

## Domestic Fundamentals:

**Market Outlook:** Cotton spot prices noticed mixed tone on Saturday.

**In The News:** The National Commodities and Derivatives Exchange (NCDEX) has imposed special margin of 5% on short side of all running Kapas contracts with effective March 22, 2016 as kapas prices declined by more than 7% within a fortnight.

In order to farmers aware about the best practices to grow cotton and to avoid repeat of the last year's whitefly attack on crop in Punjab and Haryana, trade bodies -- Indian Cotton Association Limited (ICAL), Northern India Textiles Mills Association (NITMA) and Mumbai-based Indian Society for Cotton Improvement (ISCI) -- organized a seminar in Abohar on Monday.

Declining cotton prices during the last few weeks have raised concerns among the farmers. Currently the prices are Rs.3300 to Rs. 4000 per quintal compared to around Rs.5500 to Rs.6000 per quintal two years ago. To support the livelihood of cotton farmers, they have asked for a minimum price of Rs.5000 per quintal.

The Cotton Association of India (CAI) has estimated cotton production at 345 lakh bales (of 170 kg each) in the 2015/16 season that started on October 01, 2015 lower by 37.75 lakh bales from earlier estimate. With carryover stock of about 73.60 lakh bales and imports of about 14 lakh bales, the total availability is estimated at around 432.60 lakh bales. However, CAI has pegged the total consumption at around 304 lakh bales, of which 270 lakh bales is estimated to be consumed by mills, 24 lakh bales by small scale units, while 10 lakh bales is likely to be non-mill consumption.

India exported 1.19 lakh bales of cotton last week (14 Mar-20 Mar 2016), which was 1.20 lakh bales previous to last week (07 Mar-13 Mar 2016), according to the data released by IBIS and compiled by Agriwatch.

Major importer of Indian cotton during the week (14-20 Mar 2016) was Mali. According to the data released by IBIS and compiled by Agriwatch, Mali imported 0.17 lakh bales of cotton from India in the past week (14-20 Mar 2016). Other major importers were USA, Egypt, Australia and Brazil and their imported volumes were 0.07 lakh bales, 0.02 lakh bales, 0.01 lakh bales and 0.01 lakh bales respectively.

Department of Agriculture, Ministry of Agriculture (MoA) in its second advance estimates, has revised the cotton production estimates downwardly for the season 2015-16 at 306.92 lakh bales (of 170 kg each). For the season 2014-15, the estimate was 346.23 lakh bales according to the first advance estimates for the season.

The Foreign Agriculture Services (FAS), division of USDA has lowered the production forecast for India in its latest report to 356 lakh bales. The reason for the downfall in the revision is lower yield expectation in Punjab and Haryana due to the attack of white fly and impact of pink bollworm in Gujarat.

According to Cotton Association of India (CAI), the arrivals during 2015-16 season up to the end of February 2016 are estimated at 245 lakh bales compared to 276.25 lakh bales arrived up to the same period last year. This reduction in the arrivals of cotton is an indication of a lower crop this season.

### International Fundamentals:

Bangladeshi Commerce Minister has asked the Indian government to withdraw countervailing duties on Bangladeshi products, particularly garments. Cotton imports rose to 6.1 million bales in 2015 from three million bales in 2006, according to data from BTMA. Cotton imports are increasing amid establishment of new spinning mills and capacity expansion of the old plants. India has the potential to continue being the major supplier of cotton to Bangladesh as it is the largest grower of cotton.

According to trade data released by cncotton.com, China's imports of cotton declined 64.7 per cent in February 2016 compared with the same month previous year. Imports declined to their lowest in last nine years in 2015.

According to USDA latest report, world cotton production this season at 100.2 million bales, nearly 1.2 million bales below February's projection and 19 million bales below 2014/15. Weather-related issues reduced both area and yield in a number of countries this season. For India, production is forecast at 26.8 million bales, a reduction of 1 million bales this month as gin arrivals indicated a lower crop and India's crop is estimated 9 per cent below 2014/15 and the lowest since 2009/10. World ending stocks are now projected at 103.3 million bales.

### Outlook

We expect domestic prices to remain range bound to weak in the near -term.
