

Domestic Fundamentals:

Market Outlook:

Mixed price trend are extended in the cotton prices due to ups and downs in demand. Global prices are improving as of now. Mills are buying cotton for their short term needs only. In Punjab and Haryana state, cotton prices are ruling Rs. 200 to 400 above the MSP in the ongoing procurement season. Strong dollar may help Indian cotton exporters to offer its product at competitive prices in the global markets to earn more profit. Slow demand in natural Fibre and yarn market are not supporting cotton prices to go up. Ups and downs flow of arrivals has been registered today in market.

In the News:

In the WTO's Committee on Agriculture on November 26-27, 2018, India rejects the allegation of U.S that the country provides substantial market price for cotton well in excess of India's WTO (World Trade Organization) spending limits. India says that market price support will help to the poor growers of crop.

According to the Cotton Advisory board, the cotton production of India is placed 2 to 3% lower to 36 mln bales in 2018-19 as compared to its estimates of 2017-18 followed by lower production estimates in Gujarat and Maharashtra on account of scanty rains. As per IMD, Gujarat got 484.6 mm rainfall, 28% below the normal, while Maharashtra got 925.8 mm rainfall, 8% below normal during the July-September 2018.

Cotton Corporation of India (CCI) has started procurement of cotton at Minimum Support Price (MSP) from farmers in Warangal district and Mehboob Nagar of Telangana. The process is yet to pick up pace with cotton prices already hovering over Minimum Support Price (MSP). The procurement operations have just started and the Corporation has purchased nearly 3,000 bales from Warangal and 50 bales from Mehboob Nagar. Some bales are also procured from Akola in Maharashtra. The cotton prices are ruling above MSP in most cotton producing regions and arrivals are yet to pick up.

In Karnataka early sown crop is 140 -150 days old, but in majority area the crop is 135 days old. The crop is at boll opening stage in majority areas. First kapas picking is completed in early sown crop. Desi cotton crop is in growing vegetative stage. Dry spell prevailed during this week in all cotton growing districts with lower night temperature and dry weather during day time. Karnataka cotton prices of 29^+ mm sold between 44500 to 47,000 Rs./Candy during the week.

As prevailing weather conditions and water scarcity hit cotton yields in key growing regions, trade body Cotton Association of India (CAI) has further trimmed its crop estimate to 343.25 lakh bales (each of 170 kg) for the season 2018-19 beginning from October 1. Earlier CAI, at the Cotton India 2018 meet in Aurangabad last month, had projected the crop size at 348 lakh bales for the year 2018-19, 365 lakh bales lower than 2017-18.CAI cited water shortage and climatic adversities as factors affecting the crop in the key growing regions of Gujarat, Maharashtra and Karnataka. The CAI has revised downwards the crop estimate for Gujarat by 2 lakh bales, Maharashtra by 1 lakh bales, Karnataka by 1 lakh bales and Orissa by 75 thousand bales than compared to its previous estimate due to unfavourable weather conditions.

The Chinese are substituting their cotton imports from US with India. India's cotton exports to China may see a fivefold jump to 4 million bales in the marketing year 2018-19 starting Oct 1 against 0.8 million tonnes in 2017-18, after China slapped a 25% additional duty on imports of the fibre from the US. India's forward export contracts of cotton have more than doubled from about 7 lakh bales in Sep 2017.

30rd Nov 2018, Squally weather is likely to prevail over southeast Arabian Sea and adjoining Equatorial Indian Ocean. Dense fog at isolated places very likely over Assam & Meghalaya and Nagaland, Manipur, Mizoram & Tripura in the morning hours.

Weather Forecast:-

- Dry weather likely over the rest of the country.
- Dense fog at isolated places very likely over Assam & Meghalaya and Nagaland, Manipur, Mizoram & Tripura in the morning hours.
- Heavy rain likely at isolated places over south coastal Andhra Pradesh and north Coastal Tamilnadu.
- No significant change in minimum temperatures are likely over major parts of the country during next 3-4 days.

Friday 30 November 2018

International Fundamentals:

ICE cotton futures prices closed down by 1.2 percent on Thursday higher selling pressures. Weak sentiments for global market prices are remain for next day trading session.

As per sources, USDA declared the World market price for upland cotton at 67. 92% per lb which will be imposed by today night.

As per Reuter news, USDA expect that Uzbekistan's cotton planting area and production for marketing year (MY) 2018/19 will stand 1.17 million hectares and 3.35 million bales (480 pound bales) which is 730,000 MT. Yield are estimated down due to adverse growing conditions in almost all regions. There has been rapid expansion of the new "cotton-textile cluster" project, driving investment and modernization of each stage of production from cotton to textiles. Domestic cotton consumption is increasing year by year with new investments that are reducing cotton availability for exports. Accordingly, MY 2018/19 domestic consumption is estimated at about 2.66 million bales (580,000 MT) and exports at 1.05 million bales (230,000 MT).

As per sources, cotton production in Zimbabwe for the 2017/18 increased by 73.1 million kg to 142.7 million kg. in October 2018 against last year record during the same period last year. In the 2018 marketing season, farmers were paid minimum prices ranging from 51.7 cents to 55 cents per kg before grade adjustments.

As per the recent USDA Recent Report, 15 states of the world have picked total 98% of the 2017 cotton area so far. As on November 26,2018. Farmers have picked total 70% of cotton which is lower than previous year record i.e. 78% in the corresponding period of time due adverse weather condition. While, current harvested crop size is more than last week record i.e. 59%. It has reported average 77% of total picked cotton crop size during 2013 to 2017 period of time.
