

**Domestic Fundamentals:****Market Outlook:**

*The Rajkot mandi price for variety Shankar 6 stood Rs.41,200/per candy. The market currently seems weak and may depreciate to much lower in coming days.*

**News:** *This is the third time confirmation since the beginning of cotton sowing that pink bollworm was detected in Yavatmal region of Maharashtra, after the second warning issued by the Maharashtra state government one week ago to the cotton farmers to keep close watch on the attack of pink bollworm. It is advised to the farmers to take precautionary measures by destroying the affected flowers as soon as possible before it is widespread to the other districts also.*

**Maharashtra is likely to impose import tax on raw cotton to control inflows and domestic prices.** *As recently since the July starting the prices moved down sharply compared to previous month. The low production in 2018-19 season lead to importing cotton so as to fulfill demand and to increase the upcoming season's opening stock. Therefore, according to the Maharashtra government's committee for agriculture cost and pricing, adequate steps would be taken to ensure the cotton prices steady in the new season which is set start post October.*

**Total MCX stock position as on 5<sup>th</sup> Aug'19, stood at 1,35,000 bales** with 64,600 bales in Gujarat, 53,100 bales in Maharashtra and 19,400 bales in Telangana with total utilized capacity of 1,40,700 bales.

**As on 2<sup>nd</sup> Aug'19, the cotton area has been increased this year by 5.35 lakh ha till now and reached 115.15 lakh ha than 109.79 lakh ha last year.** *The sowing is lagging behind in Gujarat, Telangana and AP by 1.78 lakh ha, 0.08 lakh ha and 0.16 lakh ha respectively whereas Maharashtra is leading by 3.3 lakh ha as sufficient rains has covered all cotton growing districts last week followed by Punjab at 1.18 lakh ha and Haryana covering 0.11 lakh ha compared to corresponding period last year.*

**As on 31<sup>st</sup> July'19, area under cotton in Telangana has picked up the pace and stood at 16.78 lakh ha** similar to 16.79 lakh ha in the corresponding period last year. Similarly, in Andhra Pradesh the area declined to 3.58 lakh ha and which was 3.74 lakh ha in the previous year. Almost 80-90% sowing has been completed in both the states. The rainfall in the coming week would help the farmers in sowing and the area might increase in Telangana.

**Cotton arrivals for 2018-19 season is likely to end by third week of August.** *Today the arrivals at benchmark market Rajkot were only 45 quintals compared to 380 quintals in the previous month on 1<sup>st</sup> July'19 while the prices remained constant since first week of July at weaker side compared to the beginning of the season in October'18.*

**In May, yarn export was down 30 % to 77 million kg (111 million kg) while in April it dipped 16 per cent to 90 million kg.** *Several spinning units are in fear of getting under closure if the current trend continues for the next season also. The consistent fall in cotton yarn exports in the last three months is due to sharp decline in demand in importing countries such as China, Bangladesh and South Korea, besides duty-free access given by China to competing Pakistan is worrying the Indian textile industry.*

**According to the trade sources, in Vidarbha and north-western part of the State, cotton plant flowers have been found infested by pink bollworm.** *As most of the crop was affected by pink bollworm during 2018-19 season due to which the production has reduced down. The situation is not serious till now but the farmers are being warned as around 5% area was found infested in the area.*

**The Indian market remained firm at 81.13 (cents/lbs) compared to the international prices in US (63.02 cents/lbs) and Brazil stood at 65.6 cents/lbs, on the back of lower production in India this year the prices stood higher.** *Cotton prices would remain firm against international prices at least till the beginning of the next season (Oct'19) due to lower arrivals.*

*On the other hand the domestic prices were expected to go up but it has fallen to Rs.43000/ candy against the beginning of the season which stood at Rs.46000/candy in the Indian market due to crash in demand amid US and China trade war despite the prevailing shortage conditions.*

**India's cotton imports is likely to surge at 25 to 28 lakh bales in 2018-19 against 15 lakh bales in previous year.** Shortage of raw cotton has urged the textile mills to import cotton on large scale. Till July'19, around 14 lakh bales is expected to arrive out of the total contracted imports of 27 lakh bales for the season, while the remaining 10 -11 lakh bales is expected to arrive until the end of season in September month.

**As on 26<sup>th</sup> July'19, the cotton area has been increased this year by 6.4% till now and reached 108.95 lakh ha than 102.51 lakh ha last year.** The sowing is lagging behind in Karnataka, Telangana and AP by 0.39 lakh ha, 0.52 lakh ha and 0.93 lakh ha respectively whereas Gujarat, Punjab, Haryana and Rajasthan is leading by 0.66 lakh ha, 1.18 lakh ha, 0.11 lakh ha and 1.4 lakh ha respectively compared to corresponding period last year.

