

## Domestic Fundamentals:

**Market Outlook:** Cotton spot prices noticed mixed tone on Monday.

**In The News:** Karnataka Rajya Raitha Sangha (KRSS) has asked the farmers not to cultivate cotton in the upcoming kharif season following 80 per cent of the destruction of the crop last season due to bollworm attack in the State.

Desi cotton is gaining importance in the country and is likely to make a comeback this year. Last year cotton production was affected in several states following Bt Cotton and this year farmers are preferring to plant the native varieties in the upcoming kharif season. Total acreage under cotton is likely to remain unchanged this year at 118.18 lakh hectares compared to previous year according to industry sources.

According to industry sources, India cotton exports are expected to decline by 10 per cent to 6 million bales in the current year ending September amid increase in domestic prices, which has made the fibre uncompetitive in the global market. India had exported 6.7 million bales (Of 150 kg each) in the 2014 -15 marketing year. Till date in the current marketing year 2015 -16, India has exported around 5 million bales. Currently not much export is taking place as global prices are declining and domestic cotton prices are increasing.

According to Cotton Association of India (CAI), output of cotton in India for 2015 -16 season is estimated to be around 341 lakh bales compared to 382.75 lakh bales in 2014 -15. The projected balance sheet drawn by the CAI estimated total cotton supply for the season 2015-16 at 428.60 lakh bales while the domestic consumption is estimated at 305 lakh bales.

India exported 0.561 lakh bales of cotton last week (02 -08 May 2016), which was 0.658 lakh bales previous to last week (25 Apr -01 May 2016), according to the data released by IBIS and compiled by Agriwatch.

Major importer of Indian cotton during the week (02 -08 May, 2016) was Bangladesh. According to the data released by IBIS and compiled by Agriwatch, Bangladesh imported 0.193 lakh bales of cotton from India in the past week (02 -08, May 2016). Other major importers were Pakistan, Vietnam, China and Indonesia and their imported volumes were 0.154 lakh bales, 0.108 lakh bales, 0.064 lakh bales and 0.011 lakh bales respectively.

Department of Agriculture, Ministry of Agriculture (MoA) in its second advance estimates, has revised the cotton production estimates downwardly for the season 2015-16 at 306.92 lakh bales (of 170 kg each). For the season 2014-15, the estimate was 346.23 lakh bales according to the first advance estimates for the season.

The Foreign Agriculture Services (FAS), division of USDA has lowered the production forecast for India in its latest report to 356 lakh bales. The reason for the downfall in the revision is lower yield expectation in Punjab and Haryana due to the attack of white fly and impact of pink bollworm in Gujarat.

According to Cotton Association of India (CAI), the arrivals during 2015-16 season up to the end of March 2016 are estimated at 280.15 lakh bales compared to 318.45 lakh bales arrived up to the same period last year. This reduction in the arrivals of cotton is an indication of a lower crop this season.

### International Fundamentals:

The Chinese government has started the auction of its huge reserves of cotton this month. Stocks of cotton are expected to decline amid decline in Chinese imports and falling domestic production. The ICAC forecast that a policy of government auctions, and import limitations, will lower Chinese cotton stocks by 7% in 2015-16, and a further 10% in 2016-17. The US Department of Agriculture has forecast China's cotton stocks to fall by 6% in 2015-16, to 13.9m tons. As expected, prices have started declining recently with the unloading of stocks.

Pakistan is spending \$4 billion a year on cotton imports to support its ailing textile industry, after erratic rainfall and drought in the country's cotton fields slammed growers and the country's economy according to industry officials. Bad weather has hurt both the quality and quantity of cotton harvested, leaving the country's textile producers – who account for almost nine percent of GDP – struggling as they face lack of supply and higher prices for imports.

According to USDA latest report, global 2015/16 cotton ending stocks are revised down this month. World 2015-16 cotton production is projected at 99.8 million bales, 16 per cent below last season. World ending stocks are now projected at 102.84 million bales. For India, production is forecast at 26.8 million bales, same as previous month's estimates and India's crop is estimated 9 per cent below 2014/15 and the lowest since 2009/10.

### Outlook

We expect domestic prices to remain range bound to firm in the near -term.
