

Domestic Fundamentals:**Market Outlook:**

Cotton prices expected to remain steady for few coming days due to the effect of downfall of international market prices. However, the international markets have fallen quite sharply during the last two weeks but gaining momentum since last two days due to adverse weather conditions prevailing in US affecting the planting progress. Indian markets have followed suit but the decline here has been comparatively tepid owing to tightness in domestic supplies. The bench market mandi (Rajkot) price for variety Shankar 6 was stood Rs.45,700/per candy. The market currently seems supported and may consolidate around the current levels and waiting for export data.

News: High velocity wind and hailstorm which lashed the region the region late on Wednesday evening damaged the cotton crop in Bathinda and Mansa districts of Punjab. The cotton plants got damaged in over a dozen villages in in both the cotton-producing districts due to hailstorm in in Budhlada, Talwandi Sabo, Maur and Sangat areas.

All India daily arrivals stood at 6,600 bales up from previous day's total arrivals of 5600 bales. The arrivals are dwindling around the above range. Ginners and millers may start trade after onset of monsoon during which the prices may see bullish movement from last week of June.

As per the latest estimates of Skymet, overall average yield is about to take charge to about 449kg/ha higher from previous year's average yield although El nino is going to dominate this year but the most critical stage of cotton in August is expected to have good rainfall due to delay in monsoon which is going to help the cotton crop to gain good yield. Also the area is expected to increase by 2.7% compared to previous year.

According to latest USDA June report, Indian imports has been increased by 1.9 LB to 19.85LB from previous estimate of 17.93 due to lower crop this season in India. Still Indian millers are booking the imports for creating stock as IMD expects lower rainfall which may affect the cotton production in the coming season. USDA estimates Indian exports could reach upto 53.79 LB and production estimates at 332.98 LB higher than CAI projection of 315LB in 2018-19.

In Punjab, cotton crop has been sown in nearly 4 lakh hectares and may go up by 10,000 hectares as the sowing is still going on, according to the State Agriculture department. The acreage was nearly 2.84 lakh hectares in 2018. In Haryana, farmers had sown cotton in 6.35 lakh hectares till June 6. Last year the total area under cotton was 6.61 lakh hectares.

The bulls continue to point to ever increasing imports of U.S. cotton by India. The world's largest cotton producing country finds itself with a weather reduced 2018-19 crop and is having to import cotton as the price of its dwindling domestic supplies increase almost daily. India will continue to buy U.S. cotton and this will offer slight upward price support for New York.

The country has produced a record of 275.93 million tons of cotton, last year 328.05 million tons was produced according to the third advance production estimate released by the Ministry of Agriculture, in 2018-19.

USDA has pruned India's output for 2018-19 to 25.5 mln bales of 480 pounds each, that equals 32.7 mln bales of 170 kg each. Until April, USDA had estimated India's output around 27.0 mln bales of 480 pounds or 34.62 mln 170-kg bales. The lower output is also reflected in 40% decline in exports and 100% rise in imports as estimated by the Cotton Association of India. India's exports for the current year are estimated to fall to 4.6 mln bales from 6.9 mln bales, while imports may hike up to 3.1 mln bales, compared with 1.5 mln bales a year ago.

Cotton Association of India (CAI) recently released its latest cotton crop estimating the crop size at 315 lakh bales, lowest in over a decade and significantly down from the previous year's output estimate of 365 lakh bales. The total cotton supply estimated by the CAI during the period from October 2018 to May 2019 is 325 lakh bales including the arrival of 288 lakh bales and imports of 9 lakh bales up to May 31, 2019.

Cotton sowing has already inclined by 10-20% in northern India and further simultaneously the total acreage for cotton is expected to increase by 7-8% due to low carryover stock and steady prices prevailing in the market for cotton encouraging sowing in some areas of north India. Cotton seed sale is up in Hanumangarh, Rajasthan due to re-sowing after rains in recent weeks damaged the crop.

Traders and ginner in India have hold their cotton stocks due to weight loss in May month as it results in a loss of about Rs.800/candy to Rs.950/candy at current rates. Since cotton absorbs and exudes the moisture, traders are likely to wait until the onset of monsoon resulting in increase in weight to avoid the weight loss occurred in May month.

Weather Forecast for tomorrow:

In the next 24 hours, we expect light to moderate rains with one or two heavy spells over Northeast India, Konkan and Goa, Coastal Karnataka. Light to moderate rains are expected over Gujarat, parts of Kerala, Odisha, East Rajasthan and West Madhya Pradesh. Isolated rains are likely over Telangana, interior Karnataka, and Tamil Nadu. Punjab, Haryana, North Rajasthan, Delhi, and West Uttar Pradesh might see isolated dust storm activities accompanied with rains. Heat wave conditions are expected at isolated pockets of Rajasthan, and Vidarbha.

International Fundamentals:

Cotton futures closed the day with 52 to 89 point losses, as July was up 0.53% this week. The Cotlook A index for June 13 was down 100 points from the previous day to 77.50 cents/lb. The weekly Average World Price (AWP) from USDA is 58.97 cents/lb through next Thursday, down 2.54 cents from last week.

The weekly Export Sales report from USDA showed just 75,110 RB in old crop upland sales, down from last week but more than double the same week last year. Increased sales were to India which purchased 30,400 RB, with 25,200 RB for Vietnam whereas the reductions took place for China 5,600RB and Mexico 2,000RB. New crop totaled just 42,959 RB. Shipments totaled 360,361 RB, a jump of 16.78% from last week but down 21.65% from the same week last year.

From May 5 to June 14, the cumulative turnover of reserve cotton was 25.51 tons, with a turnover rate of 81.90%. On 14th June, the reserve sales of reserve cotton was 9804.1949 tons, the actual turnover was 7172.9694 tons, and the turnover rate was 73.16%. China has commenced the state cotton reserve's auction from May 5 and end on Sep 30. The reserve will offer 10,000 metric tons (about 45,000 bales) each session. Qualities are expected to be low grades, which will help sustain demand since the low-grade market within China is reportedly very tight.

USDA raised old crop Chinese imports by 250,000 bales but cut consumption by 500,000 bales to 40 million. USDA raised old crop by 1.06 million bales to 77.53, with new crop stocks up 1.57 at 77.26 million bales for the world numbers.

China's 2019 State Reserve sales were depicted strong during May compared during the first week of June as the quantity weakened during the short period of time. As of June 6, about 220,000 tons had been sold representing about 85 percent of the total offered.

The US Crop Progress report showed US cotton planting progress moving just 4% from last week to 75% complete. That is behind the average pace of 87%, with 11% squaring. U.S. cotton planting progress remains good. Cotton planting progress has been on par with the five-year average. USDA sees no shortage of cotton anywhere in the coming year.

Brazil is expected to increase their cotton area due to higher realization and disputes among China and US encouraged the exports from Brazil followed by Australia. China has lowered its reserves and is expected to increase imports to 11.1 million bales, NCC forecasts. The U.S. also is expected to increase cotton exports to 17.4 million bales in 2019. World cotton production is estimated to increase by 7 million bales in 2019 to 125.5 million bales.

India's exports to Pakistan too have dipped by about 32% to \$171.34 million in March as India raised the customs duty to 200% on all goods imported from Pakistan. According to the data of the Commerce Ministry, imports declined to \$2.84 million in March as compared to \$34.61 million in March 2018.