**Indian Cotton Federation (ICF) has pressurized CCI to release cotton lint stock** as the Indian spinning mills are not able to get quality cotton to meet the demand for yarn production at market prices. As CCI is having 9.28 lakh bales with them and is offering higher price than the spot rate in the e-auction to support the spinning mills immediately.

**Due to waterlogging, the Punjab State Agriculture Department revealed that 90,563 acres of crop mainly cotton and paddy has been damaged.** Bhatinda was the worst affected district bearing 31.5% of the total damage.

**Good rains are hovering around the cotton belts covering all the states.** In contrast, the heavy spell of rainfall in near district of Bhatinda, the cotton crop is in verge of being damaged as around 6,500 ha crop is lying in the stagnant water from last 2 to 3 days. If the crop remains submerged for more than 2-3 days, cotton crop would be damaged and could not survive as cotton has less water requirement.

### **Weather Forecast for tomorrow:**

During the next 24 hours, moderate to heavy rains with one or two heavy spells will be seen over Odisha, South Chhattisgarh, South Madhya Pradesh, and South Konkan and Goa. Moderate rains with one or two heavy spells would be affecting rest Odisha, rest Chhattisgarh, rest Madhya Pradesh, Coastal Karnataka, and Kerala. Light to moderate rains will be seen over Gangetic West Bengal, South Jharkhand, parts of Vidarbha, Marathwada, North Konkan and Goa, East Rajasthan, Delhi, West Uttar Pradesh, Himachal Pradesh, Uttarakhand, parts of Punjab and Haryana. Light rains with one or two spells can be seen over rest parts of the country except Coastal Tamil Nadu and West Rajasthan where weather is nearly dry.

### **International Fundamentals:**

**Cotton futures gained 17 to 29 points in the nearby contracts, OCT 19 Cotton closed at 58.08, up 17 points on Tuesday.** The Cotlook A was down 250 point on August 5 at 70.90 cents/lb. The weekly AWP is 56.96 cents/lb, good through Thursday.

**From May 5 to August 06, the cumulative turnover of reserve cotton was 623,600 tons, and the turnover rate was 87.10%.** The highest traded price 15930 Yuan/ton, the lowest turnover of 11530 Yuan/ton. On 6<sup>th</sup> Aug, 30.58% Of Total Put Auction at 5841.887 tons for sales. Average Transaction price was 11,984 Yuan/ton (Up by 10 Yuan/ton from the previous day). The discounted 3128 price was 13,403 yuan/ton (Down by 97 yuan/ton from the previous day).

**The International Cotton Advisory Committee (ICAC) has estimated cotton production for 2019-20, 6% higher from prior year at 27.2 mt,** with consumption increasing by 1.7 per cent to 26.9 mt, hence global stocks should swell to 18 million tonnes. There was hope that China and the US would resolve their trade differences at the G20 meeting held in June 2019 but there were no breakthrough. ICAC estimated that China is expected to remain the world's largest producer in 2019-20, higher than India's projected 5.75 mt.

**The traders were hoping for the positive outcome but after the latest meeting of trade negotiations between US and China, the US President has imposed 10% tariff on additional \$300 billion worth of goods with the effect from 1<sup>st</sup> September'19.**

**The weekly export sales report from the USDA showed net sales of 10,200 running bales for 2018/19 were down 94% from the previous week, while exports of 291,200 RB were down 9%. The top buyer was Vietnam at 8,000 RB, with 5,425 RB in cancellations for China as we flip to a new MY today. New crop cotton sales were shown at a MY high for the week of 25<sup>th</sup> July at 364,802 RB, with 48,336 RB to China and 214,000 RB sold to Vietnam.**

**The weekly crop progress report by US, showed that the crop condition is 60% good to excellent, better than last year's condition which just 43% was good. According to the report, US cotton crop is at 86% squared (87% avg.), and 45% was reported as setting bolls (48% avg.). The 15 cotton growing states in US planted 99% of 2018 cotton acreage in the week ending July 28<sup>th</sup>, 2019.**

**According to government of Pakistan, 14% growth have been witnessed under cotton cultivation this sowing season compared to the corresponding period last year in Pakistan. The crop had been cultivated over 2.65 million hectares of land across the cotton growing areas of the country. The sowing target has been set at 2.78 million hectares with 12.72 million bales for fulfilling the domestic requirements as well as for exporting the commodity.**

**Recently, China government has approved the textile industry to buy a total of 50,000 US cotton without any retaliatory tariffs. There could be more waivers on trade tariffs in the near future as the trade talks progress on Monday in China.**
