

**Domestic Fundamentals:****Market Outlook:**

*The price in Indian market is higher than that internationally. This is backed by higher MSP and purchases by CCI. The market may move up only through larger off take by exporters or by domestic industry. This may occur gradually over the next few months.*

**News:**

**Cotton prices have softened further, despite a lower crop, on weak demand** from both yarn mills and overseas markets. Cotton prices are now hovering around Rs.42,500-44,000 levels per candy (356 kg each), a decline of about a tenth over the comparative prices in October. At the beginning of the cotton harvest season in October, cotton prices were around Rs.47,000 per candy.

**So far, farmers across the country have sold about 160 lakh bales from the current crop.** There's still an equal quantity of cotton that farmers will be bringing into the markets over the next couple of months. This is even as ginners are finding it hard to sell the processed cotton because of disturbances in currency and trade war.

**US-China trade relations have started to hurt India's cotton yarn exports and there is a chance of more damage.** Chinese importers have renegotiated orders of Indian cotton yarn worth \$400-500 million in the past few weeks. The US-China tariff war had benefited India. Between June and September 2018, the US announced high customs duties on several Chinese goods and China retaliated by increasing levies on US goods. India exported \$892.4 million worth of cotton yarn to China in April-November, up 2.5% from \$870.2 million in 2017-18.

**Cotton arrivals in the domestic markets have picked up but still below the expectation. All India cotton supplies reported about 1,70,000 bales on per day basis against 1,50,000 bales week earlier.** Ginning and Spinning mills buying remained slow, mainly due to sluggish off take in yarn market and financial constraint. Prices of Shankar-6(29mm) cotton remained in the range of cotton INR 42'600-42'800 per candy during the week, while the most active cotton contract on ICE Futures U.S. - the March contract – settled down 0.38 cent, or 0.52 percent, at 73.14 cents per lb. It traded within a range of 73.03 and 73.91 cents a lb.

**Cotton from India has been consistently trading higher by 2-3 cents per pound than the benchmark price in the US.** The spread between the two prices is due to the sharp increase in minimum support price that has cushioned the downside here even as global prices have fallen. Currently, Indian cotton is quoted around 83 cents while US cotton is around 80 cents.

**Indian physical market gained nearly 500 Rs. Per candy during this week.** In Gujarat ginners have big disparity so ginning is running in slow pace. Some ginners closed ginning operation for festival week. Kapas prices for BT cotton traded lower on week on week at Adoni market, last reported around INR 5556 per quintal. Cotton supplies reported slowly during the week, mainly due to festival holidays in key cotton growing regions. All India cotton daily arrivals are stated around 150 K bales. Demand from the export market remains slow, domestic buying is reported to be hand to mouth. Total arrivals reached approximately 13.70 million bales by now.

**As per the latest estimates by Agriwatch, cotton output in country during the season 2018-19 would be around 338.22 lakh bales (of 170 kg each) which is lower compared to 365 lakh bales of last season.** AW has reduced the crop estimate for Gujarat to around 92.82 lakh bales (from 108 lakh bales last year), Maharashtra to around 72 lakh bales (83 lakh last year), Telangana and AP by 52.00 lakh and 16.50 lakh bales respectively. The main reason for reduction in cotton crop is that farmers have uprooted more than 50% of their cotton crop after second picking and foregone the third and fourth pickings due to moisture deficiency and pest attacks. Dry spells in the initial stages of the crop, too, led to stunted growth of bolls, were the major reasons to decline in cotton yield in India.

### Weather Forecast for tomorrow:

During the next 24 hours, spell of rain and snow is expected over few places of Jammu and Kashmir and higher reaches of Himachal Pradesh. Rain and thundershowers will occur over many parts of South Tamil Nadu. Isolated places of Kerala and Andaman and Nicobar Islands may also witness light rainfall activity. Light rain and snow is likely to effect isolated places over Arunachal Pradesh. Delhi will experience moderate to dense fog with pollution in poor category.

### International Fundamentals:

**At global front US China high level talk not able to find any solution so market is disappointed and stayed range bound.** ICE cotton futures fell 1 percent on Friday, declining for the first week in three, on a lack of clear signs from the trade talks between the United States and China. The most active cotton contract on ICE Futures U.S. - the March contract – settled down 0.76 cent, or 1.02 percent, at 73.64 cents per lb.

**The Pakistan is likely to import 3.5-4 million bales - costing up to \$1.2 billion -as the crop size for season 2018-19 is estimated at 10.8m bales, against the annual demand of around 15m bales.** According to figures issued by Pakistan Cotton Ginners Association, Pakistan's cotton production up to Jan 15 fell by 7.74 per cent or 877,800 bales to 10.456m bales. India's cotton exports to Pakistan are unlikely to see a sharp jump, despite the neighbouring country scraping import duty, as high domestic prices have made exports uncompetitive. Indian cotton is currently available around 43,000 rupees a candy (1 candy = 356 kg), while prices in Pakistan are at sub 43,500 rupees making it (exports) unviable so far.

**U.S. cotton production is estimated at nearly 18.6 million bales- around 2.3 million bales (11 percent) below the 2017 crop.** Planted and harvested area this season are estimated at 14.0 million and 10.4 million acres, respectively; detrimental weather conditions in the Southwest and Southeast this season pushed the national abandonment rate to 26 percent, the highest in 5 years. The 2018 national yield is forecast at 860 pounds per harvested acre, below last season's record of 905 pounds but above the 3-year average of 846 pounds. Upland cotton production is estimated at 17.8 million bales, the second largest in a decade. The extra-long staple (ELS) crop is forecast at 771,000 bales, the largest since 2012's 780,000 bales.

**For China, 2018/19 cotton production is projected at 27.0 million bales, 500,000 bales (2 percent) below a year earlier, with both harvested area and yield forecast lower.** Most of China's cotton is produced in the western region of Xinjiang, where yields are significantly higher and have resulted in record yields for China in recent years as Xinjiang's share of the crop has risen. However, the national yield in 2018/19 is expected to dip below the 2017/18 record of 1,761 kg per hectare to 1,755 kg per hectare.
