

**Domestic Fundamentals:****Market Outlook:**

**Domestic cotton prices expected to remain bearish for few coming days.** The bench market mandi (Rajkot) price for variety Shankar 6 stood Rs.44,050/per candy. The market currently seems weak and may consolidate around the current levels.

**News: CAI estimates the cotton production likely to decline further by 3 lakh bales in the current season (2018-19).**

According to CAI, the arrivals of 303.56 lakh bales upto 30th June 2019, imports of 11.28 lakh bales upto 30th June 2019 and the opening stock at the beginning of the season on 1st October 2018 at 33 lakh bales. CAI has estimated cotton consumption during the months of October'18 to June'19 at 243.12 lakh bales while the export shipment of cotton estimated by the CAI upto 30th June 2019 is 44.10 lakh bales.

**According to the latest report released by USDA,** indicates India may produce 37.14 million bales cotton in the coming season 2019-20 which is 9.43% higher than previous year's estimates of 33.94 million bales in 2018-19 with an ending stock of 10.56 million bales. Similarly, yield is also expected to increase to 508 kg/ha 9.33% higher than 458kg/ha in 2018-19. All these conditions are predicted under normal rainfall conditions as India got above average rainfall in the second week of July.

**Cotton acreage in the latest report released by Ministry of Agriculture as on 11th July'19 stood at 77.71 lakh hectare** 0.2% higher compared to last year in the same period which stood at 77.5 lakh. The slight increase in area this year is due to delayed monsoon, competitive crops are being replaced by cotton in some areas.

**According to the latest report released by IMD,** reveals that in the coming next two weeks the rainfall is expected to be below normal in India which seems to be very crucial for kharif growing crops for its initial vegetative phases. As in many cotton growing regions, the seedling are in need of water for proper germination. Whereas India received 28% above average rainfall in the 10<sup>th</sup> July ending week especially in cotton growing area of central India which was very important for the vegetative growth of cotton in its initial growth.

**As on 8<sup>th</sup> July'19, Telangana covered the cotton total area of 8.80 ha and slightly ahead from last year area which stood at 8.79 ha.** This year the cotton area in Telangana is going to increase by 2-3% from last year due to less water availability which is encouraging farmers to switch from growing rice this season.

**As on 4<sup>th</sup> July'19, the total cotton area of 45.85 lakh ha has been reported sowing in India, 18.77 lakh ha higher than previous week (27.08 lakh ha) and 16.02% less against the previous year of 54.59 lakh ha in 2018.** Higher area is reported from Haryana (6.76 lakh ha), Punjab (4.02 lakh ha) and Gujarat (14.35 lakh ha), whereas, less area is reported from Maharashtra (4.56 lakh ha), Telangana (7.89 lakh ha), AP (0.43 lakh ha), Tamil Nadu, Karnataka.

**The cabinet committee on Economic Affairs (CCEA) has announced MSP for 2019-20 kharif crops recently on 3rd July.** Medium staple cotton is raised by Rs.105 to Rs.5255/quintal and long staple cotton increased by Rs.100 to Rs.5550/quintal. This move of the government would encourage farmers to plant more cotton compared to its competing crops for the coming cotton season.

**USDA expects that Indian cotton exports for 2019-20 season is likely to increase by 11 lakh bales and estimated to reach upto 64 lakh bales,** whereas, imports are estimated at 18 lakh bales for 2019-20 cotton marketing season by USDA. USDA expects the cotton production at 37.5 million bales with a planted area of 125 lakh ha in 2019-20. Due to the rapid pace of extending rainfall to all over India, the cotton yield may increase compared to previous year.

**Daily arrivals stood at 4,850 bales as on 4<sup>th</sup> July, with central India having highest arrivals of 2500 bales followed by South zone and North zone stood at 500 bales and 100 bales from Haryana respectively.**

**As on 28<sup>th</sup> June'19, the total cotton area of 27.08 lakh ha has been reported sown in India 15% less against the previous year of 32.2 lakh ha in 2018.** Higher area is reported from Haryana (0.74 lakh ha), Punjab (0.28 lakh ha), Rajasthan (0.35 lakh ha) and Madhya Pradesh (0.23 lakh ha), whereas, less area is reported from Maharashtra, Telangana (3.92 lakh ha), Karnataka, AP (0.58 lakh ha), Tamil Nadu, Odisha and Gujarat.

