

Domestic Fundamentals:**Market Outlook:**

The Rajkot mandi price for variety Shankar 6 stood Rs.39,300/per candy (70.72 cents/lbs). The markets across India reported to be closed today on the occasion of Dhanteras. Cotton prices reported to be weaker this week compared to last week due to incessant rains in the main cotton producing regions which has increased the moisture content in the cotton.

News: *CCI is prepared to start procurement of cotton in Andhra Pradesh in the second week of November to ensure minimum support price to the farmers. Joint collector of Pithapuram of Kakinada district said that cotton farmers should register themselves in e-crop about the details of the cotton produced. Cotton will not be purchased if the moisture content exceeds 12% as per the government instructions.*

Yavatmal region one the major cotton-producing districts covering around 4 lakh ha in the state usually grows dry cotton due to lack of rainfall in the region, therefore, most of the times the productivity is uncertain. *This year the area has received the untimely rainfall and prolonged monsoon is likely to affect the cotton yield. Every year, the first picking is taken before Diwali but this time due to incessant rainfall have delayed the picking of cotton.*

The stagnant water from incessant rains in past few days in the cotton fields across Nagarkurnool district in Telangana *would affect the overall production of the state if the rains still continue. The deficiency of magnesium one of the essential micronutrient for the boll formation is observed in the district. The nutrient can be revived if the local KVKs transfer the necessary curative measures to the famers by draining out the stagnant water and followed by applying magnesium sulphate.*

According to USDA's latest report, India is going to top in the cotton cultivation globally. USDA has estimated India's cotton crop at 293 lakh US bales for the marketing year 2019-20 which is 376 lakh Indian bales (each of 170Kg). *Significant rains in the past month has led to moderate to good crop condition in growing regions, likely to improve yield prospects mostly in Southern States. According to the Ministry of Commerce, Cotton yarn shipments remain at historic lows with China and Bangladesh while Egypt and Peru remain the top markets. Trade sources indicate that shipments in August are also very slow.*

The March contract rose as much as 3.5% to 64.99 cents, *it's the highest since last month in the hope that trade war would progress after China's initial acceptance of a partial trade deal and confirmed that the two countries are likely to sign a 'phase one agreement' soon to end their trade war and will soon speed up the purchases. Beijing also confirmed that it may purchase American agricultural produce in large quantities.*

The cotton markets at Sirsa in Haryana and Hanumangarh in Rajasthan are closed due to the strike by the farmers as CCI is not procuring cotton after the commencement on 11th Oct'19. *CCI is avoiding purchasing cotton making an excuse of higher moisture percentage above 12% in the three states as always CCI enters the market when the prices moves below MSP. Till 16th Oct'19, CCI purchased only 6,520 quintals of cotton so far from Punjab, Haryana and Rajasthan whereas 7 lakh bales have arrived in the mandis.*

Around 26,570 quintals of cotton have arrived in Fazilka, one of the biggest quality cotton producing belts of the region in Punjab. *CCI just procured 12 quintals from the area since they started procurement on 11th Oct'19. Therefore, the farmers are selling their cotton below MSP for Rs 5,450 per quintal (with 8% moisture content) and Rs 5,232 per quintal (with 12% moisture) under pressure. Whereas, some private traders are purchasing cotton at a maximum rate of Rs 4,990 per quintal. Farmers are facing loss of around Rs.400-500/q, therefore, CCI must enter the market so as to stabilize the market.*

On Friday the March contract rose as much as 3.1% to 64.45 cents, it's the highest since last month in the hope that trade war would progress after China's initial acceptance of a partial trade deal on Friday. But the prices fell over 1% on Monday *US expected the deal to go through but an additional round of tariffs on Chinese imports will likely be imposed*

if a trade deal with China has not been reached by 15th Dec. China wants all the tariffs to be delayed and want to meet again for another series of face-to-face meetings in late October.

All India total arrivals on 14th Oct'19 stood around 67,700 bales. Largest arrivals area reported from North India (Punjab, Haryana and Rajasthan) with 37,000 bales followed by Maharashtra (4,000 bales), Madhya Pradesh (9,000 bales) and Gujarat (13,000 bales) in the central zone. Arrivals in South India has been delayed due to late sowing and only 4,700 bales have been reported as on 14th Oct'19.

