

**Domestic Fundamentals:**

**Market Outlook:** Cotton spot market prices were noticed weak tone on Monday.

**In The News:** The Cotton Association of India (CAI) has, in its latest estimate, lowered the crop size by 8 lakh bales (of 170 kg each) to 367 lakh bales against the earlier estimate of 375 lakh bales. For the 2017-18 season, beginning from October 1, 2017, the CAI reduced the crop estimate to 367 lakh bales citing severe infestation of cotton with pink bollworm.

The projected Balance Sheet drawn by the CAI estimated total cotton supply for the season at 417 lakh bales of 170 kgs. each including the opening stock of 30 lakh bales at the beginning of the season and the imports which the CAI estimated at 20 lakh bales for 2017-18 crop year. The domestic consumption is estimated to be 320 lakh bales while CAI estimates exports for the season to be 55 lakh bales. The carry over stock at the end of this season on 30<sup>th</sup> September 2018 is estimated to be 42 lakh bales.

Since the introduction of Bt cotton in 2002, there has been a near doubling of cotton production in the country from 158 lakh bales in 2001-02 to 351 lakh bales in 2016-17, and increase in productivity from 308 kg/ha in 2001-02 to 568 kg/ha in 2016 17.

Higher demand for better grades of cotton kept market sentiments firm while better grades of cotton getting a premium price during trading sessions at leading stations of cotton market in India.

The government today increased import duties on certain crude and refined vegetable oils like cotton seed oil, olive oil and groundnut oil, to 30-35 per cent to check shipments. Import duty on crude edible vegetable oils like groundnut oil, olive oil, cotton seed oil, safflower seed oil, saffola oil, coconut oil, palm kernel/babassu oil, linseed oil, maize corn oil, castor oil, sesame oil, other fixed vegetable fats and oils has been raised from 12.5 per cent to 30 per cent.

Cotton yield in Gujarat may take a 15% hit this year due to the pink bollworm pest attack. The average per hectare yield of cotton in the state is estimated to fall from 510-520kg a hectare to 480kg a hectare.

Cotton acreage in Gujarat increased to 26.42 lakh hectares in the kharif season of 2017-18 from 24.04 lakh hectares in the previous season.

Maharashtra is one of the top producers of cotton has lowered its estimate of production in 2017-18 to 6.0 mln bales from 9.5mln bales projected in the first advanced estimate due to sharp fall in yields. 2016-17 4<sup>th</sup> advance estimates 10.6 mln bales.

Market arrivals of cotton in the first three months of current cotton season are higher by around 43% compared to the same period a year ago.

So far, about half of the crop, nearly 165 lakh bales, has already arrived in the market. The exports have crossed over 22 lakh bales. Going forward, the quality issues may crop up and prices may firm-up further. However, all eyes are on the upcoming Budget anticipating some boost for the textiles sector, which can push up the cotton demand.

With steady arrivals, kapas prices at Gujarat markets hovered around Rs 1,030 -1,050 per 20 kg or Rs 5,150-5,250 per quintal. The prices corrected marginally from the peak of Rs 5,500 on increased arrivals. In other markets of Telangana, Karnataka and Maharashtra, the prices are hovering between Rs 4,800 and Rs 5,200. Ginned cotton prices hovered at Rs 41,800 per candy of 356 kg, which is about Rs 700 lower than what was seen a month ago.

### International Fundamentals:

The 2017/18 U.S. cotton supply and demand forecasts show slightly lower exports and higher ending stocks relative to last month. Production and domestic mill use are unchanged. The export forecast is lowered 300,000 bales to 14.5 million, based on a lagging pace of shipments to date. Ending stocks are now estimated at 6.0 million bales, equivalent to 34% of total disappearance.

The 2017/18 world cotton forecasts include slightly higher production, lower consumption and higher ending stocks. World production is 400,000 bales higher than last month, as higher estimates for China, Brazil and South Africa offset lower expectations for India and Australia. Global consumption is forecast 325,000 bales lower, as decreases for India and Thailand offset an increase for Vietnam.

World ending stocks are projected 760,000 bales higher, as a 1.1-million-bale increase in China's projected ending stocks – and higher U.S. stocks – offsets declines for India, Australia, Turkmenistan, Tajikistan and Vietnam.

Vietnam imported 140,000 tons of cotton worth 244 million U.S. dollars in January, up 49.7 percent in volume and 51.1 percent in value against January 2017. Vietnam, whose yarn industry heavily depends on imported cotton, has imported increasingly bigger volumes of the material in recent years to feed its growing textile and garment production and export, noting that its biggest cotton import market is the United States, tailed by India, Australia, Brazil and Cote d'Ivoire.

Global cotton production is increasing at a faster rate. Current estimates for the season have production at 25.5 million tons and consumption at 25.4 million tons. Production increases are coming off the gains in planted area rather than yields this season. Global average yield for 2017/18 is currently being estimated at 773 kilograms per hectare, a 1% decrease from the previous season with a 12% growth in planted area. India and Pakistan, with estimated area increases of 16% and 24% respectively, encountered production losses from pink bollworm this season.

Global trade is projected at 8.2 million tons this season. Leading importers include Bangladesh and China with an estimated 19% and 16% of global share respectively. East Asia's volume of imports continues to increase and could represent approximately 36% of global share or 2.95 million tons. The USA will continue to lead all exporters in 2017/18 with 39% of the global share and 3.2 million tons. Australian exports in 2017/18 are projected to continue growing reaching 944,000 tons and accounting for 11.4% of global share. India, despite a lower than expected production is projected to export 935,000 tons.
