

Domestic Fundamentals:

Market Outlook: Cotton spot prices noticed weak tone on Saturday.

In The News: Around 20 desi Bt-cotton varieties developed in government-funded research institutions are set to undergo mutli-location trials in the coming months. The move will make some of the varieties available to the farmers as low-cost Bt cotton seeds.

According to Cotton Association of India, Cotton supplies in Indian spot markets declined by 12 percent from a year ago to 28 million bales between October and March this season as adverse weather affected production. India is likely to harvest 34.1 million bales of cotton in the 2015/16 season that started on Oct. 1, down from last year's output of 38.3 million bales.

Good demand from the spinners and the mills is adding to the positive tone of the market during the last few days.

According to a recent forecast by the weather office, summer planting of cotton is likely to be delayed as above normal heat wave conditions is likely to prevail over central and northwest India from April to June this year.

According to Cotton Association of India (CAI), output of cotton in India for 2015 -16 season is estimated to be around 341 lakh bales compared to 382.75 lakh bales in 2014 -15. The projected balance sheet drawn by the CAI estimated total cotton supply for the season 2015-16 at 428.60 lakh bales while the domestic consumption is estimated at 305 lakh bales.

India exported 0.468 lakh bales of cotton last week (11 -17 Apr 2016), which was 0.760 lakh bales previous to last week (04 -10 Apr 2016), according to the data released by IBIS and compiled by Agriwatch.

Major importer of Indian cotton during the week (11 -17 Apr 2016) was Bangladesh. According to the data released by IBIS and compiled by Agriwatch, Bangladesh imported 0.20 lakh bales of cotton from India in the past week (11 -17 Apr 2016). Other major importers were Pakistan, Vietnam, China and Indonesia and their imported volumes were 0.12 lakh bales, 0.06 lakh bales, 0.03 lakh bales and 0.003 lakh bales respectively.

Department of Agriculture, Ministry of Agriculture (MoA) in its second advance estimates, has revised the cotton production estimates downwardly for the season 2015-16 at 306.92 lakh bales (of 170 kg each). For the season 2014-15, the estimate was 346.23 lakh bales according to the first advance estimates for the season.

The Foreign Agriculture Services (FAS), division of USDA has lowered the production forecast for India in its latest report to 356 lakh bales. The reason for the downfall in the revision is lower yield expectation in Punjab and Haryana due to the attack of white fly and impact of pink bollworm in Gujarat.

According to Cotton Association of India (CAI), the arrivals during 2015-16 season up to the end of March 2016 are estimated at 280.15 lakh bales compared to 318.45 lakh bales arrived up to the same period last year. This reduction in the arrivals of cotton is an indication of a lower crop this season.

International Fundamentals:

According to the CNCotton.com, China imported 57,900 tonnes of cotton in March, down 54.7 percent compared to same period previous year. Annual sales of cotton to start from May to August and sales halt from Sept to Feb the next year. For 2016, total sales less than 2 million tonnes from May 3 to Aug 31.

Pakistan cotton production for the outgoing season (2015-16) is likely to be missed by 35 percent and it is expected at 10.1 million bales against the initial target of 15.49 million bales.

Turkey's plan to slap anti-dumping duties on U.S. cotton imports will increase the cost of raw materials for Turkish textile producers and affect the competitiveness of their exports. This decision is likely to increase the cost of raw materials by 2 -3 per cent.

According to USDA latest report, global 2015/16 cotton ending stocks are revised down this month. World 2015-16 cotton production is projected at 99.8 million bales, 16 per cent below last season. World ending stocks are now projected at 102.2 million bales.

Outlook

We expect domestic prices to remain range bound to firm in the near -term.
