

Domestic Fundamentals:**Market Outlook:**

The Rajkot mandi price for variety Shankar 6 stood Rs.41,700/per candy (74.58 cents/lbs). The crop for 2019-20 season is expected to increase by 11-15% compared to previous year this time on the advancement of rainfall and increase in area but the excess rainfall in Madhya Pradesh and Maharashtra might decline the country's production than expected.

News: *The cotton crop is at vegetative to flowering stage in Andhra Pradesh while the state is facing from pest attack (Sucking pests, root rots, leaf blights) which affect the area of 3550 ha in Vizianagaram, West Godavari out of which 2050 ha area has been treated. As on 18th Sep'19, 6.02 lakh ha has been sown higher compared to 5.6 lakh ha in the corresponding period last year also higher than normal sown area (5.88 lakh ha).*

P. Alli Rani told the CCI to hold the stock instead of cutting prices and incurring losses as they are holding the premium quality cotton ranging around Rs.49000/ candy with lower than 2.5% trash but due to lower demand in the industry it is costing around 43,000/candy. The decision was made after the textile millers have demanded to sell stocks at cheaper rates due to the superior quality. CCI currently holds around 900,000 bales out of around 1.1 mln bales of cotton it procured in the current marketing season ending this month. This move might increase the imports of cheaper cotton from USA in the coming days because of which the prices might fall to some extent.

The cotton yarn industry in India has weaken in past 3-4 months. After the meeting held by Northern India Rotor Spinners Association had decided to shut the mills on every Friday of the week in Panipat in order to cope up from the recession. A one-day mills shutdown will cut production by 15–20 percent. These mills produce five lakh kilograms of yarn every day. It costs around Rs 25 crore. Cotton yarn made from Panipat is exported all over the country including Uttar Pradesh. Stocks seem to be high in mills. There are 70 mills operating here and all are struggling with payment due to lack of demand. There is also a problem of payment in the market.

Cotton prices have started rising from the past one week due to lower production estimates this year, following reports of crop damage on erratic rainfall in some places in Madhya Pradesh and Maharashtra so far and pink bollworm attack on standing crops especially in Maharashtra which might reduce the state's production by 5-6%. The prices rose by around 6% in Rajkot mandi (Gujarat) and traded on an average of Rs.6359/q in past few days. The main reason for the rise in prices is due to the lower crop and expected delayed arrivals. Further the production forecast would depend on coming rainfall pattern in the coming days as the crop is in boll formation to maturity stage which needs enough sunshine hours to remain healthy and productive.

The arrivals have started in Punjab and the state is expecting bumper crop this year around 17.6 lakh bales as against 12 lakh bales last year. As the textile industry is weakening since last few months, CCI has extended its helping hand to support the needy farmers to sell their produce directly to them instead of selling to arhtiyas (commission agents). A series of meetings were being held with CCI officials to ensure that they get hassle-free access to mandis and farmers do not suffer any harassment in selling their produce. But the farmers averse selling their produce directly to CCI as they are not willing to break their ties with arhtiyas and they have been the helping hand in hour of crisis since a long time to the farmers, therefore, even if they have to sell their produce at a lesser price the farmers are satisfied with what they get.

Maharashtra government is planning to give Kapas bonus of Rs.250/q to the farmers for selling Kapas to the CCI at MSP rate (5550 +250 =5800/q) from 1st October onwards. As the excess rains in almost all the cotton belts of Maharashtra has destructed around 15% of the crop and farmers are hoping to receive good sunlight to revive the crop as soon as possible. So as to protect farmers from loss, Maharashtra government has introduced the bonus plan for the coming season starting from 1st Oct'19. To reimburse CCI payment Budget of Rs.1000 crore will be sanctioned in next the Maharashtra government cabinet ministers meeting on 24th September.

Although the textile industry is getting up to 2% incentives over Merchandise Exports from India Scheme (MEIS) which will transit into the scheme Remission of Duties or Taxes on Export Product (RoDTEP) introduced recently by Finance

Minister. RoDTEP will replace MEIS for textiles which will more than adequately incentivize exporters than existing schemes put together.

CCI has decided to procure 100 lakh bales of cotton in the coming season. CCI has all the agreements in place for processing and storing and has all the infrastructure ready for the procurement of 100 lakh bales of cotton, which is one-third of the total production. CCI has started preparations to enter the market in Punjab after four years. CCI has parameters for quality of raw cotton to be reasonably good to make procurement at the MSP. Weak international demand and higher support price of cotton in India has made ginners and textile sector reluctant to buy the commodity this season.

