

Domestic Fundamentals:

Market Outlook: Cotton spot markets noticed firm tone on Wednesday.

In The News: Rains affected BT cotton crop grown in about 32,000 hectares in Tiruchi and Perambalur districts. It is only the north-east monsoon which brings an assured irrigation facility in the rain-fed regions like M.R. Palayam and surrounding areas in Tiruchi district and Veppanthattai and nearby villages in Perambalur district. Tiruchi district accounts for 8,000 hectares under cotton cultivation.

There is decline in cotton supply in Gujarat State amid Rs.500 and Rs.1000 note ban by the Government. From around arrivals of 35,000 bales of cotton during Diwali, arrivals have declined to around 15000 bales. Ginners can pay in cheques only and farmers are not ready to accept cheques. There was no auction on Thursday. Around 20% of the farmers are ready for cheque payment.

According to farmers in the Adilabad district of Andhra Pradesh, the cotton crop has been affected by pink bollworm pest and yields have declined accordingly. The distressed farmers have been appealing to the government to assist them in this regard. The farmers want to replace cotton crop with wheat and chickpea crops and want the State government to supply them with seeds of two crops. The pink bollworm destroyed crops in Tamsi, Talamadugu, Vankidi, Indravelli, Kerameri and Kagaznagar.

India exported 1.842 lakh bales of cotton last week (21 -26 November 2016), which was 1.812 lakh bales previous to last week (14 -20 November 2016), according to the data released by IBIS and compiled by Agriwatch.

Major importer of Indian cotton during the week (21 -26 November, 2016) was China. According to the data released by IBIS and compiled by Agriwatch, China imported 1.201 lakh bales of cotton from India in the past week (21 -26 November, 2016). Other major importers were Bangladesh, Vietnam, Indonesia and Pakistan and their imported volumes were 0.416, 0.098, 0.091 and 0.015 lakh bales respectively.

India the largest producer of cotton is likely to buy up to 2 million bales of cotton this year. Till date India has imported around 1.5 million bales of cotton and has already signed contracts to purchase an additional 400,00 bales according to government sources. Imports have increased amid lower domestic production and lower prices in the global markets.

Department of Agriculture, Ministry of Agriculture (MoA) in its second advance estimates, has revised the cotton production estimates downwardly for the season 2015-16 at 306.92 lakh bales (of 170 kg each). For the season 2014-15, the estimate was 346.23 lakh bales according to the first advance estimates for the season.

The Foreign Agriculture Services (FAS), division of USDA has lowered the production forecast for India in its latest report to 356 lakh bales. The reason for the downfall in the revision is lower yield expectation in Punjab and Haryana due to the attack of white fly and impact of pink bollworm in Gujarat.

International Fundamentals:

According to International Cotton Advisory Committee, December 2016 estimates, world cotton production is projected to rise by 7% to 22.5 million tons. Although India's cotton area contracted by 8% to just under 11 million hectares, production is unchanged from 2015/16 at 5.8 million tons. The average yield increased by 9% to 526 kg/ha. Output in China shrank by 4% to 4.6 million tons while production in the United States rose by 24% to 3.5 million tons. Pakistan's cotton production increased by 24% to 1.9 million tons in 2016/17. Brazil's cotton production is forecast to increase by 8% to 1.4 million tons.

According to the Pakistan Cotton Ginner's Association, ginneries in Pakistan have received 9.778 million bales of cotton by December 01, 2016 compared to the total arrival of 9.768 million during the previous season.

According to USDA latest report, global 2016/17 cotton ending stocks are revised up this month. World 2016-17 cotton production is projected at 103.28 million bales, around 6.55 per cent above last season. World ending stocks are now projected higher at 88.31 million bales. For India, production is forecast at 27.00 million bales higher than previous month's estimates of 26.50 million bales and India's crop is estimated 2.27 per cent above 2015/16.

Outlook

We expect domestic prices to remain range bound to weak in the near -term.
