

### Domestic Fundamentals:

#### Market Outlook:

**Cotton prices expected to remain firm as the crop has been short by 700,000 bales** in production estimate this year and due to exports demand from International markets especially from China. Moreover, China has announced import quota of 800,000 ton (47 lakh bales) of cotton. However, the international markets have fallen quite sharply during the last two weeks. Indian markets have followed suit but the decline here has been comparatively tepid owing to tightness in domestic supplies. The bench market mandi ( Rajkot ) price for variety Shankar 6 (105) was stood Rs 44500/ per candy on 14 May. The market currently seems supported and may consolidate around the current levels over the next few days .

NCDEX Cotton closed positive for the third day in a row after a large move lower. The previous decline as well as the current recovery are in tandem with the international market, although the overall decline in Indian market was smaller than that in international market. seems to have found a short term support at current levels as availability of raw material for mills is currently strained. Even US market during the current session has registered gains (trading at 66.76c at the time of this writing compared to previous close of 65.45c). At least a short term bottom in ICE futures might already be in place or close from current levels.

Even before the current decline and widened basis, India's 2018/19 cotton imports were expected to double from a year ago to a record 3.1 million bales. In view of the current price action, the imports may be even higher.

#### News:

**Cotton prices on Tuesday recovered from a near three-year low** hit earlier in the session on renewed optimism that a trade war between China and the United States will be resolved and as poor weather delayed planting progress in the United States

**Following hike in US's import tariffs on Chinese goods from 10% to 25% on USD 200 billion worth of imports, China has said US goods worth \$60 billion in imports will be subject to additional tariffs from June 1. Meanwhile, trade talks continue between the negotiators of the two countries.**

**Due to worsening trade atmosphere, almost 8 lakh bales of current US cotton crop and 13 lakh bales of new crop purchases by Chinese buyers are under threat of cancellation.**

**The USDA has estimated that India's 2018-19 cotton production would be 34.525 million bales, 7.5% higher than the estimate of CAI of 32.1 million bales**, revised downward by from its previous one of 32.8 million bales. Cotton Association of India (CAI) strongly objected to the cotton production estimates issued by the USDA.

**India's cotton imports of 8 lakh to 9 lakh mln bales have been shipped** and remaining are likely to be shipped between May and July out of contracted 1.8 mln bales. Indian imports from US rose to 2.56 lakh bales in April from 79,900 bales in March due to high domestic prices and short supply. Imports are taking place at Rs. 47,500 to 48,000/candy landed cost at port.

**The Punjab agriculture department has increased the area under cotton by nearly 40% to 4 lakh hectares**, up from 2.84 lakh hectares in 2018-19 season. The season for cotton sowing has already set in and the sowing is expected to pick pace from the first week of May.

**Stock held by mills as of end-March is 4.6 million bales**ingodowns of the CCI, multinational companies, ginners and the Multi Commodity Exchange, as of end-March. Trade sources say CAI recently convened a meeting of cotton traders and spinning mills to devise a strategy for selling its inventory.

**India's current cotton crop arrivals reached 27.88 million bales until 16<sup>th</sup> April 2019**, as per the latest CCI report. Physical prices traded steady last week on slow selling from ginners and slow demand from domestic mills.

**Indian importers have booked nearly 19 lakh bales while export is just at 40 lakh bales.** Net Outflow of cotton is near 20 lakh bales against last year's above 50 lakh bales. Indian consumers are regularly booking imports as their long-term strategy. Indian physical market remain range bound as ginners are holding good stock so now selling further arrivals in the market provides liquidity at regular pace and also some profit booking of investors.

**Maharashtra Commission for Agricultural Costs & Prices are expecting to raise the minimum support price of cotton by 10 %** and in the same lines CCI also told that there is a possibility of atleast 10% increase in MSP for cotton in the coming kharif season.

**International Cotton Advisory Committee (ICAC), the apex cotton body in their April 2019 report**, have projected a 6% rise in global production for 2019-20 at 276 lakh tonne.

