

Domestic Fundamentals:**Market Outlook:**

The Rajkot mandi price for variety Shankar 6 stood Rs.41,850/per candy. The market currently seems weak and may depreciate to much lower in coming days.

News: *The crop in Punjab & Haryana is in good health and no infestation of pest is noticed till now. The crop is now more than 3 months old with almost final stage of flowering and needs sufficient sunlight to have better boll formation in the coming days. If the weather continues to be favorable, bumper crop is expected (around 10-12% increase) in both the states for the coming season with arrivals starting from mid of September.*

As on 8th Aug'19, the cotton area has been increased this year by 6.13 lakh ha till now and reached 118.73 lakh ha than 112.6 lakh ha last year. The sowing is lagging behind only in Gujarat by 7.1% and stood at 24.69 lakh ha whereas all other states are now ahead compared to previous year. So far, the total area of cotton expanded this year by around 5.4%.

As on 7th Aug'19, cotton in Telangana has surpassed previous year's area and stood at 17.23 lakh ha from 17.06 lakh ha in the corresponding period last year. Similarly, in Andhra Pradesh the area surged to 4.18 lakh ha which was 4.02 lakh ha in the previous year. Almost 90-100% sowing has been completed in both the states.

This is the third time since the beginning of cotton sowing that pink bollworm was detected in Yavatmal region of Maharashtra, after the second warning issued by the Maharashtra state government one week ago to the cotton farmers to keep close watch on the attack of pink bollworm. It is advised to the farmers to take precautionary measures by destroying the affected flowers as soon as possible before it is widespread to the other districts also.

Maharashtra is likely to impose import tax on raw cotton to control inflows and domestic prices. As recently since the July starting the prices moved down sharply compared to previous month. The low production in 2018-19 season lead India to import cotton so as to fulfill demand and to increase the upcoming season's opening stock. Therefore, according to the Maharashtra government's committee for agriculture cost and pricing, adequate steps would be taken to ensure the cotton prices steady in the new season which is set start post October.

Total MCX stock position as on 5th Aug'19, stood at 1,35,000 bales with 64,600 bales in Gujarat, 53,100 bales in Maharashtra and 19,400 bales in Telangana with total utilized capacity of 1,40,700 bales.

As on 2nd Aug'19, the cotton area has been increased this year by 5.35 lakh ha till now and reached 115.15 lakh ha than 109.79 lakh ha last year. The sowing is lagging behind in Gujarat, Telangana and AP by 1.78 lakh ha, 0.08 lakh ha and 0.16 lakh ha respectively whereas Maharashtra is leading by 3.3 lakh ha as sufficient rains has covered all cotton growing districts last week followed by Punjab at 1.18 lakh ha and Haryana covering 0.11 lakh ha compared to corresponding period last year.

As on 31st July'19, area under cotton in Telangana has picked up the pace and stood at 16.78 lakh ha similar to 16.79 lakh ha in the corresponding period last year. Similarly, in Andhra Pradesh the area declined to 3.58 lakh ha and which was 3.74 lakh ha in the previous year. Almost 80-90% sowing has been completed in both the states. The rainfall in the coming week would help the farmers in sowing and the area might increase in Telangana.

Cotton arrivals for 2018-19 season is likely to end by third week of August. Today the arrivals at benchmark market Rajkot were only 45 quintals compared to 380 quintals in the previous month on 1st July'19 while the prices remained constant since first week of July at weaker side compared to the beginning of the season in October'18.

In May, yarn export was down 30 % to 77 million kg (111 million kg) while in April it dipped 16 per cent to 90 million kg. Several spinning units are in fear of getting under closure if the current trend continues for the next season also. The consistent fall in cotton yarn exports in the last three months is due to sharp decline in demand in importing countries such as China, Bangladesh and South Korea, besides duty-free access given by China to competing Pakistan is worrying the Indian textile industry.

According to the trade sources, in Vidarbha and north-western part of the State, cotton plant flowers have been found infested by pink bollworm. As most of the crop was affected by pink bollworm during 2018-19 season due to which the production has reduced down. The situation is not serious till now but the farmers are being warned as around 5% area was found infested in the area.

India's cotton imports is likely to surge at 25 to 28 lakh bales in 2018-19 against 15 lakh bales in previous year. Shortage of raw cotton has urged the textile mills to import cotton on large scale. Till July'19, around 14 lakh bales is expected to arrive out of the total contracted imports of 27 lakh bales for the season, while the remaining 10 -11 lakh bales is expected to arrive until the end of season in September month.

