

Domestic Fundamentals:

Market Outlook: Cotton spot markets noticed mixed tone on Saturday.

In The News: There is decline in cotton supply in Gujarat State amid Rs.500 and Rs.1000 note ban by the Government. From around arrivals of 35,000 bales of cotton during Diwali, arrivals have declined to around 15000 bales. Ginners can pay in cheques only and farmers are not ready to accept cheques. There was no auction on Thursday. Around 20% of the farmers are ready for cheque payment.

According to farmers in the Adilabad district of Andhra Pradesh, the cotton crop has been affected by pink bollworm pest and yields have declined accordingly. The distressed farmers have been appealing to the government to assist them in this regard. The farmers want to replace cotton crop with wheat and chickpea crops and want the State government to supply them with seeds of two crops. The pink bollworm destroyed crops in Tamsi, Talamadugu, Vankidi, Indravelli, Kerameri and Kagaznagar.

Farmers in Karnataka are diversifying from cereals towards cash crops like cotton, sugarcane, maize etc. A recent analysis of the changes in cropping patterns from 2005-06 to 2014-15 by the Karnataka Agriculture Price Commission (KAPC) shows that farmers in the State were showing their preference for cash crops such as cotton and maize and shifting from oilseeds, cereals and millets towards these cash crops. During this period, cotton acreage in Karnataka has increased by 112% from 4.13 lakh hectares in 2005 -06 to 8.76 lakh hectares in 2014 -15.

India exported 0.254 lakh bales of cotton last week (31 October -06 November 2016), which was 0.234 lakh bales previous to last week (24 -30 October 2016), according to the data released by IBIS and compiled by Agriwatch.

Major importer of Indian cotton during the week (31 October -06 November, 2016) was Bangladesh. According to the data released by IBIS and compiled by Agriwatch, Bangladesh imported 0.110 lakh bales of cotton from India in the past week (31 October -06 November, 2016). Other major importers were China, Vietnam, Indonesia and Pakistan and their imported volumes were 0.082, 0.035, 0.023 and 0.003 lakh bales respectively.

India the largest producer of cotton is likely to buy up to 2 million bales of cotton this year. Till date India has imported around 1.5 million bales of cotton and has already signed contracts to purchase an additional 400,00 bales according to government sources. Imports have increased amid lower domestic production and lower prices in the global markets.

Department of Agriculture, Ministry of Agriculture (MoA) in its second advance estimates, has revised the cotton production estimates downwardly for the season 2015-16 at 306.92 lakh bales (of 170 kg each). For the season 2014-15, the estimate was 346.23 lakh bales according to the first advance estimates for the season.

The Foreign Agriculture Services (FAS), division of USDA has lowered the production forecast for India in its latest report to 356 lakh bales. The reason for the downfall in the revision is lower yield expectation in Punjab and Haryana due to the attack of white fly and impact of pink bollworm in Gujarat.

International Fundamentals:

Agricultural Development and Marketing Corporation of Malawi (Admarc) has asked the farmers in the country to grow more cotton this season as the crop is gaining importance in the international markets. Tobacco is being discouraged amid anti –smoking campaign by the World Health Organization. Cotton production in Malawi was reported at 45,000 MT and 49,000 MT respectively in 2014 and 2015. In 2016, production declined to 13,000 MT.

According to industry sources, India's cotton exports to Pakistan are expected to decline by around 50% in 2016 -17 amid ongoing rivalry between the two countries and expected improvement in Pakistan's cotton production. Pakistan is likely to import around 1 to 1.5 million bales in 2016 -17 which started on October 1 compared to 2.7 million bales during the previous year. India's cotton exports are expected to decline by around 28% this season to 5 million bales amid lower purchases from Pakistan. Lower exports to Pakistan will help other suppliers like Brazil, United States and some African countries.

According to USDA latest report, global 2016/17 cotton ending stocks are revised up this month. World 2016-17 cotton production is projected at 103.28 million bales, around 6.55 per cent above last season. World ending stocks are now projected higher at 88.31 million bales. For India, production is forecast at 27.00 million bales higher than previous month's estimates of 26.50 million bales and India's crop is estimated 2.27 per cent above 2015/16.

Outlook

We expect domestic prices to remain range bound to weak in the near -term.