**The largest producer among the southern states, Telangana's total cotton output is seen falling 19% on year to 4.1 mln bales in 2018-19 season** due to sharp fall in yields led by moisture deficiency after scanty rains. The cotton yield expected to decline to 381kg/ha from 451 kg in the previous year.

**All India daily cotton arrivals are reported to be about 75'000 bales according to CAI.** Active import business continued for West African & US origins. India remains in the market for U.S. cotton which support prices to remain high and China, Vietnam and Turkey were major buyers.

**According to CAI, the balance sheet projects total cotton supply of 37.60 million bales, a domestic consumption of 31.60 million bales**, exports of 4.70 million bales and a carry-over stock of 1.3 million bales. New crop planting started in some areas of North India. Good availability of canal water and better prices of seed cotton in the current season against competing crops will likely favor cotton sowing in North India.

#### **Weather Forecast for tomorrow:**

A Western Disturbance lies over Afghanistan and adjoining Pakistan. A cyclonic circulation is seen over Southwest Rajasthan. Another cyclonic circulation persists over eastern parts of Assam. A cyclonic circulation is Jharkhand. A trough is running from Bihar to Interior Tamil Nadu across Jharkhand, Chhattisgarh, Vidarbha, Marathwada and Interior Karnataka

#### **International Fundamentals:**

**Brazil: More cotton acreage is being planted-**While corn remains the major safrinha crop for Brazilian farmers, more cotton acreage is being planted in Mato Grosso this spring, as well. Over the past two years, cotton planting has increased by nearly one-third for the safrinha in Mato Grosso. The Brazilian Association of Cotton Producers (Abrapa) forecast cotton acreage to grow to 1.4 million hectares (3.46 million acres). Mato Grosso accounts for about 88% of Brazil's cotton production.

**China has said US goods worth \$60 billion in imports will be subject to additional tariffs from June 1, after President Trump announced a hike from 10% to 25% for tariffs on \$200 billion of Chinese goods.**

According to data released by **Bangladesh Textile Mill Association**, India accounted for 26.12% of the country's total cotton imports, down from more than 60% two years ago. East and West African countries now account for 37.06% of Bangladesh's cotton imports.

**The Karachi Cotton Association** reduced its spot rate by Rs50 to Rs8,800. Ginners with stocks of good quality cotton are of the view that the value of Pakistani rupee will depreciate further against the dollar and hence are unwilling to enter into deals at low prices

18% of the US cotton crop was planted by May 5, 7% more from the week prior. That is even with a year ago but lagging the average by 1%.

**On May 7th reserve cotton sales resources sold 100% at 10016.0599 tons.** The average transaction price was 14614 yuan/ton, down 59 yuan/ton from the previous trading day; discount 3128 price 16041 yuan per ton, down 44 yuan per ton compared with the previous trading day. The previous two days cumulative turnover of reserve cotton was 30,000 tons and turnover rate was 100%.

**China has announced that it will auction 800,000 ton from its reserve in 2019.** According to forecasts from the International Cotton Advisory Council (ICAC), the country has approved cotton sliding tariff import quota, with the reserve auction set to begin on 5 May and run through 30 September.

**China is going to commence the state cotton reserve's auction from May 5 and end on Sep 30.** The reserve will offer 10,000 metric tons (about 45,000 bales) each session. The market seems to be affected bearish as it will impact global trade. Qualities are expected to be low grades, which will help sustain demand since the low-grade market within China is reportedly very tight.

**The USDA showed just 144,778 RB in old crop upland cotton export sales for the week of 4/25.** That was a 6-week low and down 23.75% from the same week a year ago.

**NASS reported that 11% of the US cotton crop has been planted as of 28<sup>th</sup> March, an increase of 2% from the previous week.** US Export sales were decent 11,38,900 and export and shipment were 15,12,700 Bales. Total Commitments will cross USDA Export target in next one or two weeks but require pace of shipment is more than 4 lakh bales a week.

**Mixed trend was seen in international cotton market after fluctuation.** China hinted to import 8 lac tons bales which is approximately equal to 47 lac cotton bales while on the other hand China showed its interest of selling 10 lac bales from its old stock.