Weather Forecast for tomorrow:

In the next 24 hours, moderate to heavy rainfall is likely over South and West Madhya Pradesh, adjoining parts of Southeast Rajasthan and parts of South Coastal Karnataka and North Kerala. Scattered light to moderate rains with one or two heavy spells can be seen over rest Madhya Pradesh, Konkan and Goa, Vidarbha, North Coastal Karnataka, South Kerala and adjoining parts of Interior Tamil Nadu, parts of Chhattisgarh and Telangana, Sub-Himalayan West Bengal and Sikkim, parts of Assam, Meghalaya, South Jammu and Kashmir, Himachal Pradesh, Uttarakhand and North Punjab. Whereas scattered light to moderate rains are likely over Haryana, West, and South Uttar Pradesh, East Rajasthan, parts of Punjab and some parts of East Bihar. Weather will be dry in West Rajasthan, and over parts of Tamil Nadu. Scattered light rains with one or two moderate spells will be seen over rest parts of the country.

International Fundamentals:

Cotton futures Posted 100 to 143 point gains in most contracts, OCT 19 Cotton closed at 59.2, up 117 points on Tuesday. The Cotlook A was up 70 cents on August 9 at 71.00 cents/lb. The weekly AWP is 52.67 cents/lb, down 4.29 cents from the previous week.

From May 5 to August 14, the cumulative turnover of reserve cotton was 661,500 tons, and the turnover rate was 84.89%. The highest traded price 15930 Yuan/ton, the lowest turnover of 11530 Yuan/ton. On 12th Aug, 95.91% Of Total Put Auction at 11233.9737 tons for sales. Average Transaction price was 11,999 Yuan/ton (Up by 109 Yuan/ton from the previous day). The discounted 3128 price was 13,222 yuan/ton (up by 159 yuan/ton from the previous day).

According to USDA data, 13.90 million planted acres of cotton, up 180,000 acres from July. NASS Crop Progress data showed 77% of the crop setting bolls (76% avg) against 75% in the same time last year, with 20% of the crop with bolls opening (10% avg) higher than 12% in the corresponding period last year. Around 30-40% crop is noticed to be in good to excellent condition in the current season declined from previous week due to unduly hot and dry weather conditions in the cotton belts in Texas.

The US crop production for 2019-20 season is increased by 2% to 22.5 mln bales according to NASS conducted survey. US carryout for old crop was up 250,000 bales to 5.25 million bales, and new crop ending stocks were up 500,000 bales to 7.2 million. World stocks for 2018-19 were up 1 million to 80.27 million bales, as new crop was up 2.03 million to 82.45 million bales.

The Export Sales report from USDA showed 179,505 RB of 2019-20 upland cotton sold in the week of August 1, with China buying 60,100 RB followed by 28,700 RB. A total of 24,57,582 RB in export sales were carried over from the 2018-2019 marketing year with total shipments of 1,38,03,729 RB that is 0.3 million less than the latest USDA estimate (14.2

mIn bales) which ended July 31. Total shipments in the final 6 days of the 2018-19 Marketing year were 272,709 RB, with 72,798 RB shipped so far for 2019-20.

The International Cotton Advisory Committee (ICAC) has estimated cotton production for 2019-20, 6% higher from prior year at 27.2 mt, with consumption increasing by 1.7 per cent to 26.9 mt, hence global stocks should swell to 18 million tonnes. There was hope that China and the US would resolve their trade differences at the G20 meeting held in June 2019 but there were no breakthrough. ICAC estimated that China is expected to remain the world's largest producer in 2019-20, higher than India's projected 5.75 mt.

The traders were hoping for the positive outcome but after the latest meeting of trade negotiations between US and China, the US President has imposed 10% tariff on additional \$300 billion worth of goods with the effect from 1st September'19.

The weekly export sales report from the USDA showed net sales of 10,200 running bales for 2018/19 were down 94% from the previous week, while exports of 291,200 RB were down 9%. The top buyer was Vietnam at 8,000 RB, with 5,425 RB in cancellations for China as we flip to a new MY today. New crop cotton sales were shown at a MY high for the week of 25th July at 364,802 RB, with 48,336 RB to China and 214,000 RB sold to Vietnam.

The weekly crop progress report by US, showed that the crop condition is 60% good to excellent, better than last year's condition which just 43% was good. According to the report, US cotton crop is at 86% squared (87% avg.), and 45% was reported as setting bolls (48% avg.). The 15 cotton growing states in US planted 99% of 2018 cotton acreage in the week ending July 28th, 2019.
