

Domestic Fundamentals:

Market Outlook: Cotton spot market prices were noticed firm tone on Friday. Expected to trade in the range of 5800 to 6400 for next few weeks.

In The News: In Rajkot market, arrivals were reported around 250 quintals per day, as compared to last week's 330 bags. Market about to close by end of July due to limited arrivals.

Cotton prices traded firm on a slow new crop planting pace and better demand for current crop in domestic as well as international. Cotton prices in Adoni market traded firm at Rs.5,500-6,189 per quintal. However, the prices are significantly higher than Rs.5,000-5,800 during same period last year.

Telangana cotton association says ginner from Telangana won't participate in CCI job work tender unless the newly introduced clause is abolished. New clause says that ginner is bound to give minimum 33% lint and maximum 2% trash in cotton procured by CCI.

Cotton planting is expected to hasten in Maharashtra as excess moisture in Marthwada (27% higher than normal rains) and Vidarbha (11 % higher than normal rains) will prompt farmers to plant greater area with cotton. Additionally farmers indicate land is being prepared for sowing of tur and soyabeans.

Cotton getting supported due to global strength and lower domestic sowing area. Technical set up for near term turning strong. Possible upside this week will be 23000-400.

All India arrivals remain 7000 to 10000 bales. With limited arrivals most ginning mills are closed.

In India, cotton has been sown in around 50.40 lakh hectares as of 06th July 2018 which is lower than 71.82 lakh hectare covered during corresponding period last year. In Punjab, it has been sown in 4.43 lakh hectare which is lower than 4.61 lakh hectare covered during corresponding period last year. Similarly, in Gujarat, it has been sown in 4.93 lakh hectare which is lower than 12.68 lakh hectare covered during corresponding period last year. And in Andhra Pradesh, it has been sown in 0.79 lakh hectare which is lower than 2.44 lakh hectare covered during corresponding period last year. Cotton acreage has been declined in major producing states due to delay in monsoon and the effect of pink bollworm during 2017-18.

Adoni cotton market was closed past one week as traders are opposing new norms laid down by market committee. As per the new norms, market fee must be paid every week as against the existing norm of paying the fee once in a month.

Cotton Corporation of India running cotton operation and upcoming season 2018-19 CCI **May buy bulk from farmers.**

Higher cotton prices are expected to support cotton output, not just in India but across the world. Increase in cotton output becomes increasingly relevant amid rising concerns on a global demand-supply situation, with a sharp increase in import demand from China likely over the next two-three years.

Monsoon Update:

The nationwide rainfall deficit in the season stands at 9%, with the monsoon 16% below normal in the first 10 days of July. UP and Gujarat received just about half the normal rainfall so far, while deficits have opened up in east and northeast India. The south and many parts of central India though have been receiving bountiful rains.

International Fundamentals

The U.S. 2018/19 cotton projections show lower production, exports and stocks compared with last month. The 1.0 million bale decrease in the crop projection (from 19.5 million bales in June to 18.5 million in July) is due to higher expected abandonment, based on current conditions. Beginning stocks are 200,000 bales lower due to an increase in 2017/18 exports. 2018/19 exports are reduced 500,000 bales based on lower supplies and increased foreign competition. With no change in domestic consumption, 2018/19 ending stocks are projected at 4.0 million bales, down 700,000 bales from the June estimate and unchanged from the revised 2017/18 level. The midpoint of the projected range of the marketing year average price is raised 5 cents from last month, to 75 cents per pound.

Historical revisions to China's consumption back to 2014/15 account for most of a 3.3-million-bale decline in 2018/19 world beginning stocks. World 2018/19 consumption is 1.6 million bales higher than in June, as the revisions to China's consumption estimates carry through into the 2018/19 projection year with a 1.0-million-bale increase. Consumption forecasts are also higher for Bangladesh, Pakistan, Brazil, and Vietnam.

World production is projected 290,000 bales lower than in June, as reduced U.S. and Australian production more than offsets increases for Brazil, India and Mexico. World trade is projected 165,000 bales higher this month, as lower U.S. exports are more than offset by increases by Brazil and China. Ending stocks are 5.2 million bales lower than in June, with the largest declines in China (4.6 million) and the United States. India's and Brazil's ending stocks are forecast higher.

The International Cotton Advisory Committee has marginally slashed the estimate for global ending stocks for 2018-19 to 17.8 mln tn due to robust increase in consumption. In its monthly report, released last week, the committee said the global consumption of cotton is projected to grow 5% on year to 27.4 mln tn. It has also raised the estimate for cotton output for 2018-19 to 25.9 mln tn, up 0.18 mln tn on month. With consumption expected to outpace production in 2018-19, global stocks are expected to decrease to 17.8 mln tn," the report said. The revised number is 70,000 tn lower from its June estimate. The committee said cotton output in the US and India is expected to decline on year in 2018-19, but fall will be more than offset by a rise in Brazil.

The Pakistan Federal Board of Revenue has withdrawn duty exemption on import of cotton. A notification SRO847 issued on last week stated the exemption facility will be **ineffective from July 15, 2018**. Since Jan 8, the government has exempted 5pc sales tax and 4pc customs duty on import of cotton through a notification SRO48 of 2018. The exemption was withdrawn to give benefit to local growers
