

### Domestic Fundamentals:

**Market Outlook:** Cotton prices are expected to Range-bound. Due to improving acreage and weather conditions in top cotton growing states - Gujarat and Maharashtra and incidence of pest attack and increase in MSP by government may keep the prices supported going ahead. NCDEX Oct Cotton prices traded firm compared to previous day.

**In the News:** Cotton prices in the domestic market have firmed up on reports of lower carryover stocks in the coming season and the lower crop estimates by most cotton bodies in the state. Cotton prices are currently in the range of Rs 47,000 to Rs 48,000 per candy and, according to traders, if the rupee continues to fall, prices of cotton are likely to go up further.

**Cotton prices traded firm with limited selling and buying selling activity.** New crop total cotton acreage advanced to 118.10 lakh ha compared to 120.98 lakh ha, at the same period last year. An increase in acreage is seen in the states of Gujarat and Madhya Pradesh. In all likely new crop arrival start from 15/20 Sep from north India followed by some parts of Gujarat and Maharashtra.

**This kharif cotton harvest season is set to begin on strong price not when compared with last year.** Coupled with lower carry over stock and better export prospects, cotton prices have firmed up in the domestic market. As on last Friday, prices in the domestic market hovered around Rs 22,400 for a bale of cotton this is more than Rs 2000 higher from 20250 on the same day last year. Similarly, on the NCDEX of India, cotton prices were at Rs 22800 per bale of the Oct contract. Future price is remained higher by about Rs 3500 per bale from last year levels.

**Gujarat Cotton prices of 29 mm remained between 48,100 to 48,350 Rs./Candy.** Outstate arrivals almost ended. All India Daily Arrivals remained 2,000 to 2,500 bales. Gujarat Daily Pressing was approximately 500 bales. NY December futures w/w gain 0.59 cents. As merchants are selling in physical market, supply side got enough liquidity into market. During this week rupee was weaker against dollar.

**Gujarat is India's largest cotton producer, accounting for 108 lakh bales (of 170 kg each) out of the total 365 lakh bales of lint output in 2017-18.** Within Gujarat, over 70 per cent of production is from the Saurashtra region. This year, cotton acreage in the state has risen to 27.03 lakh hectares (lh), compared to 26.17 lh in 2017-18. Of the 27 lh, 19.26 lh has been sown in the 11 districts of Saurashtra as on 03-Oct-2017

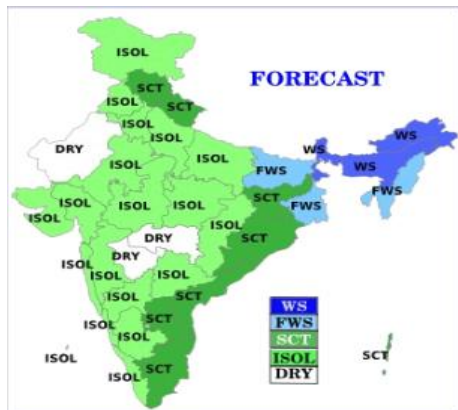

**The reports of pink bollworm infestation in cotton growing areas of Maharashtra,** state government has released Rs 16.97 crore to check the infestation. Depending upon the extent of pink bollworm infestation, aid from this amount will be released to respective cotton growing districts in the state.

**The apex cotton trade body, the Cotton Association of India (CAI), will ink an agreement with the BSE to develop a cotton futures market for commodities derivatives trading in the BSE.** Announcing the signing of a Memorandum of Understanding (MoU) with the BSE, CAI said the two bodies will join hands to work together on developing a cotton futures contract for BSE's commodity derivatives segment.

**The Cotton Corporation of India (CCI) has signed a memorandum of understanding with the Central Warehousing Corporation** to use its warehouses for cotton storage. CCI purchased 3.6 lakh bales of cotton at MSP during the current cotton season. With the steep hike in MSP, the CCI might have to purchase huge quantities next season. During the current season CCI used 170 warehouses across the country, including those, of CWC, state government and private facilities.

**As per Commerce ministry data, cotton exports in June surged by 27.6% to 570,000 bales (170 kg each) as compared to last year. India is likely to export 7 million bales of cotton in 2018/19 with China alone accounting for 30-40 percent, down 15% from an earlier estimate of 8 million bales due to low crops.**

### Weather Update:

**12<sup>th</sup> Sep:** Heavy to very heavy rain at isolated places very likely over Sub Himalayan West Bengal & Sikkim, Arunachal Pradesh, Assam & Meghalaya and heavy rain at isolated places over Bihar, Gangetic West Bengal, Nagaland Manipur Mizoram & Tripura, Coastal Andhra Pradesh, Tamilnadu & Puducherry and Rayalaseema.

