

## Domestic Fundamentals:

**Market Outlook:** Cotton spot market prices were noticed weak on Wednesday.

**In The News:** Cotton prices are likely to remain steady during June-October 2018 due to very tight financial situation prevailing in the spinning sector and comfortable availability of quality cotton, according to the Indian Cotton Federation here.

Bangladesh has emerged as the biggest importer of Indian cotton this season. It imported around 21 lakh bales of cotton from India overtaking China, which was largest importer of Indian cotton until now.

So far, India has exported 15 lakh bales of cotton to China. As per data provided by CAI, the country has contracted 15-20 lakh bales for exports to China. Following the trade war with the US, China has imposed tariffs on import of cotton from the US. Cotton is one of the 106 US goods on which Beijing has imposed up to 25% tariffs.

According to trade sources, in the past three months, the export price of India's 30S pure cotton yarn has risen by 2%, while the export price of Pakistan's cotton yarn with the same quality has decreased by 1.7%. In the coming weeks, it's expected that the price of cotton yarn will not be lowered due to the support of high level cotton prices.

Cotton exports surged 151% in March with shipment of 12.5 lakh bales (170 kg) as against just less than 5 lakh bales exported in March 2017. The first six months of 2017-18 cotton marketing year shipment aggregated 5.66 million bales as against 4.82 million bales in the corresponding months of previous marketing year.

Cotton Corporation of India (CCI) has purchased 11 lakh bales of cotton so far this cotton season (October to September) and sold four lakh bales.

India's cotton exports may touch 7 million bales this marketing year, a rise of 27 per cent over the earlier estimate due to a surge in demand, mainly from China, as Indian cotton is selling at discount, says the Cotton Association of India (CAI).

According to trade sources, With Indian cotton selling at discounts of 7-10 cents per pound, there is demand for all qualities of cotton.

The area under Cotton cultivation in India likely to go down by 10-15% this year as farmers are expected to shift to Soyabean that gives better returns and because of the risk of pink bollworm attack, industry sources said.

Cotton Association of India has released its March estimate of the 2017-18 crop year beginning from 1<sup>st</sup> October 2017-18. In this latest estimate, the CAI has estimated cotton crop for the ongoing 2017-18 season at 360 lakh bales of 170 kgs. each, which is lower by 2 lakh bales – one lakh bales each in the states of Maharashtra and Karnataka

90% cotton crop has arrived in the markets and new crop season already set in, the estimate for cotton arrival has been lowered fifth time for Punjab. On other hand, the estimates have been revised upwards in the neighbouring states of Haryana and Rajasthan.

Cotton in Australia estimates there were 372,000 hectares of irrigated cotton planted this season and 81,000 green hectares of dry land, giving total Australian crop of 453.000 ha.
