

Domestic Fundamentals:**Market Outlook:**

The Rajkot mandi price for variety Shankar 6 stood Rs.38,400/per candy (68.06 cents/lb). Cotton prices across India reported to show mixed trend today compared to the previous day due to heavy rains in the main cotton belts which has increased the moisture content in the cotton. Whereas the Punjab and Haryana gained support after CCI involvement in procuring cotton.

News: *CCI has so far begun procurement in Punjab, Rajasthan, Haryana and Gujarat, and now in Maharashtra, Telangana and Karnataka at MSP. Farmers are to get Rs. 5,450-Rs. 5,500 per quintal while market prices are much lower at Rs. 5,100 per quintal for better quality cotton. The procurement centres in MH would be open in phases since the moisture content is currently high. Corporation had procured around 40,000 bales so far compared to 2000 bales in same period last year and the total arrival in the market until date has been close to 25 lakh bales.*

CCI is in full swing to procure cotton from North India that were in sluggish mode during the last month due to high moisture content. *The prices in Punjab, Haryana and Rajasthan recovered to certain level around Rs.5300-5400/q during this week. The agency had gradually increased its purchase, as cotton produce arriving in the market these days had moisture content within permissible limits.*

According to the Indian Cotton Association Limited (ICAL), more than 15 lakh bales of raw cotton have arrived in the mandis of Punjab, Haryana and Rajasthan in September and October, according to the Indian Cotton Association Limited (ICAL). *Rajasthan has recorded arrivals of 7.13 lakh from September 1 to October 31, while the figure is 6.01 lakh bales in Haryana and 1.91 lakh bales in Punjab.*

High moisture content in fresh cotton harvest arriving in spot market has hit purchases and availability of quality produce as desired by textile mills. *Therefore, arrivals as well as the prices for the low quality declined by this week. CCI in Andhra Pradesh is not procuring as expected leaving the window open for private traders. Farmers are not getting the MSP at very lower prices around Rs.4800 to 5050/q on selling to private traders whereas CCI is procuring cotton at MSP (Rs.5550/q).*

CAI released its estimates for 2019-20 season at 355 lakh bales of cotton production, up by 13.6% compared to the previous year's production. *Comparatively, Agriwatch estimates the production might range around 351 lakh bales in 2019-20 against 321 lakh bales in 2018-19 season. CAI projects that exports are likely to remain steady at last year's level of 4.2 million bales, the lowest in a decade. If exports to remain steady, the United States and Brazil exports may increase to key Asian buyers such as Vietnam, Bangladesh and Pakistan.*

According to the latest data released by the textile industry, the Indian cotton yarn exports declined drastically by 33% till Sep'19 from the starting of the financial year in April'19. *India exported 101 million kg in 2018 while only 67 million kg in 2019 during April to September. The top importers of cotton yarn (including raw cotton) were China (-55%), Bangladesh (-42%) and Egypt so far in 2019 although the exports to these countries were lesser compared to the previous year (2018) because of disparity between domestic and international cotton prices. Decline in raw cotton exports from Bangladesh (-45%), Vietnam (-83%), China (-88%), Pakistan (-42%) and Vietnam (-33%) also witnessed decline probably due to the higher Indian cotton prices. The countries preferred buying cotton from Brazil and USA where the prices prevailed between 60-65 cents/lbs.*

CCI has not started procurement yet in bulk quantities in Punjab and Haryana. *Still the kapas prices in both the states are prevailing around Rs.5200-5400/q with the moisture content ranging between 13-15%. Whereas procurement in Adilabad market has started procurement primarily Primary Agricultural Cooperative Societies (PACS) and then would be lifted by CCI. Farmers are advised to dry the cotton, which got drenched in rain.*

Farmers in Adilabad, Telangana are distressed as they are not getting fair price of at least the MSP for cotton that has started trading from today (6th November'19). Government agencies and private traders said that the moisture content is very high due to the continuous rains and farmers are ready to charge a low price. To ensure that farmers get a better price for cotton, the administration has implemented to ensure the arrival of cotton in phases in the mandis on the basis of mandals so that the entire quantity of cotton produced in the entire district does not reach the Adilabad market at the same time. Also the farmers would get enough time to reduce down the moisture to (8-12%) which are the permissible limit for CCI to procure cotton.

According to the trade sources, the Indian cotton exports for the Sep'19 were reported at 71,403 bales against 94,000 bales in the previous month. The total exports of India from the starting of the marketing year in Oct'18 till Sep'19 expected to have reached to a total of 46.47 lakh bales around 23% lower compared to 60.12 lakh bales during the corresponding period in 2017-18. In Sep'19, Bangladesh was the largest importer, importing 63,226 Indian bales with an average FOB of 1.82 \$/Kg followed by Iran (3551 bales at FOB 1.84 \$/Kg) and Vietnam importing 2061 bales at 1.73 \$/Kg.