Overall, the monsoon till August 30 has been 6 per cent less than normal, with several districts of north interior Karnataka, Rayalaseema, Bihar, Jharkhand, Saurashtra and Kutch staring at a shortfall. The rainfall, according to

SPATIAL DISTRIBUTION (% of Stations reporting)			
% Stations	Category	% Stations	Category
76-100	Widespread (WS/ Most Places)	26-50	Scattered (SCT/ A Few Places)
51-75	Fairly Widespread (FWS/ Many Places)	1-25	Isolated (ISOL)
Dry (No station reported Rainfall)			

agriculture ministry officials, has been well-distributed, though overall quantum might have been low in some regions. This they said won't have any impact on the

overall production of kharif crops in 2018, which is poised for another record.

### International Fundamentals:

**September 11th, the China reserve sales of reserve cotton was 30000.4579 tons, the actual turnover was 25642.7037 tons, and the turnover rate was 85.47%. The average transaction price was 15021 yuan/ton (up 273 yuan/ton from the previous day); discount 3128 price 16505 yuan/ton (up 201 yuan/ton from the previous day). From March 12 to September 11, the cumulative turnover of reserve cotton was 2,266,800 tons, and the turnover rate was 58.56%.**

**Uzbekistan has planned to stop the export of cotton fiber and to ensure its full processing in the domestic market by 2025, RIA Novosti reported referring to Head of the Department of Strategic Forecasting of UzTekstilProm (Uzbek Textile Industry). According to her forecasts, in 2018, the industry will be able to process about 520,000 tons of cotton fiber with the current design capacity of 720,000 tons. Every year, the country produces about 3.5 million tons of raw cotton and 1-1.2 million tons of cotton fiber. About 50 percent of the produced cotton fiber is exported.**

**Vietnam spent more than US\$2 billion on importing cotton in the first eight months of 2018 – the biggest amount ever spent by the garment and textile sector. Of the total, imports from the US exceeded \$1 billion, according to the General Department of Vietnam Customs. The increase in spending on cotton imports was attributed to growth in garment and textile exports, as Vietnam depends on nearly 100 per cent imported cotton materials. It estimates it will buy more than \$3 billion worth of cotton this year, up \$700-800 million against the previous year. The country has also set a target of earning \$34-35 billion from garment and textile exports. Last year, the textile and garment industry gained a year-on-year increase of 10.23 per cent in export value to \$31 billion, beating its target set at the beginning of the year of \$30 billion.**

**China Cotton Association released its latest 2018/19 crop forecast at 6.01 million tons, up 60,000 tons from last month and versus USDA's August estimate at 5.77 million, while other industry sources are pointing to an even higher crop. Favorable moisture with warm weather are benefiting the crop and improving cotton yields across Xinjiang.**

**MY 2018/19 cotton area forecast to 11.8 million hectares, 100,000 hectares lower than the official USDA estimate. The reduction in area is primarily in the two major cotton growing states of Gujarat and Maharashtra. Deficit rains and pest pressures have prompted farmers to either plant alternate crops, or delay/abandon planting altogether**

***This month's 2018/19 U.S. cotton forecast includes higher beginning stocks, production, exports, and ending stocks relative to last month. Production for the 2018 crop is raised 4 percent to 19.2 million bales, on this season's first survey-based production forecast. Beginning stocks are raised 0.4 million bales due to lower-than-expected 2017/18, exports are 0.5 million bales higher, at 15.5 million bales. Ending stocks are 0.6 million bales higher this month. Projected world 2018/19 ending stocks are down 1 percent this month, due to a combination of lower beginning stocks and higher consumption offsetting higher production. Beginning stocks are reduced 0.45 million bales, reflecting both lower production and higher consumption estimates for 2017/18. Production in 2018/19 is increased 0.4 million bales, with higher expected crops in the United States, Argentina, and Turkey offsetting reduced crops in Uzbekistan, Australia, and Turkmenistan. Consumption is raised 660,000 bales, led by a 300,000-bale increase for Pakistan, with smaller increases in Indonesia, Turkey, and other countries.***
