

Domestic Fundamentals:**Market Outlook:**

The Rajkot mandi price for variety Shankar 6 stood Rs.40,950/per candy (73.69 cents/lbs). The crop for 2019-20 season is expected to increase by 11-15% compared to previous year this time on the advancement of rainfall and increase in area but the excess rainfall in Madhya Pradesh and Maharashtra might decline the country's production than expected. The cotton prices have increased from the last week amid increasing cotton seed demand and lower availability of the same in the market.

News: The prices of raw cotton are prevailing under the MSP of long staple cotton of Rs. 5450 per quintal fixed by the government around Rs.5000/q. The raw cotton containing above the permissible limit of moisture content (>8%) is offered much below Rs.5000/q around Rs.4800/q. CCI is expected to start procuring the cotton from Punjab in order to stabilize the market from 1st Oct'19. There would be deduction of 1% in support price for every 1% increase in the moisture content. The crop with a moisture content of 12% will be procured at the support price of Rs.5232/q after the deductions.

The Indian cotton has been offered around 76-77 cents/lbs to importing countries like Bangladesh and Vietnam for November to December shipments whereas the price from US and Brazil is being offered around 70 cents/lbs which is cheaper than Indian cotton due to which the buyers from importing countries are switching over to other countries other than India. Traders usually seal contracts to export around 8 lakh bales before the start of the season on 1st Oct, but this year they had managed to sell around only 3 lakh bales for shipments. But the estimated bumper production could help fall in the prices and make the exports feasible.

MCX cotton delivery surged by 119% this year from Oct'18 till Aug'19 delivering 3,98,600 bales, valued at Rs 853.12 crore higher compared to the delivery of 1,82,300 bales during the previous cotton season. Also the traded volume too increased in the season till Aug'19 to 1,01,125 bales compared to 84,112 bales last year. The increase in overall participation from cotton value chain has led to higher delivery and all cotton stocks at designated warehouses in Rajkot, Kadi and Mundra in Gujarat, Jalna and Yavatmal in Maharashtra and Adilabad and Warangal in Telangana were delivered to the buyers.

Cotton seed prices were firm last week due to supply shortages caused by a smaller crop in 2018-19, which aided cotton prices. Cotton production is expected to increase by around 12% to 360 lakh bales in 2019-20 against 2018-19 according to the Agriwatch estimates. Whereas, according to the Pressing Factory Owners and Traders Association based in Maharashtra, the production is expected to reach 375 lakh bales in the 2019-20 season, which is 63 lakh bales (20%) more than the estimated production of 312 lakh bales in 2018-19. The prices in coming season is expected to decline and CCI is prepared to buy 10 million bales of cotton if cotton prices fall below the minimum support price (MSP).

Total arrivals stood slight higher at 44,450 bales by the week ending 21st Sep'19 compared to previous week's 27,550 bales. Of this, 7,800 bales were from Central India, followed by 5,400 bales from South India. The arrivals from North India (in Haryana and Punjab) have started so the arrivals increased to 31,250 bales this week.

As on 20th Sep'19, the cotton area has been increased this year by 6.4 lakh ha and stood at 127.09 lakh ha till now higher than 120.64 lakh ha last year. The sowing is lagging behind in Gujarat by 2% this week and stood same at 26.67 lakh ha followed by Madhya Pradesh is behind by 13% covering only 6.09 lakh ha area. Whereas all other states are now ahead compared to previous year. So far, the total area of cotton expanded this year by around 5.34%. The advancement in rainfall has favoured the North India crop which has increased the yield in Punjab while some areas in Central India has been hit by the heavy rains which can be revived only if sufficient sunshine is received before harvesting.

The cotton crop is at vegetative to flowering stage in Andhra Pradesh while the state is facing from pest attack (Sucking pests, root rots, leaf blights) which affect the area of 3550 ha in Vizianagaram, West Godavari out of which 2050 ha area

has been treated. **As on 18th Sep'19, 6.02 lakh ha** has been sown higher compared to 5.6 lakh ha in the corresponding period last year also higher than normal sown area (5.88 lakh ha).

P. Alli Rani told the CCI to hold the stock instead of cutting prices and incurring losses as they are holding the premium quality cotton ranging around Rs.49000/ candy with lower than 2.5% trash but due to lower demand in the industry it is costing around 43,000/candy. The decision was made after the textile millers have demanded to sell stocks at cheaper rates due to the superior quality. CCI currently holds around 900,000 bales out of around 1.1 mln bales of cotton it procured in the current marketing season ending this month. This move might increase the imports of cheaper cotton from USA in the coming days because of which the prices might fall to some extent.