International Cotton Advisory Board projected the world production at 26.7 MMT 4% higher against 25.69 MMT in 2018-19. Due to the lower demand by the mills and US- China trade war affected the overall economy at the global level which has reduced the consumption in 2018-19 marketing year and likely to remain flat in 2019-20. India is expected to lead in the cotton production among the other countries at 6 million tonnes (35.29 Indian Lakh Bales). Similarly, China is projected imports at 8.05 million tonnes (47.5 Indian Lakh Bales) 2% down compared to the previous year. Both Mexico and Pakistan are expected to increase their imports by 48% (to 141,000 tonnes) and 8% (to 711,000 tonnes), respectively.

According to the Cotton Corporation of India, the total arrivals till 28th Oct'19 stood at 12.33 lakh bales. Out of which Rajasthan is leading with 3.77 lakh bales followed by Haryana with arrivals of 3.75 lakh bales, Gujarat with 1.38 lakh bales and 1.28 lakh bales as on date. The arrivals from Maharashtra (35,000 bales), Telangana (29,000 bales) and AP (31,000 bales) declined compared to the previous year at the same time due to disruptions caused by rainfall from last week in the cotton belts.

Weather Forecast for tomorrow:

Light to moderate rains with one or two heavy spells are likely over West Rajasthan. The rainfall activities will increase in Jammu and Kashmir as well as Himachal Pradesh. There may be moderate to heavy rain with good snowfall over both the states. Scattered light rain and snow may occur over the upper reaches of Uttarakhand. Isolated light rain is likely in Punjab, Haryana, Saurashtra and Kutch. Light to moderate rain will continue in Tamil Nadu, South Coastal Andhra Pradesh and parts of Kerala. Isolated rains may occur over Rayalaseema, and South Karnataka.

International Fundamentals:

Cotton nearby futures finished 4 to 7 points lower, with DEC 19 Cotton closed at 64.26, up 4 points. Cotlook A Index dropped 95 points, down to 75.00 cents/lb. The AWP of 56.63 cents/lb.

The 2019 U.S. crop is now estimated further down to 20.8 million US bales. USDA lowered U.S. production 60,000 bales from previous month' estimates and lowered ending stocks from 7 million bales down to 6.1 million bales. USDA reported the overall 62% of the crop have been harvested higher against 53% in the previous year. The excellent quality of the crop is stimulating export demand as the crop moves to warehouses whereas the reduction in production estimates is triggering more imports by US.

Pakistan is expecting shortfall in cotton production and around 3.5-4.5m bales would have to be imported. Cotton production for current season (2019-20) would not be more than 9 million bales as estimated by the country earlier. The production from the Punjab having sharply declined due to the excessive rains and due to the use of inferior quality pesticides made the situation uncontrollable.

Pakistan is likely to produce 35% less cotton compared to the previous year, therefore, Pakistan is already importing cotton from US and Brazil. As the supply declined to combat the demand, the country might import cotton from India if the trade resumes. India is assuming that it is the good opportunity to export cotton and cotton yarn to Pakistan. In 2018, India exported around 5 lakh bales to Pakistan. It is expected that this year the exports might reach around 10-15 lakh bales.

The US Export Sales report from USDA showed 164,500 RB of 2019-20 upland cotton sold in the week ending 31st Oct'19 were up by 52% compared to previous week. With major buyers including Pakistan (95,100 RB), followed by Vietnam (45,100 RB) & Turkey (33,200 RB) and reductions were from Indonesia (65,900RB), Hong Kong (2,400RB). For 2020-21, net upland shipments exports of 129,700 RB were down 13% and were primarily to Pakistan (21,600RB), Vietnam (17,900 RB), China (14,400RB) and Indonesia (12,800RB).

The USDA's weekly crop progress report showed cotton harvest crest above 53% complete in the week ending 3rd November. The 7 day forecast is moderate to heavy precipitation for North East Texas and most of Oklahoma in US. The South is forecasted to receive about an inch of accumulated precipitation. The average pace is 51%, and compared to last year we are 5 percentage points ahead of schedule. Texas was 42% complete, normally 38%, and GA has harvested 67% of their crop 11 percentage points ahead of average.

The textile exports from the country increased by 2.95% during the first quarter of the current fiscal year compared to the corresponding period of the last fiscal year. The textile exports during July-September (2019-20) were recorded at \$3371.974 million against the exports of \$3275.303 million during July-September (2018-19), a growth of 9.95%. EU and Pakistan has joined hands to improve the textile exports in Pakistan. Buyers in Pakistan are active in buying quality cotton which has risen the prices to Rs.9500/maund, a rise of Rs.200 of premium quality cotton.