**Around 15-20% more area is likely to be under herbicide resistant BT cotton in Maharashtra.** Nearly 20-25 lakh hectare is expected to come under HT Bt variety of cotton this kharif. Nationally, around 40-45 lakh packets of HT Bt cotton seeds are reported to be in circulation, according to industry sources.

**The agriculture department in Bhatinda is targeting to increase the yield in the coming season for cotton from 888 kg/ha in 2018-19 to 920kg/ha in 2019-20** and would also bring the area to 1,40,000 ha in the year 2019-20. This year, the area was 91,000 ha. This would increase the yield of Punjab in the coming season as Bhatinda is one of the largest cotton growing districts of Punjab.

### **Weather Forecast for tomorrow:**

Moderate to heavy rain and thundershowers at many places associated with very heavy showers will be seen along the foothills of Himalayas from Punjab to Arunachal Pradesh, Himachal Pradesh, Uttarakhand, Coastal Karnataka, and South Konkan coast. Dust storm and thundershowers with strong winds over parts of Rajasthan, and Haryana. Light to moderate rain and thundershowers at many places of Jammu and Kashmir, Punjab, Haryana, Uttar Pradesh, Bihar, Odisha, South Chhattisgarh, Andhra Pradesh, Madhya Maharashtra, South Interior Karnataka, Kerala, Tamil Nadu, Andaman, and Nicobar Islands, Lakshadweep Islands, and North Konkan coast. Light rain at isolated places of Gujarat, South Madhya Pradesh, Vidarbha, and North Interior Karnataka. Flood-like and landslide conditions will continue over Northern parts of Uttar Pradesh, Bihar, Sub-Himalayan West Bengal, and Sikkim, Northeast states and Uttarakhand.

### **International Fundamentals:**

**Cotton futures posted a loss of 6.29% in December futures this week, with most contracts 26 to 58 points lower on Friday.** The Cotlook A index for July 10 was up 50 points from the previous day at 74.80 cents/lb. The weekly AWP was updated to 58.05 cents/lb, down 127 points from the week prior.

**Net US upland sales were also declined by about 62% from the previous week.** Nearby demand has slowed down some pace since last week due to lack of demand China (10,000 RB), Japan (2,000 RB), and Thailand (1,100 RB). Around 1 lakh bales domestic consumption has also been decreased in US with reduced exports by 2.5 lakh bales based on recent shipments. Therefore, according to the recent WASDE report, the ending stock has been raised this month by 3 lakh bales to 6.7 lakh million bales.

**The falling exports has made Pakistan to rethink to create export opportunities as exporters are facing uncertainty** to negotiate and finalise new export orders due to continuous fluctuation in exchange rates, therefore the government must provide a mechanism to the exporters in this regard. The present crop situation is not seems good due to the heavy locust infestation in the fields.

**From May 5 to July 12, the cumulative turnover of reserve cotton was 468,000 tons, and the turnover rate was 87.51%.** The highest traded price 15930 Yuan/ton, the lowest turnover of 11530Yuan/ton. On July 10th, China sold 87.39% of Total Put Auction at 10612.2728 tons for sales. Average Transaction price was 12,876 Yuan/ton (down by 33 Yuan/ton from the previous day). The discounted 3128 price was 14, 132 yuan/ton (down by 4 yuan/ton from the previous day).

**The world total cotton production is likely to increase by 037% to 152.81 million bales from previous month's estimates of 152.24 million bales in 2018-19.** Also USDA projects that in the coming season, the production might surge upto 5.42% due to higher production estimates in some of the major producing countries like India, Pakistan and US itself.

**The cotton yarn stocks in China continues to stack at the ports as there is no liquidity in the market.** The stocks in the ports are assessed at about 99kt, with 38.2kt in Jiangsu and Zhejiang, 39.5kt in Guangdong and 11.9kt in North China. If this continue further, then the prices are likely to drop in July-August'19. Traders in China are burdened by large pressure due to large stocks and cotton yarn imports from India to china is likely to drop in July and in coming months.

**The prolonged trade war between US and China is severely affecting the US export sales and even the prices has been hit globally.** This could not be revived until China and US resolves the issue. Further Brazil has been a good competitor for US for its higher quality of cotton supply this year. Many US shipment cancellations from Vietnam, Mexico & China has made the sluggish shipments since last month.

**According to the latest US crop progress report week ending 7<sup>th</sup> July'19, 47% of the crop is squaring although less than last years' progress which was 57% in the same time.** The condition of the crop seems good with warming temperatures suitable for the development of the crop. Possibility for the positive impact on the yield of the crop in 2019-20 season.
