

## Domestic Fundamentals:

### **Market Outlook:**

*Demand for cotton is likely to remain robust in the coming months, both in domestic and international markets. This along with minimum support price hike is likely to keep cotton prices firm. Also, China is expected to purchase large quantities of cotton from India, replacing US as its largest source of cotton which is expected to keep the prices into next season supported.*

***In the News: Cotton prices traded slightly weak in major producing centers such as Punjab Madhya Pradesh and few parts of Haryana owing to rising supplies.*** Sources revealed that the progressive all India new cotton crop arrivals reached 2.70 million bales till 31 October 2018. Higher arrivals are witnessed from Northern Indian states due to favorable weather. Dry weather in the Maharashtra and Gujarat states during September-October month could impact on yield prospects.

***Gujarat Cotton prices of 29 mm sold between 46,000 to 47,200 Rs./Candy during a week.*** Outstate arrivals of new Crop Kapas from Madhya Pradesh and Maharashtra have started in good quantities now. All Indian arrivals are picking up very fast and market adjusted to new season rates between 46,000 -47,000. Highest arrival is in north India so north cotton rate are more competitive.

***The Chinese are substituting their cotton imports from US with India.*** India's cotton exports to China may see a fivefold jump to 4 million bales in the marketing year 2018-19 starting Oct 1 against 0.8 million tonnes in 2017-18, after China slapped a 25% additional duty on imports of the fibre from the US. India's forward export contracts of cotton have more than doubled from about 7 lakh bales in Sep 2017.

***Last night in New York futures market, December Future 2018 contract closed at 86 cents per pound, while March Futures 2019 contract closed at 86.15 cents per pound*** and Cotlook A Index settled at 86 cents per pound. Indian cotton prices are 10 per cent lower than international prices. The 26-28 per cent raise in minimum support price for cotton for the season and more area under cultivation are expected to yield more.

***As per reports from many Cotton Experts, the Indian Cotton Crop is very low. Due to poor rains, the cotton plant height across India in major parts is maximum 1-1/2 ft to 2 ft only.*** Usually in a normal crop, it should be about 4+ ft. There will hardly 2 pickings of good cotton. This will end by December itself... From January, the 3rd and 4th picking will start and it will be 27mm only.

***Cotton prices traded steady across major trading centers. Gujarat 29mm cotton traded around INR 47'000 per candy equivalent to US Cents 83.50 per lbs FOB Mundra for prompt delivery.*** Daily arrivals stood at 70'000 bales and are expected to gather pace from Mid-November onwards. The Indian rupee vs. the US dollar stabilized in the range of 73.15 to 74.00.

***Cotton arrivals declined significantly in Maharashtra, the second-largest producer of the fibre crop, forcing ginning mills to operate at less than 30 per cent capacity as farmers held back stocks on expectations prices will rise.*** The daily all-India cotton arrivals are currently at 75,000 bales to 80,000 bales of 170 kg each, according to Atul Ganatra, president of the Cotton Association of India. However, cotton arrivals in Maharashtra have been ruling low at about 7,500 bales per day against the normal daily arrival of about 15,000 bales a day around this period of the year.

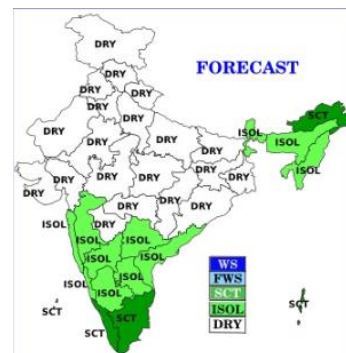

***At this time All India Cotton Ginner getting disparity about 1000-1500 Rs Per candy due to high price of raw cotton and High moisture.*** Most of the cotton ginner running there ginning unit on slow motion (8-12 hrs. Or 3 days a week). All India Spinning Mills getting disparity about 5-8 Rs. Per kg. Minimum due to high cotton price and very limited demand of cotton yarn. Due to less yarn demand in domestic and overseas most of the Spinners also running there spinning mill

at low speed (16500 rpm) so cotton consumption demand being very limited. Major Spinners buying limited cotton buying as per their daily needs so there is no buying support at this cotton price level.

### Weather Update:

5<sup>th</sup> Nov ♦ No weather waning.

The weather pattern's possible emergence and its impact on the north-west monsoon is an annual cause of concern for policymakers in India, where 60% of the crop area lacks assured irrigation. The summer-sown Kharif crop, which accounts for half of India's foodgrain output, is particularly dependent on monsoon rainfall. El Nino is part of a natural process, characterised by a warming in the Pacific Ocean, with repercussions across the globe, including higher temperatures and drought in some parts.

### International Fundamentals:

**The Chinese are substituting their cotton imports from US with India.** India's cotton exports to China may see a fivefold jump to 4 million bales in the marketing year 2018-19 starting Oct 1 against 0.8 million tonnes in 2017-18, after China slapped a 25% additional duty on imports of the fibre from the US. India's forward export contracts of cotton have more than doubled from about 7 lakh bales in Sep 2017.

**As per the latest update by International Cotton Advisory Committee (ICAC), global cotton area is currently projected to decrease by 2% to 33.4 million hectares during 2018/19.** Global yields are expected to decline by 1% to 777 kg per hectare, remaining close to the 10-year average of 770 kg per hectare. Global production is projected to decrease by 4% to 26 million tonnes. Global stocks are expected to decline to 17.2 million tonnes

**The US Department of Agriculture's Commodity Credit Corporation announced a special import quota for upland cotton that permits importation of a quantity of upland cotton equal to one week's domestic mill use.** The quota will be established on November 01, 2018, allowing importation of 12,807,185 kilograms (58,822 bales) of upland cotton.

**The latest U.S. Department of Agriculture (USDA) cotton estimates for 2018/19 project world ending stocks to decrease 8 percent from the previous season to 74.4 million bales.** With global cotton mill use forecast to exceed production, world stocks are expected to decline 6.4 million bales by season's end, as lower stocks in China in 2018/19 more than offset higher stocks outside of China.

**According to customs' statistics of major exporters, arrivals of imported yarn in Sep are assessed at 142kt, down by 29% on the month.** Of the total, cotton yarn containing over 85% cotton reached about 133kt. The major origins are Vietnam (50kt), India (28kt), Pakistan (28kt), Indonesia (8kt), Uzbekistan (9kt), Taiwan (7kt) and other regions and countries (12kt).

**U.S. exporters struggle with a stronger dollar, cotton sales also have slowed. This week's Export Sales report showed just 70,300 bales of net new sales for 2018-19.** China cancelled 50,200 bales for 2018-19 and rebooked 56,400 for 2019-20. Vietnam accounted for nearly half of this week's net new sales at 34,700 bales of new orders. However, this does not necessarily mean that demand is gone.
