

Domestic Fundamentals:

Market Outlook: Most of Cotton spot markets were closed due to Mahaveer jayanthi and Good Friday.

In The News: India will export 65-70 lakh bales of cotton in the ongoing season 2017-18 amid aggressive demand from neighbouring countries like Bangladesh and Pakistan. Apart from the neighbouring countries, India has also been receiving demands from several other countries, including Vietnam, Indonesian and Turkey.

In the early six months of this cotton production and marketing season 2017-18 (October-March), India has sold 55 lakh bales of cotton, of which 17 lakh bales have been shipped to Bangladesh followed by 11 lakh bales to Pakistan, 10 lakh to Vietnam, seven lakh to China, 7 lakh to Indonesia and Taiwan, and 3 lakh to other countries including Sri Lanka, Turkey and Thailand, among others," the CAI chief told IANS.

NCDEX market closed today due to Mahaveer jayanthi so, trade was very thin not price auction is witnessed.

Cotton prices are expected to remain firm, rating agency ICRA in its report said domestic demand has started showing signs of improvement because transition of GST and changes in export incentives structure subsiding.

Bathinda Deputy Commissioner Diprava Lakrahe said that for 2018, the government aimed at bringing 1.10 lakh hectares of land under cotton cultivation as compared to 99,000 hectares last year. Similarly, last year the cotton yield per hectare was 850 kg lint, which is now being targeted at 860 kg lint per hectare, he added.

Indian cotton exports were 183kt in Feb 2018, down 13.3% month on month, but up 45.2% year on year and the accumulative exports in 2017/18 (from Aug 2017 to Feb 2018) were 822kt, an increase of 6.6% year on year. In the first two months of 2018, exports totaled 394kt, up 7.2% year on year.

In Feb 2018, cotton imports in India were 17kt, an upswing of 37% year on year and 8.3% month on month. From Aug 2017 to Feb 2018, imports totaled 182kt, down 46.1% year on year and in the first two months of 2018, imports amounted to 32kt, up 27.1% year on year.

CCI around 400000 bales of cotton were procured under the MSP operations while the remaining 800000 bales were for commercial operations.

Maharashtra has made it mandatory for Bt cotton seed companies in the state to submit seed samples, which they wish to sell in market, to government-approved laboratories for getting them tested in order to obtain to sale licenses. The step has been taken to prevent the sale of illegal varieties in the market, according to Director of agriculture, inspection and quality control.

The reduction in planting area could cut into export supply from India and further bolster global cotton prices, which earlier this month hit their highest since June 2014. "We are expecting lower sowing in Maharashtra and Telangana due to pink bollworm attacks. Many farmers in these states are likely to switch to other crops like soybeans," said Atul Ganatra, president of the Cotton Association of India (CAI).

Today Cotton (Long staple) in Adoni is trading at Rs.5150/quintal. We expect that prices may not fall much further from current levels.

Cotton planting in India, the world's top producer of fiber, could fall 12 per cent in the 2018-19 crop year as infestation by the pink bollworm has slashed farmers' incomes and prompted them to choose other crops, industry officials said.

U.S. all-cotton production in 2017-18 projected down 140,000 bales from USDA's latest estimate and exports up 390,000 bales ahead of the monthly supply-demand reports.