As on 12th Sep'19, the cotton area has been increased this year by 6.04 lakh ha and stood at 126.60 lakh ha till now higher than 120.56 lakh ha last year. The sowing is lagging behind in Gujarat by only 1.58% this week and stood same at 26.65 lakh ha followed by Madhya Pradesh behind by 12.63% covering 6.09 lakh ha area. Whereas all other states are now ahead compared to previous year. So far, the total area of cotton expanded this year by around 5.02%. The advancement in rainfall is favouring the cotton crop for a healthy growth all over India.

The new cotton arrivals from Punjab covering the area of Bhatinda, Abohar and Mansa have started last week. The prices ranged between Rs.4130-4400/maund with higher arrivals from Bhatinda with around 2,360 bales followed by 1,155 bales from Abohar and around 332 bales from Mansa in last week.

Weather Forecast for tomorrow:

During the next 24 hours, scattered light to moderate rains are likely over Madhya Pradesh, North Madhya Maharashtra, East and South Gujarat, Vidarbha, parts of Marathwada, South Chhattisgarh, Coastal Andhra Pradesh, parts of Telangana, East Uttar Pradesh, parts of Bihar, Sub Himalayan West Bengal, Sikkim, Assam and in isolated pockets of Himachal Pradesh and Uttarakhand. Also, light to moderate rains with one or two heavy spells were witnessed over Konkan and Goa and Madhya Maharashtra. Moderate to heavy rains are likely to be witnessed over Andaman and Nicobar Islands. Kutch and West Rajasthan will remain dry. Rest all places will witness scattered light rains.

International Fundamentals:

Cotton futures were down 14 points in several nearby contracts with OCT 19 Cotton closed at 59.38, up 2 points on Thursday. The Cotlook A Index was down 130 points on September 18 at 72.40 cents/lb. The weekly AWP is 54.62.

From May 5 to Sep 20, the cumulative turnover of reserve cotton was 932,300 tons, and the turnover rate was 86.14%. On 20th Sep 99.07% Of Total Put Auction at 11676.7418 tons for sales. Average Transaction price was 12,149 Yuan/ton (Down by 11 Yuan/ton from the previous day). The discounted 3128 price was 13,303 yuan/ton (Up by 10 yuan/ton from the previous day).

Cotton contracts for December settled down 0.17 cent, or 0.28 %, at 60.33 cents per lb. It traded within a range of 60.28 and 61.13 cents a lb. The top consumer of cotton China has cancelled the order of US fiber of about 39000 RB while the exports of US stood up at 85,000 RB (14% more compared to last week). And on forecast for a bumper harvest as the quality remained very good, and weather overall continued to promote quality.

The cotton output in Pakistan is likely to decline by 26% with a shortfall of 0.66 million bales as about 18.52 lakh bales arrived against the arrival of 25.17 lakh bales of same period of last year. The cotton production in Punjab as of Sept 15, recorded a steep fall at 5.98 lakh bales as against 9.80 lakh bales produced in the corresponding period last year. The slow crop arrival in the local markets was mainly attributed to the low pricing trend in the markets, coupled with delay in the announcement of the minimum support prices for the crop by the government. Cotton crop output during 2019-20 current season was expected to reach 12 million bales as against the set targets of 12.72 million bales.

NASS showed only 40% of US cotton in good to excellent condition in the week ending on 15th Sep'19. NASS Crop Progress data showed 54% of the crop with bolls opening (47% avg) higher than 48% in the corresponding period last

year. The data shows that 9% of the crop has been harvested against 13% last year in the corresponding period. Weather was mostly quiet and dry in the rest of the Cotton Belt last week.

After the recent crop progress report by USDA, cotton traded slightly weaker as a weaker sales report of net UPLAND sales of 74,700 RB for 2019- 2020 were down 54 percent from the previous and 63 percent from the prior 4- week average. Increases were primarily for Bangladesh (17,300 RB), Vietnam (17,200 RB), Pakistan (10,100 RB), South Korea (9,400 RB), and Turkey (9,200 RB). Reductions were reported for China (20,800 RB).

According to the latest WASDE report by US, production for USA is lowered 654,000 bales to 21.86 million, largely due to a decline for the Southwest, while consumption is lowered 100,000 bales. Exports are projected 700,000 bales lower due to reduced U.S. production. The 2019-20 season-average price for upland cotton is forecast at 58 cents per pound, down 2 cents from last month.

The US Export Sales report from USDA showed 162,800 RB of 2019-20 upland cotton sold in the week of August 29th lagging behind compared to previous week. With major buyers including Vietnam (42,100 RB), Pakistan (22,400 RB), Mexico (16,400 RB) and South Korea (15,000 RB) and reductions were from China (4,600 RB) followed by Portugal (300 RB). For 2020-21, net upland sales were 1,98,200 RB were primarily for Mexico (18,000 RB) and Japan (18,200 RB). Higher demand and large shipments has been reported from Mexico which increased the US sales ultimately last week.
