

## Domestic Fundamentals:

**Market Outlook:** Cotton spot prices noticed mostly steady to weak tone on Wednesday.

**In The News:** Cotton production in India during the next season that is 2016-17, could reach around 370-380 lakh bales, said the Chairman, Cotton Corporation of India (CCI). He believes that if the weather condition remains normal, the cotton production in the next season would be higher even if the area remains same as current season. The cause of lower production in the country is crop loss due to the unfavorable weather conditions. According to Cotton Advisory Board (CAB), cotton output is likely to be around 352 lakh bales in the current season.

Pakistan Cotton Ginners Association has raised its concern over the cotton imports from India. PGCA has urged the government to suspend the cotton and cotton yarn imports from India. Due to the crop loss, Pakistan fulfilled its demand from India and emerged as the one of the major buyer of Indian cotton.

Department of Agriculture, Ministry of Agriculture (MoA) in its second advance estimates, has revised the cotton production estimates downwardly for the season 2015-16 at 306.92 lakh bales (of 170 kg each). For the season 2014-15, the estimate was 346.23 lakh bales according to the first advance estimates for the season.

India exported 1.794 lakh bales of cotton last week (08 Feb-14 Feb 2016), which was 2.29 lakh bales previous to last week (01 Feb-07 Feb 2016), according to the data released by IBIS and compiled by Agriwatch. Imports on the other hand stood 0.129 lakh bales last week, which was 0.104 lakh bales previous to last week.

Major importer of Indian cotton during the week was Bangladesh. According to the data released by IBIS, Bangladesh imported 0.76 lakh bales of cotton from India in the past week (08 Feb-14 Feb 2016). Other major importers were Pakistan, Vietnam, Indonesia and China and their imported volumes were 0.50 lakh bales, 0.21 lakh bales, 0.17 lakh bales and 0.09 lakh bales respectively. India imported cotton from USA, Argentina, Australia followed by Mali and Egypt. The respective volumes these countries exported to India during the week are 0.045 lakh bales, 0.028 lakh bales, 0.024 lakh bales, 0.015 lakh bales, 0.014 Lakh Bales.

The Foreign Agriculture Services (FAS), division of USDA has lowered the production forecast for India in its latest report to 356 lakh bales. The reason for the downfall in the revision is lower yield expectation in Punjab and Haryana due to the attack of white fly and impact of pink bollworm in Gujarat.

Total cotton arrival till January 27 this season remained 144.07 lakh bales (of 170 Kg each), around 30% lower as compared to 206.76 lakh bales previous season during the same period, according to Cotton Corporation of India.

According to the industry sources, Cotton Corporation of India (CCI) has auctioned most of its stocks it procured under MSP operation in 2015-14 and currently it is holding 25000 bales (of 170 Kg each) of cotton.

India is likely to export 1.24 million tons (around 73 lakh bales of 170 kg each) of cotton in season 2015-16, around 9% higher than the estimates of previous month which was 1.26 million tons and around 36% higher as compared to 0.91 (around 53.76 lakh bales) million tons, the volume it exported in the previous season, according to USDA.

### International Fundamentals:

The Cotton Advisory Board has estimated 7% dip in cotton production this year and it may touch 35.2million bales(170kg per bale)this season ending Sept-2016.India had produced 38 million bales last year.Despite lower production estimate prices are ruling lower due to higher carryout stock.Global cotton market too have crashed to five year's lower level.There is a growing fear that China, a net importer may start selling cotton from its reserve soon.It would further distort global price.

Pakistan has lowered the cotton production target for the season 2016-17 to 141.01 lakh bales. The country has set the target of 154.9 lakh bales for the season 2015-16 a year earlier which has been revised thrice and now it expected to be around 96.87 lakh bales due to the severe crop loss of 34% due to pest attack. The lower production in the country may open channels for the more exports from India, as Pakistan would import to fulfill its domestic demands.

According to USDA latest report, USA cotton exports would stand around 2.07 million tons, around 5% lower compared to the estimates of previous month i.e. 2.18 million tons and around 15.5% lower than the exports of previous year i.e. 2.45 million tons. Following the lower exports expectation, the cotton prices in the region are moving weaker.

### Outlook

We expect domestic prices to remain range bound to weak in the near -term.
