

Domestic Fundamentals:

Market Outlook: Cotton spot market prices edged lower over lack of demand at higher levels. US Cotton No 2 futures is trading flat with marginal gains as the market waits for fresh fundamentals. MCX Cotton 29 mm futures is trading high as the sowing is low in Haryana and Punjab at the end of peak sowing season.

In The News:

Sowing progress in Haryana is off mark and With ideal time for sowing already over by more than a week, Haryana has so far been able to achieve only 76 per cent of its target of cotton sowing. As on May 22 cotton had been sown on 4.97 lakh hectares against the target of 6.48 lakh. The sowing is low in Punjab as well as Haryana due to lower supplies of water in canal.

The BT cotton seed demand is not going to be impacted after recent rows of Monsanto with GOI. The substitutes is not readily available and farmers are more comfortable with BT seeds.

Maharashtra is ginners and pressing bales association are aggressively extension services to contain the pink boll worm attack after seeing Gujarat effectively managing the menace. The ginners association is availing help from major cotton institutes, including the South Asia Biotechnology Centre (SABC). We can expect better yield if the pest is managed properly.

At the demand prospects with Pakistan mulling over importing 20000 tons of cotton from Afghanistan, Indian exporters may face a setback. However aggressive imports demand from Bangladesh is expected to overshadow any fall in demand. Overall we can still expect year on year higher exports at the end of cotton season.

Pakistan is India's one of the major importers of cotton. The Pakistan govt lifted ban on Indian cotton last year after brief period of ban on political tensions. Pakistan is expected to import 460 thd bales in July and August. In 2017-18 Pakistan has imported 3.2 million bales. The annual requirement is around 15 million bales whereas production is around 10 million bales.

All India arrivals remain 50,000 to 60,000 bales per day. With limited arrivals ginners are willing to close mills for the season.

looking at the cotton arrival pace of around 45 k daily and also CAI report of 311 lk till 30 April i assume May arrival to be 15-16 lk bales and also reports coming from most of the cotton growing states that crop is coming to end.

Karnataka is targeting kharif cotton output of 1,541,000 bales in 2018-19 (Jul-Jun), higher than 1,178,000 bales produced a year ago, an official with the state farm department said.

International Fundamentals

In Pakistan the sowing of new season has been very slow due to lack of water. By end of mid may the sowing has been completed only in 1 third of the intended area. As per Pakistani officials the cotton was sowed on about 1.07 million hectares against the national target of 2.95 million hectares, showing progress of nearly 35 percent. In Punjab, cotton was sowed on only 31 percent of 2.31 million hectares, which was over 41 percent area planted in the corresponding period of last year. Cotton sowing should ideally be completed by mid-May in Sindh and by the end of the month in Punjab. Otherwise, cotton plants are susceptible to heat waves and attack of diseases, insects, and pests, which can impact yield.

The ministry of agriculture has set a target of producing 14.37 million bales from an area of 2.95 million hectares. Due to lower snow in the winter season the Indus river canals system is facing one of the worst water scarcity this season.

In US too there has been severe drought conditions despite of recent rains. However supportive prices are expected to witness acreages reaching to around 13.5 million acres a high by 7% from last year, but the same might not reflect in production due to yield compromise over drought conditions. The latest U.S. Drought Monitor showed nearly 13 percent of Texas is facing extreme drought. 4.6 percent is seeing exceptional drought, and the majority of that is parked in West Texas and the Panhandle.

China sold 30002.91 tons average price at 15385 Yuan/ ton, up 546 Yuan/ ton from previous day.

One of the world's largest cotton exporters, Uzbekistan is looking at Indian textiles companies for a possible collaboration. The former Soviet republic is likely to ink an agreement with the Union Textiles Ministry in this regard.

In US the planting has been done in 36% of the intended planting acreages ahead of 31% of last year and 5 year average as on 13th May. Last week rains in the South US region bettered the prospects of fast sowing of the season's cotton crop. This year the cotton acreages is expected to be up by 7% against last year and 35% up from 2016. Kansas, Oklahoma and Texas are projected to increase cotton acres this year by 40%, 16% and 6%, respectively. In its March Prospective Plantings Report, the USDA is estimating there will be 13.5 million acres of cotton. This is due to lower grain prices, lower availability of water and cotton re-entry in farm bill. In response the ginneries are expanding capacity in US.

China sells 18,200 tonnes of cotton at auction of state reserves at average price of 14,450 yuan (\$2,280.76) per tonne, according to industry website cncotton.com. Sale represents 60.74 percent of total cotton available at the auction.

In Pakistan, Punjab Agriculture Department has asked farmers to grow cotton on maximum area as its demand is set to increase in 2018-19 due to various factors. In Pakistan sowing is underway amidst the shortage of irrigation water.

Turkey is considering stopping imports of US cotton and explores new markets for its cotton requirements including from India, Pakistan, Uzbekistan and Egypt after US imposed heavy duty on the iron rod angles from Turkey.

The government of Pakistan has allocated Rs 2.5 billion to boost the production of cotton in the country during the financial year 2018-19. The government is working towards using all the available resources to improve the agriculture sector as well as the financial condition of farmers and other involved in the industry.
