

### Domestic Fundamentals:

**Market Outlook:** Cotton spot prices noticed range –bound to weak tone on Friday.

**In The News:** The government of Punjab has appointed a high level committee to monitor and check the spread of whitefly pest in cotton growing areas. Decision was taken after assessing the report submitted by a five-member central team that had recently visited the whitefly pest affected areas of Abohar in Fazilka district. In Punjab, 1.36 lakh hectares out of total 4.50 lakh hectares of cotton acreage was affected by whitefly attack previous season and the output had declined by 40%.

According to preliminary report by the government, cotton sowing as on 22<sup>nd</sup> July, 2016 has been covered under 86.86 lakh hectares compared to 99.52 lakh hectares during the same period previous year.

According to trade sources, Indian cotton imports are likely to be more than 15 lakh bales in 2015 -16 amid lower domestic supplies due to two consecutive years of drought. Imports might go up to 18 lakh bales this season according to trade sources.

The Cotton Advisory Board has lowered cotton output in 2015-16 season on lower acreage. Cotton production estimates are 12 per cent lower at 338 lakh bales in 2015 -16 season compared to 386 lakh bales during the previous season. India's cotton imports have already touched 15 lb (14 lb) and may hit 18 lakh bales in next three months. The total cotton supply is estimated lower by three per cent to 419 lb (433 lb). Exports are seen higher at 68 lb (58 lb) even as domestic mill consumption dropping to 274 lb (278 lb) leading to higher demand of 376 lb (367 lb). The closing stock is expected to be lower at 43 lb (66 lb).

India exported 0.124 lakh bales of cotton last week (18 -24 July 2016), which was 0.251 lakh bales previous to last week (11 -17 July 2016), according to the data released by IBIS and compiled by Agriwatch.

Major importer of Indian cotton during the week (18 -24 July, 2016) was Bangladesh. According to the data released by IBIS and compiled by Agriwatch, Bangladesh imported 0.085 lakh bales of cotton from India in the past week (18 -24 July, 2016). Other major importers were Pakistan, China, Japan and Thailand and their imported volumes were 0.018 lakh bales, 0.006 lakh bales, 0.002 lakh bales and 0.001 lakh bales respectively.

Department of Agriculture, Ministry of Agriculture (MoA) in its second advance estimates, has revised the cotton production estimates downwardly for the season 2015-16 at 306.92 lakh bales (of 170 kg each). For the season 2014-15, the estimate was 346.23 lakh bales according to the first advance estimates for the season.

The Foreign Agriculture Services (FAS), division of USDA has lowered the production forecast for India in its latest report to 356 lakh bales. The reason for the downfall in the revision is lower yield expectation in Punjab and Haryana due to the attack of white fly and impact of pink bollworm in Gujarat.

According to Cotton Association of India (CAI), the arrivals during 2015-16 season up to the end of April 2016 are estimated at 302.40 lakh bales, lower compared to previous year. This reduction in the arrivals of cotton is an indication of a lower crop this season.

### International Fundamentals:

India exported 101.8 million kg of spun yarns worth US\$283 million or INR1,881 crore in June 2016 at an average realisation of US\$2.78 per kg. This was significantly lower compared to same month a year ago. Export volume was down 12% Y-o-Y and value declined 17% in US\$ terms. The drop also reflects the lean season for global textile industry in this part of the year. Exports have declined amid increasing prices in the domestic market and limited demand.

According to official sources at the Ministry of Textile Industry, cotton sowing in Pakistan is less by 21 per cent this season compared to previous season. The government has downward revised cotton production target as well as area and fixed at 14.1 million bales from 7.4 million acres for the season 2016-17 compared to 15.49 million bales from 7.7 million acres estimated for the season 2015-16.

According to USDA latest report, global 2015/16 cotton ending stocks are revised down this month. World 2015-16 cotton production is projected at 97.92 million bales, 18 per cent below last season. World ending stocks are now projected lower at 100.27 million bales. For India, production is forecast at 26.8 million bales, same as previous month's estimates and India's crop is estimated 9 per cent below 2014/15 and the lowest since 2009/10.

### Outlook

**We expect domestic prices to remain range bound to firm in the near -term.**
