

Domestic Fundamentals:**Market Outlook:**

The Rajkot mandi price for variety Shankar 6 stood Rs.40,700/per candy (72.57 cents/lbs). CCI is not purchasing cotton at MSP in bulk quantities because of the interruption of arhatiyas and higher moisture content in the cotton in Punjab and Rajasthan.

News: *Around 26,570 quintals of cotton have arrived in Fazilka, one of the biggest quality cotton producing belts of the region in Punjab. CCI just procured 12 quintals from the area since they started procurement on 11th Oct'19. Therefore, the farmers are selling their cotton below MSP for Rs 5,450 per quintal (with 8% moisture content) and Rs 5,232 per quintal (with 12% moisture) under pressure. Whereas, some private traders are purchasing cotton at a maximum rate of Rs 4,990 per quintal. Farmers are facing loss of around Rs.400-500/q, therefore, CCI must enter the market so as to stabilize the market.*

On Friday the March contract rose as much as 3.1% to 64.45 cents, it's the highest since last month in the hope that trade war would progress after China's initial acceptance of a partial trade deal on Friday. But the prices fell over 1% on Monday US expected the deal to go through but an additional round of tariffs on Chinese imports will likely be imposed if a trade deal with China has not been reached by 15th Dec. China wants all the tariffs to be delayed and want to meet again for another series of face-to-face meetings in late October.

All India total arrivals on 14th Oct'19 stood around 67,700 bales. *Largest arrivals area reported from North India (Punjab, Haryana and Rajasthan) with 37,000 bales followed by Maharashtra (4,000 bales), Madhya Pradesh (9,000 bales) and Gujarat (13,000 bales) in the central zone. Arrivals in South India has been delayed due to late sowing and only 4,700 bales have been reported as on 14th Oct'19.*

CCI has started procuring cotton but still not making bulk purchases. The cotton presently is fetching a price between Rs 4,700 and Rs.5200/q *depending on the moisture content. Till Oct'11th, only 2200 quintals has been purchased by CCI so far. These sluggish purchases is due to the higher moisture content and also the CCI is also facing the rage of the arhatiyas (commission agents) who are trying to stop the corporation from making purchases.*

CCI has commenced the procurement initially from Punjab and Rajasthan as the prices are falling by around 10% below MSP. *CCI is purchasing in small quantities as recent rains has increased the moisture content in the cotton. Yesterday CCI purchased raw cotton in Hanumangarh at Rs.5280/q as per the moisture content (11%) whereas in Punjab, today CCI has made some token purchases from Punjab at Abohar also. Farmers are being advised to let their cotton dry before they bring it to the market as CCI can only purchase fair average quality (FAQ) cotton with moisture content in the permissible limit between 8 % to 12 %.*

Currently, daily market arrivals are at around 40,000 bales in North India, while in Telangana they are at around 2000-3000 bales. *In Maharashtra, the daily arrivals are at around 3,000-4,000 bales and in Karnataka around 1,000 bales, according to the trade sources. Arrivals are set to pick up by the end of October or early November. As on, 9th Oct'19, arrivals from MP stood higher around 7,760 bales, and in Gujarat 6,650 bales. Better quality of cotton is expected to arrive from November which delayed by 30-40 days.*

As per the moisture content, the cotton prices (Kapas) moved lower to around Rs. 5000 to 5200 in Haryana, Punjab and Rajasthan. *The recent rains has led to increase the moisture content upto 18-20% and CCI is yet to enter in the market to procure from farmers in 1-2 days only. CCI would buy Kapas from farmers directly at MSP (Rs.5550/q) so as to prevent them from loss but arhatiyas are not allowing the farmers to sell their produce directly to CCI. The crop must generally have less than 8% moisture content for it to sell at MSP. Every 1% increase in moisture translates into lower price for farmers; the upper ceiling on moisture content is 12%.*

According to the trade sources, the Indian cotton exports for the Aug'19 were reported at 61,991 bales against 68,509 bales in the previous month. The total exports of India from the starting of the marketing year in Oct'18 till July'19 reached to a total of 43.65 lakh bales around 21.34% lower compared to 64.99 lakh bales during the corresponding period in 2017-18. In Aug'19, Bangladesh was the largest importer, importing 45,187 indian bales with an average FOB of 2049.2 \$/Tonne followed by Iran (9,625 bales at FOB 2013\$/Tonne) and Vietnam importing 4081 bales at 1238 \$/tonne.

The Indian market remained firm at 74.63 (cents/lbs) compared to the international prices in US (62.79 cents/lbs) and Brazil stood at 60.22 cents/lbs in the month end. The prices were firm in Domestic as well as in the international market in September after the largest cotton producer reported damage in Madhya Pradesh and Maharashtra from stagnated water in the cotton fields. The quality of cotton might be affected in these area which would decline the yield and production than expected.

