

Domestic Fundamentals:

Market Outlook: Cotton spot markets notices mixed tone on Friday.

In The News: According to the official figures, cotton has been sown on 122.59 lakh hectares as on September 29, 2017 across the country compared to 102.79 lakh hectares during the same period previous year.

In its first advance estimate, the agriculture ministry of India projected the country to produce 32.3 million bales of cotton in 2017-18 which is 2.12% lower than the cotton produced last year in 2016-17.

On the back of favorable weather conditions and lucrative expected returns, rating agency, ICRA projected India to produce 36 million bales of cotton in 2018, up by 6 per cent from the previous year.

The Cotton Association of India projected India's cotton export to decline by 17% to 6 million bales in 2016- 17 due to the appreciation of Indian rupee this year, which makes the Indian cotton less lucrative for the foreign importers.

Provided a normal monsoon this year, the Cotton Association of India projected india's cotton production to rise by 11.4% from 34.1 million bales in 2016-17 to 38 million bales in 2017-18

The Indian govt. had increased cotton MSP (Minimum Support Price) for long staple cotton from Rs 4,160/quintal in 2016-17 to Rs 4,320/quintal in 2017-18.

As per the latest report published by USDA, India is expected to produce 6.09 million Tonnes of cotton in 2017-18 which is 5.7% higher than the cotton produced last year in 2016-17.

The sale of cotton seeds has picked up with sowing going on in full swing in the states of Punjab, Haryana, Rajasthan and some parts of Karnataka. According to the National Seeds Association of India (NSAI), cotton seed sales are likely to cross 5.5 to 6.5 lakh packs (each of 450 gms) this season.

Farmers are likely to increase the area under cotton amid expectation of good monsoon this season and higher price of cotton during the previous season, farmers. According to initial projections by the Central Institute of Cotton Research, Nagpur, the cotton area sown would be around 6 lakh hectares in Haryana (compared to 4.98 lakh hectares during 2016-17) and 4 lakh hectare in Punjab (compared to 2.56 lakh hectares in 2016-17).

The Indian Council of Agricultural Research (ICAR)- Central Institute of Cotton Resarch (CICR) predicted India's cotton acreage area to rise by 7-10 per cent this year (2017-18) from 105 lakh hectares of land brought under cotton cultivation last year i.e. 2016-17.

The govt. of India targeted a cotton crop production of 14.40 million bales in 2017-18 compared to the target of 14.1 million bales of production in 2016-17.

International Fundamentals:

According to the latest report published by International Cotton Advisory Committee (ICAC), world's cotton area is likely to increase by 9% to 31.9 million hectares in 2017-18.

ICAC also projected global cotton production to rise by 9% from 23.07 million tonnes in 2016-17 to 25.14 million tonnes in 2017-18. Wherein, China, U.S and Pakistan are projected to produce 5.2 million tonnes, 4.5 million tonnes and 2 million tonnes of cotton respectively.

As per the latest USDA report, global cotton production is expected to rise by 8.25% from 23.08 million tonnes in 2016-17 to 24.98 million tonnes in 2017-18; wherein China, U.S , Pakistan and Brazil are expected to produce 5.23 million tonnes, 4.18 million tonnes, 2.03 million tonnes and 1.52 million tonnes of cotton respectively in 2017-18.

According to the latest figures by International Cotton Advisory Committee (ICAC), global cotton output is estimated at 25.4 million metric tonnes compared to previous month's estimates of 25.14 million metric tonnes. The rise in output is due to higher cotton prices during 2016/17 and better cotton price ratios to other competing crops during the 2017 planting campaign, which has led the cotton area to increase by an estimated 3million hectares to over 32million hectares.

On the other hand, as per the same report issued by ICAC; world cotton use is expected to increase by 2% to 24.6 million tonnes in 2017-18. Cotton use in China, which is amongst the largest consumer, is projected to increase by 1% to 7.7 million tonnes in 2017-18.
