

Domestic Fundamentals:

Market Outlook: Cotton spot markets noticed range –bound to weak tone on Saturday.

In The News: According to the official figures, cotton has been sown on 12.18 lakh hectares as on June 02, 2017 across the country compared to 9.39 lakh hectares during the same period previous year. Acreage under cotton has jumped around 30 per cent as farmers in Haryana, Punjab and Karnataka have increased the area on better price during the previous season.

The sale of cotton seeds has picked up with sowing going on in full swing in the states of Punjab, Haryana, Rajasthan and some parts of Karnataka. According to the National Seeds Association of India (NSAI), cotton seed sales are likely to cross 5.5 to 6.5 lakh packs (each of 450 gms) this season.

Farmers are likely to increase the area under cotton amid expectation of good monsoon this season and higher price of cotton during the previous season, farmers. According to initial projections by the Central Institute of Cotton Research, Nagpur, the cotton area sown would be around 6 lakh hectares in Haryana (compared to 4.98 lakh hectares during 2016-17) and 4 lakh hectare in Punjab (compared to 2.56 lakh hectares in 2016-17).

Cotton output for 2016 -17 has been estimated at 340.50 lakh bales for the month of April, same as that of March according to Cotton Association of India. The projected balance sheet drawn by the CAI estimated total cotton supply for the season at 410.50 lakh bales, while the domestic consumption is estimated at 300 lakh bales, which will leave an available surplus of 110.50 lakh bales.

The Indian Council of Agricultural Research (ICAR)- Central Institute of Cotton Resarch (CICR) predicted India's cotton acreage area to rise by 7-10 per cent this year (2017-18) from 105 lakh hectares of land brought under cotton cultivation last year i.e. 2016-17.

As per the latest data released by Indian govt., cotton plantaion in the country rose by 32% as 8.93 lakh hectares of land has been brought under cotton cultivation till 19th May, 2017 compared to 6.75 lakh hectares of land cultivated last year during the same interval.

As per the latest report published by USDA, India is expected to produce 28 million bales of cotton in 2017-18 which is 5.7% higher than the cotton produced last year in 2016-17.

The Indian govt. is planning to increase cotton MSP (Minimum Support Price) this year from Rs 3,860/quintal (medium staple cotton) & Rs 4,160/quintal (long staple cotton) in 2016-17 to Rs 4,020/quintal (medium staple cotton) & Rs 4,320/quintal (long staple cotton) in 2017-18.

The govt. of India targeted a cotton crop production of 14.40 million bales in 2017-18 compared to the target of 14.1 million bales of production in 2016-17.

As per the latest report published by International Cotton Advisory Committee (ICAC), India's acreage area under cotton cultivation is expected to increase by 7% to 11.3 million hectares in 2017-18. While cotton production is projected to be around somewhat six million tonnes during the same duration. A higher cotton price and improved yield in 2016-17 has been the main contributing factors for the surge in acreage area under cotton cultivation in 2017-18.

On the other hand, India's cotton mill use is projected to increase by 2% to 5.2 million tonnes in 2017-18.

International Fundamentals:

According to the Cotton Board of Zambia, it is likely to produce 117,000 tonnes of cotton this year compared to 116,000 tonnes in the previous year. Though the number of farmers cultivating cotton declined by over 20,000 from 277,560, production increased amid favourable weather in the growing regions.

As per the latest report published by USDA, China is projected to produce 23.5 million bales of cotton in 2017-18 which is 3% higher than the cotton produced last year in 2016-17. While an increase in acreage area and improvement in yield could cause Pakistan to produce 8.5 million bales of cotton in 2017-18. Cotton production in Brazil and Australia too is projected to increase by 3% and 9% respectively in 2017-18.

According to the latest report published by International Cotton Advisory Committee (ICAC), world's cotton area is likely to increase by 5% to 30.8 million hectares in 2017-18. A higher cotton price in China and a stable cotton policy there, the area under cotton cultivation is expected to increase by 3% to 2.9 million hectares while cotton production is expected to increase by 1% to 4.8 million tonnes in 2017-18. While, U.S is expected to increase its cotton acreage area by 12% this year to 4.3 million hectares and its production is expected to lie somewhat around at 4 million tonnes.

On the other hand, as per the same report issued by ICAC; world cotton use is expected to increase by 2% to 24.6 million tonnes in 2017-18. Cotton use in China, which is amongst the largest consumer, is projected to increase by 1% to 7.7 million tonnes in 2017-18. Due to the various government initiative introduced to promote cotton export by Pakistan, the cotton use in the country is also expected to increase by 1% to 2.3 million tonnes in 2017-18. Mill use in Bangladesh is also projected to rise by 5% to 1.5 million tonnes in 2017-18.