CCI has started procuring cotton but still not making bulk purchases. The cotton presently is fetching a price between Rs 4,700 and Rs.5200/q depending on the moisture content. Till Oct'11th, only 2200 quintals has been purchased by CCI so far. These sluggish purchases is due to the higher moisture content and also the CCI is also facing the rage of the arhtiyas (commission agents) who are trying to stop the corporation from making purchases.

CCI has commenced the procurement initially from Punjab and Rajasthan as the prices are falling by around 10% below MSP. CCI is purchasing in small quantities as recent rains has increased the moisture content in the cotton. Yesterday CCI purchased raw cotton in Hanumangarh at Rs.5280/q as per the moisture content (11%) whereas in Punjab, today CCI has made some token purchases from Punjab at Abohar also. Farmers are being advised to let their cotton dry before they bring it to the market as CCI can only purchase fair average quality (FAQ) cotton with moisture content in the permissible limit between 8 % to 12 %.

Weather Forecast for tomorrow:

During the next 24 hours, light to moderate rain with one or two very heavy spells are likely over Coastal Karnataka, Konkan, and Goa, parts of Kerala, Gangetic West Bengal, Odisha, Assam, Meghalaya. Scattered light to moderate rains is likely over rest Northeast India, parts of Marathwada, Telangana, South Chhattisgarh, parts of Coastal Andhra Pradesh. Scattered light rain is likely over Vidarbha, Maharashtra, Interior Karnataka, Rayalaseema, Jharkhand.

International Fundamentals:

Cotton futures ended the day with gains from 19 to 30 points. The Cotlook A Index had given back 50 points on Oct 22, at 75.20 cents/lb.

The textile exports from the country increased by 2.95% during the first quarter of the current fiscal year compared to the corresponding period of the last fiscal year. The textile exports during July-September (2019-20) were recorded at \$3371.974 million against the exports of \$3275.303 million during July-September (2018-19), a growth of 9.95%. EU and Pakistan has joined hands to improve the textile exports in Pakistan. Buyers in Pakistan are active in buying quality cotton which has risen the prices to Rs.9500/maund, a rise of Rs.200 of premium quality cotton.

The October 15 USDA Crop Progress report for the week ending 20th Oct'19 shows that 93% of the U.S. crop has open bolls, with three states dealing with a late crop in Kansas, Oklahoma and Texas and now over 90% boll set and catching up quickly. All cotton producing states are now ahead of their respective 5-year averages for the date. As expected, the biggest percentage jumps came in cotton harvested, with 40% of the U.S. crop now out of the field. That's a 8% climb in the past week. The report showed that 38% of the U.S. crop is rated good to excellent.

Trading activity in Pakistan gave momentum to the prices to surge. Textile industries have booked the cotton in bulk as expecting the shorter crop this year. The revised production estimate would be 15 percent down from 12 million bales produced last year. Nearly 40-45 percent crop has already arrived in ginning factories till September 30, which was 26 percent down compared to the corresponding period last year and short of 1.6 lakh bales.

The US Export Sales report from USDA showed 206,500 RB of 2019-20 upland cotton sold in the week ending 10th Oct'19 were up by 9% compared to previous week. With major buyers including Vietnam (108,800 RB) followed by Pakistan

(64,800 RB), Bangladesh (13,900 RB) & Thailand (10,600 RB) and reductions were from Japan (2,600 RB), & Taiwan (200RB). For 2019-20, net upland shipments exports of 151,600 RB were up 2% from previous week and were primarily to Vietnam (35,700 RB), Mexico (15,800RB) and Pakistan (14,800RB).

The March contract rose as much as 3.5% to 64.99 cents, it's the highest since last month in the hope that trade war would progress after China's initial acceptance of a partial trade deal and confirmed that the two countries are likely to sign a 'phase one agreement' soon to end their trade war and will soon speed up the purchases. Beijing also confirmed that it may purchase American agricultural produce in large quantities.

As the quality of locally produced cotton in Pakistan had deteriorated in comparison to other cotton-producing countries. The mills has urged the government to remove import duty from cotton as the industry has spent \$1.5 billion on the import of 5.5 million bales due to 35% crop shortfall in the country this year. The export opportunity for India is increased so Pakistan might import cotton from India in this season.
