason for the downfall in the revision is lower yield expectation in Punjab and Haryana due to the attack of white fly and impact of pink bollworm in Gujarat.

Total cotton arrival till January 27 this season remained 144.07 lakh bales (of 170 Kg each), around 30% lower as compared to 206.76 lakh bales previous season during the same period, according to Cotton Corporation of India.

According to the industry sources, Cotton Corporation of India (CCI) has auctioned most of its stocks it procured under MSP operation in 2015-14 and currently it is holding 25000 bales (of 170 Kg each) of cotton.

India is likely to export 1.24 million tons (around 73 lakh bales of 170 kg each) of cotton in season 2015-16, around 9% higher than the estimates of previous month which was 1.26 million tons and around 36% higher as compared to 0.91 (around 53.76 lakh bales) million tons, the volume it exported in the previous season, according to USDA.

Monthly cotton exports during January noticed a downtrend as the demand from overseas remained weak during the month. Country exported 8.85 lakh bales of cotton during January around 46.8% lower compared to the exports of 16.64 lakh bales previous month and 32% higher compared to the exports of 6.71 lakh bales during the corresponding month last year, according to custom data released by IBIS. The major export destinations during January were Bangladesh, Pakistan, Vietnam, Malaysia and Indonesia. Total exports in the current season so far (during the period of October'15 to January'16) stood at 42.6 lakh bales around 63.6% higher when compared to 26.04 lakh bales, the export during the corresponding period last season i.e. 2014-15.

#### **International Fundamentals:**

According to USDA latest report, USA cotton exports would stand around 2.07 million tons, around 5% lower compared to the estimates of previous month i.e. 2.18 million tons and around 15.5% lower than the exports of previous year i.e. 2.45 million tons. Following the lower exports expectation, the cotton prices in the region are moving weaker.

According to USDA latest report, World cotton production would be around 22.07 million tons in 2015-16, around 0.2% lower as compared to the estimates of previous month i.e. 22.11 million tons and around 15% lower than the production of previous year i.e. 25.94 million tons.

World cotton exports figures further slashed down by USDA. It expects that global cotton exports would be around 7.64 million tons, around 2.6% lower as compared to the estimates of previous month and around 0.8% lower as compared to the exports during previous season.

#### **Outlook**

We expect domestic prices to remain range bound to weak in the near -term.
