

Domestic Fundamentals:

Market Outlook: Cotton spot prices noticed range –bound to firm tone on Saturday.

In The News: According to government and trade sources, Indian cotton acreage is likely to decline by 5 -7 per cent this season compared to 118 lakh hectares during the previous year. According to early estimates acreage is likely to decline by around 10 lakh hectares. Delay in monsoon, fear of pest attack which crop production previous year and advise by State Governments to decline acreage under cotton are the factors behind likely decline in acreage.

Export of cotton-based textile goods declined in 2015-16 by 2.1 per cent to \$36.2 billion compared to \$37.1 billion in 2014-15. Exports have been declining during the last few months. The high price of domestic cotton, coupled with heavy duties on import of cheaper Chinese varieties, has affected production of cotton goods according to industry officials.

The Union Government is planning to develop alternatives to Bt Cotton. The project will be led by the Council of Scientific and Industrial Research (CSIR) and the department of Biotechnology (DBT).

The Cotton Association of India (CAI) has estimated India's cotton output in 2015 -16 at 341.50 lakh bales (of 170 kg each), around 10.8 per cent lower than compared to the previous year's production of 383 lakh bales. The projected balance sheet drawn by the CAI for 2015-16 pegs total supply at 429.10 lakh bales, while domestic consumption is seen at 305 lakh bales, thus leaving an available surplus of 124.10 lakh bales.

India exported 0.618 lakh bales of cotton last week (30 May -05 June 2016), which was 0.523 lakh bales previous to last week (23 -29 May 2016), according to the data released by IBIS and compiled by Agriwatch.

Major importer of Indian cotton during the week (30 May -05 June, 2016) was Bangladesh. According to the data released by IBIS and compiled by Agriwatch, Bangladesh imported 0.257 lakh bales of cotton from India in the past week (30 May -05 June, 2016). Other major importers were Pakistan, Vietnam, China and Taiwan and their imported volumes were 0.112 lakh bales, 0.097 lakh bales, 0.072 lakh bales and 0.023 lakh bales respectively.

Department of Agriculture, Ministry of Agriculture (MoA) in its second advance estimates, has revised the cotton production estimates downwardly for the season 2015-16 at 306.92 lakh bales (of 170 kg each). For the season 2014-15, the estimate was 346.23 lakh bales according to the first advance estimates for the season.

The Foreign Agriculture Services (FAS), division of USDA has lowered the production forecast for India in its latest report to 356 lakh bales. The reason for the downfall in the revision is lower yield expectation in Punjab and Haryana due to the attack of white fly and impact of pink bollworm in Gujarat.

According to Cotton Association of India (CAI), the arrivals during 2015-16 season up to the end of April 2016 are estimated at 302.40 lakh bales, lower compared to previous year. This reduction in the arrivals of cotton is an indication of a lower crop this season.

International Fundamentals:

According to USDA's economic research reserve, world cotton consumption is expected to reach 110.8 million bales for marketing year 2016-17 which is slightly higher as compared to last year. World cotton production is expected to be 104.4 million bales. Humble growth in global economy and comparatively low cotton prices are expected to support mill use in most countries.

The Chinese government has started the auction of its huge reserves of cotton this month. Stocks of cotton are expected to decline amid decline in Chinese imports and falling domestic production. The US Department of Agriculture has forecast China's cotton stocks to fall by 6% in 2015-16, to 13.9m tons. As expected, prices have started declining recently with the unloading of stocks.

Cotton gins are declining as Arkansas farmers abandon cotton for more profitable crops. The number of gins in the state has declined from 86 to 26 in the past 15 years according to the Arkansas Democrat-Gazette.

Outlook

We expect domestic prices to remain range bound to firm in the near -term.