Monthly cotton yarn exports still are low by 35.7% compared to previous year during April- Aug. The data released by the textile industry in August also showed a decline of 38.8%. India cotton industry is already struggling from slumped exports due to lean demand. The Indian export yarn exports fallen to 355 million kg in 2019 as against an average of 552 million kg in 2018 during April-Aug.

Weather Forecast for tomorrow:

Moderate rains with one or two heavy spells are likely in Tamil Nadu and Kerala. Scattered light to moderate showers would be seen over Karnataka and Andhra Pradesh. Isolated rains are likely in Telangana, South Konkan, and Goa, Odisha, South Chhattisgarh as well as Northeast India. Weather will remain dry over rest parts of the country.

International Fundamentals:

Cotton futures posted 53 to 119 point gains in the front months on Tuesday with DEC 19 Cotton closed at 63.41, up 119 points, MAR 19 Cotton closed at 64.16, up 98 points. The Cotlook A Index saw gains for Tuesday, up 250 points to 72.25 cents/lb for October 14. The AWP is 53.90 cents/lb through Thursday.

The October 15 USDA Crop Progress report for the week ending 13th Oct'19 shows that 87% of the U.S. crop has open bolls, with three states dealing with a late crop in Kansas, Oklahoma and Texas and now over 80% boll set and catching up quickly. All cotton producing states are now ahead of their respective 5-year averages for the date. As expected, the biggest percentage jumps came in cotton harvested, with 32% of the U.S. crop now out of the field. That's a 7% climb in the past week. The report showed that 38% of the U.S. crop is rated good to excellent (down 1%), 41% rated fair (down 1%) and 21% rated poor and very poor (up 2%).

As the quality of locally produced cotton in Pakistan had deteriorated in comparison to other cotton-producing countries. The mills has urged the government to remove import duty from cotton as the industry has spent \$1.5 billion on the import of 5.5 million bales due to 35% crop shortfall in the country this year. The export opportunity for India is increased so Pakistan might import cotton from India in this season.

China's consumption in 2019-20 is expected lower 8.6 million tons similarly as in 2018-19, due to decline in global demand and imposition of US trade tariffs on China's textile exports. Although China is largest importer of cotton from US, but the country has found its alternate Brazil, Australia and Pakistan other than US.

Brazil's 2019/20 production and exports will top current records, at 12.5 million bales and 8.5 million bales, respectively. Importing countries like Bangladesh and Vietnam is getting parity from Brazil (around 60cents/lbs) by thus increasing the export estimates this year.

The US Export Sales report from USDA showed 1,88,800 RB of 2019-20 upland cotton sold in the week ending 3rd Oct'19 were up by 6% compared to previous week. With major buyers including Pakistan (137,300 RB) followed by Vietnam (37,500 RB), South Korea (7,900 RB) & Indonesia (5,200 RB) and reductions were from El Salvador (7,400 RB), Mexico

(400RB) & Malaysia (200RB). For 2020-21, net upland sales reductions of 5,300 RB were primarily from El Salvador. Higher demand and large export shipments has been reported from Vietnam (31,800RB), China (17,900RB), Bangladesh (14,700RB) which increased the US sales ultimately last week.

Cotton import in Pakistan is expected to reach the record high of five million bales this year as local production of the industrial crop is estimated to decline 15 percent on high input prices, insect pests pressure and higher temperature. The revised production estimate would be 15 percent down from 12 million bales produced last year. Nearly 30 to 35 percent crop has already arrived in ginning factories till September 30, which was 27 percent down compared to the corresponding period last year and 33 percent lower against the government estimates. All Pakistan textile mills are requesting to abolish 11% taxes on import of cotton to bridge the massive shortfall to import around 5 million bales (11% higher from 2018-19).

NASS showed only 42% of US cotton in good to excellent condition in the week ending on 10th Oct'19. NASS Crop Progress data showed 83% of the crop with bolls opening (75% avg) higher than 76% in the corresponding period last year. The data shows that 25% of the crop has been harvested against 24% last year in the corresponding period. Weather was mostly quiet and dry in the rest of the Cotton Belt last week.

According to International cotton advisory committee (ICAC), the world cotton supply is estimated to increase by 5.35% and projected at 157.76 million bales in 2019-20 against previous year which was much lower 151.47 million bales in 2018-19. The consumption is likely to increase this year 2.47% to 155.71 million bales against last year's world consumption. If US-China dispute improves in the on-going year, the consumption and trade flow at the global level might see improvement in world cotton trade.