The cotton yarn industry in India has weakened in past 3-4 months. After the meeting held by Northern India Rotor Spinners Association had decided to shut the mills on every Friday of the week in Panipat in order to cope up from the recession. A one-day mills shutdown will cut production by 15–20 percent. These mills produce five lakh kilograms of yarn every day. It costs around Rs 25 crore. Cotton yarn made from Panipat is exported all over the country including Uttar Pradesh. Stocks seem to be high in mills. There are 70 mills operating here and all are struggling with payment due to lack of demand. There is also a problem of payment in the market.

The arrivals have started in Punjab and the state is expecting bumper crop this year around 17.6 lakh bales as against 12 lakh bales last year. As the textile industry is weakening since last few months, CCI has extended its helping hand to support the needy farmers to sell their produce directly to them instead of selling to arhtiyas (commission agents). A series of meetings were being held with CCI officials to ensure that they get hassle-free access to mandis and farmers do not suffer any harassment in selling their produce. But the farmers averse selling their produce directly to CCI as they are not willing to break their ties with arhtiyas and they have been the helping hand in hour of crisis since a long time to the farmers, therefore, even if they have to sell their produce at a lesser price the farmers are satisfied with what they get.

Weather Forecast for tomorrow:

During the next 24 hours, light to moderate rains with a few heavy spells are likely over South Uttar Pradesh, adjoining North and Northeast Madhya Pradesh, parts of West Bengal, East Bihar, East Jharkhand, South Gujarat, and adjoining West Madhya Pradesh. Scattered light to moderate rains with one or two heavy spells are possible over West Assam, Bihar, Jharkhand, Odisha, East Uttar Pradesh, Madhya Pradesh, Vidarbha, Madhya Maharashtra, Konkan and Goa, Coastal Karnataka, parts of Kerala, parts of Telangana and North Coastal Andhra Pradesh. Weather will remain dry over rest Rajasthan, Haryana and Punjab. Rest all places in India might see scattered light rains with one or two moderate spells.

International Fundamentals:

Cotton futures closed with 14 to 21 point gains on Wednesday as nearby Oct saw no trade. The Cotlook A Index was up 50 points on September 24 at 71.95 cents/lb. The weekly AWP is 54.62.

From May 5 to Sep 27, the cumulative turnover of reserve cotton was 979,100 tons, and the turnover rate was 85.94%. On 27th Sep 55.97% Of Total Put Auction at 5714.3164 tons for sales. Average Transaction price was 11,684 Yuan/ton (Down by 317 Yuan/ton from the previous day). The discounted 3128 price was 12,929 yuan/ton (Down by 257 yuan/ton from the previous day).

The US Export Sales report from USDA showed 1,55,200 RB of 2019-20 upland cotton sold in the week of Sep 26th were up by 83% compared to previous week. With major buyers including Pakistan (35,400 RB) followed by Guatemala (30,300 RB), & Vietnam (19,800RB) and reductions were from Hong Kong (4,300 RB). For 2020-21, net upland sales were 12,800 RB were primarily from Guatemala (5,900RB), Honduras (3,500RB) & Colombia (3,400 RB). Higher demand and large export shipments has been reported from Vietnam and Indonesia which increased the US sales ultimately last week.

NASS showed only 39% of US cotton in good to excellent condition in the week ending on 22nd Sep'19. NASS Crop Progress data showed 64% of the crop with bolls opening (57% avg) higher than 57% in the corresponding period last

year. The data shows that 11% of the crop has been harvested against 16% last year in the corresponding period. Weather was mostly quiet and dry in the rest of the Cotton Belt last week.

Cotton contracts for December settled down 0.17 cent, or 0.28 %, at 60.33 cents per lb. It traded within a range of 60.28 and 61.13 cents a lb. The top consumer of cotton China has cancelled the order of US fiber of about 39000 RB while the exports of US stood up at 85,000 RB (14% more compared to last week). And on forecast for a bumper harvest as the quality remained very good, and weather overall continued to promote quality.

The cotton output in Pakistan is likely to decline by 26% with a shortfall of 0.66 million bales as about 18.52 lakh bales arrived against the arrival of 25.17 lakh bales of same period of last year. The cotton production in Punjab as of Sept 15, recorded a steep fall at 5.98 lakh bales as against 9.80 lakh bales produced in the corresponding period last year. The slow crop arrival in the local markets was mainly attributed to the low pricing trend in the markets, coupled with delay in the announcement of the minimum support prices for the crop by the government. Cotton crop output during 2019-20 current season was expected to reach 12 million bales as against the set targets of 12.72 million bales.
