

Domestic Fundamentals:

Market Outlook: Cotton spot prices noticed steady to weak tone on Tuesday.

In The News: According to preliminary report by the government, cotton sowing as on 26th August, 2016 has been covered under 102.78 lakh hectares compared to 112.68 lakh hectares during the same period previous year.

The government is rethinking on fixing price of Bt Cotton seeds. The Union agriculture ministry has withdrawn the notification and put it as a draft proposal. The ministry is now evaluating public opinion and consulting the stakeholders before finalizing the guidelines.

Cotton prices have firmed up in the domestic market amid expectation of lower output this season. This has affected exports mainly to Pakistan and about 37 per cent of the exports have been to Pakistan. After prices have touched Rs.50000 per candy, exports are declining. Till date, India has exported about 2.5 million bales to Pakistan only out of the total exports of 6.8 million bales. Pakistan is looking for other cheaper options like to import from US as per sources. China is also reducing imports from India amid high price.

In its first estimate, Cotton Association of India (CAI) has estimated output for the year starting October 2016 at 336 bales of 170 kg each. In the current year, production has been estimated at 337.5 lakh bales as on July end. Though acreage till date is around 10% lower compared to previous year, productivity will help to support output.

India exported 0.146 lakh bales of cotton last week (15 -21 August 2016), which was 0.132 lakh bales previous to last week (01 -06 August 2016), according to the data released by IBIS and compiled by Agriwatch.

Major importer of Indian cotton during the week (15 -21 August, 2016) was Bangladesh. According to the data released by IBIS and compiled by Agriwatch, Bangladesh imported 0.124 lakh bales of cotton from India in the past week (15 -21 August, 2016). Other major importers were Bahrain, Indonesia and Thailand and their imported volumes were 0.011 lakh bales, 0.010 lakh bales and 0.001 lakh bales respectively.

Department of Agriculture, Ministry of Agriculture (MoA) in its second advance estimates, has revised the cotton production estimates downwardly for the season 2015-16 at 306.92 lakh bales (of 170 kg each). For the season 2014-15, the estimate was 346.23 lakh bales according to the first advance estimates for the season.

The Foreign Agriculture Services (FAS), division of USDA has lowered the production forecast for India in its latest report to 356 lakh bales. The reason for the downfall in the revision is lower yield expectation in Punjab and Haryana due to the attack of white fly and impact of pink bollworm in Gujarat.

According to Cotton Association of India (CAI), the arrivals during 2015-16 season up to the end of April 2016 are estimated at 302.40 lakh bales, lower compared to previous year. This reduction in the arrivals of cotton is an indication of a lower crop this season.

International Fundamentals:

The International Cotton Advisory reduced world cotton stock estimates and International cotton prices jumped to over 80 cents/lb in the second half of July 2016 from an average of 70 cents/lb for the rest of the season. Significantly lower crops in the five largest producing countries and higher than expected demand led to tighter stocks at the end of 2015/16, at which time world ending stocks were estimated to have fallen by 12% to 19.7 million tons. Stocks outside of China decreased by 9%, to 8.4 million tons, which is the lowest level since 2010/11, when they reached 8.3 million tons. Furthermore, strong demand in China has reduced its national stocks by 12%, to 11.3 million tons.

In the current season, cotton acreage in Pakistan is estimated to be 25 per cent lower compared to previous year. According to Pakistan Cotton Ginners Association, country's annual demand is around 14 million bales and production is estimated around 11 million bales. It has to import around 2.5 million bales to meet country's demand.

According to USDA latest report, global 2015/16 cotton ending stocks are revised down this month. World 2015-16 cotton production is projected at 97.92 million bales, 18 per cent below last season. World ending stocks are now projected lower at 100.27 million bales. For India, production is forecast at 26.8 million bales, same as previous month's estimates and India's crop is estimated 9 per cent below 2014/15 and the lowest since 2009/10.

Outlook

We expect domestic prices to remain range bound to firm in the near -term.
