

Domestic Fundamentals:

Market Outlook: Cotton spot markets noticed mixed tone on Friday

In The News: As per the latest report published by USDA, India is expected to produce 28 million bales of cotton in 2017-18 which is 5.7% higher than the cotton produced last year in 2016-17.

The Indian govt. is planning to increase cotton MSP (Minimum Support Price) this year from Rs 3,860/quintal (medium staple cotton) & Rs 4,160/quintal (long staple cotton) in 2016-17 to Rs 4,020/quintal (medium staple cotton) & Rs 4,320/quintal (long staple cotton) in 2017-18.

In the 2016 -17 season, Indian cotton imports have touched an all time high of 30 lakh bales compared to 20 lakh bales previous season. Imports had touched an all time high of 25 lakh bales in 2001 -02 season. According to industry sources, farmers are expected to plant 20% more cotton in 2017 -18 season following good prices fetched during this season. The domestic and international market rates of cotton have been almost on par and most cotton mills in South India have found it feasible to import.

The govt. of India targeted a cotton crop production of 14.40 million bales in 2017-18 compared to the target of 14.1 million bales of production in 2016-17.

As per the latest report published by International Cotton Advisory Committee (ICAC), India's acreage area under cotton cultivation is expected to increase by 7% to 11.3 million hectares in 2017-18. While cotton production is projected to be around somewhat six million tonnes during the same duration. A higher cotton price and improved yield in 2016-17 has been the main contributing factors for the surge in acreage area under cotton cultivation in 2017-18.

On the other hand, India's cotton mill use is projected to increase by 2% to 5.2 million tonnes in 2017-18.

Cotton production this season has been 34 million bales compared to 33 million bales previous year. Though acreage was less, production increased amid higher productivity. In the coming season 2017 -18, cotton acreage is expected to increase amid better price realizations and normal monsoon. Exact percentage increase will be clear by the amount of rainfall during south -west monsoon. In Telangana and Andhra Pradesh, farmers are likely to shift towards cotton amid decline in price of pulses and chillies. Farmers in other cotton growing states of Gujarat, Maharashtra, Haryana and Rajasthan are also likely to shift from foodgrains to cotton according to initial reports. According to industry sources, around 10-15 per cent increase in cotton acreage is expected this season.

Textile sector seeks Technology Mission On Cotton (TMC) amid decline in yield of cotton. Though India is the largest producer and net exporter of cotton, productivity declined below 500kg of lint/hectare in 2015-16 from a high of 566 kg/ha in 2013-14. During the current season, productivity has been recorded at 568 kg/ha amid good monsoon. the national average yield in Australia, Brazil, China, Turkey Mexico and Israel is more than 1,500 kg/ha. India's poor productivity is related to obsolete technology and insufficient fund support for cotton research. The textile sector wants the TMC back in a revised format. It will help to double the income of the cotton farmer and fuel the growth of the textile industry.

India's textiles exports declined by around 4.5 per cent to \$26 billion during April-December this fiscal year. The exports of textiles during April -December (2016 -17) were recorded at \$26 billion compared to \$27.2 billion during the same period previous year.

International Fundamentals:

As per the latest report published by USDA, China is projected to produce 23.5 million bales of cotton in 2017-18 which is 3% higher than the cotton produced last year in 2016-17. While an increase in acreage area and improvement in yield could cause Pakistan to produce 8.5 million bales of cotton in 2017-18. Cotton production in Brazil and Australia too is projected to increase by 3% and 9% respectively in 2017-18.

In a bid to discourage imports and to promote domestic sowing and harvesting of cotton, the Pakistan govt. had re-imposed import duty of 4% & sales tax of 5% on import of cotton to the country that is going to get effective from 15th July, 2017.

According to the latest report published by International Cotton Advisory Committee (ICAC), world's cotton area is likely to increase by 5% to 30.8 million hectares in 2017-18. A higher cotton price in China and a stable cotton policy there, the area under cotton cultivation is expected to increase by 3% to 2.9 million hectares while cotton production is expected to increase by 1% to 4.8 million tonnes in 2017-18. While, U.S is expected to increase its cotton acreage area by 12% this year to 4.3 million hectares and its production is expected to lie somewhat around at 4 million tonnes.

On the other hand, as per the same report issued by ICAC; world cotton use is expected to increase by 2% to 24.6 million tonnes in 2017-18. Cotton use in China, which is amongst the largest consumer, is projected to increase by 1% to 7.7 million tonnes in 2017-18. Due to the various government initiative introduced to promote cotton export by Pakistan, the cotton use in the country is also expected to increase by 1% to 2.3 million tonnes in 2017-18. Mill use in Bangladesh is also projected to rise by 5% to 1.5 million tonnes in 2017-18.
