

Domestic Fundamentals:**Market Outlook:**

The Rajkot mandi price for variety Shankar 6 stood Rs.40,250/per candy (72.40 cents/lb). Cotton prices across India reported to showed mixed trend across. NY futures closed the week slightly lower, as March gave up 47 points to close at 70.22 cents.

News: CCI procured around 40 lakh bales so far this season out of 40% total arrivals of cotton in the market. CCI is likely to achieve atleast 70 lakh bales of cotton this season against the target of procuring 100 lakh bales. The CCI has been buying in the regions, where private players were not actively buying but due to the improvement in the global prices that made the private traders to increase the purchase in last few days that could impact the CCI purchases. And now, Small and cooperative mills have been buying from CCI, but the big mills have not been participating in CCI's tenders as many mills are not willing to pay the price set by CCI (Rs.46,000/candy against Rs.40,000/candy).

The mills are not able to purchase cotton from CCI and the price quoted is very high compared to the present market price around Rs.46000/candy against the market price of Rs.40000/candy. So, The South India Mills' Association (SIMA) has urged the government to sell the cotton at market price on a regular basis to avoid the hike in prices and the spinning mills could procure the cotton at a competitive price. CCI is procuring around 50% of the total arrivals in the market under MSP and has accumulated the stock of around 38 lakh bales in the current season.

The cotton market across India showed mixed trend and the prices rose above MSP in the major markets while the arrivals started declining in northern cotton producing states. The export demand has started increasing since end of Dec'19 as the rupee currency started depreciating and prices in the overseas market has rallied encouraging the importing countries like China, Bangladesh and Vietnam to increase purchases from India and becoming competitive to US and Brazil. While this might put pressure on the global prices which are trading at their peak prices since last 5-6 months.

US expects further decline in production by around 0.61% than the previous estimates of 20.1 US million bales to 20.8 US million bales. Although, the production is still higher than previous year that stood at 18.37 US million bales (2018-19). The exports are also expected to increase to 16.5 US million bales in 2019-20 against 14.76 US million bales in 2018-19. According to the WASDE report, the cotton production in rest of the countries remained same in India (29.5 US million bales), Pakistan (6.2 US million bales) China (27.2 US million bales), and Brazil (12.5 US million bales) from previous month's estimates.

According to the sources, 390 procurement centers are operational out of 426 across India. CCI procured 35.7 lakh bales (30% of total arrivals) as of 8th January'20 but in last year, CCI took only 10 lakh bales from the farmers in 2018-19 season. It is expected that CCI likely to procure around 50-6- lakh bales this year. So far, Out of the 35.7 lakh bales, around 19 lakh bales was procured from Telangana, with Maharashtra (6 lakh), Gujarat (3.5 lakh), Haryana (2.8 lakh), Punjab (2.2 lakh) and Rajasthan (2 lakh) being the other major contributors.

According to the trade sources, all India cotton arrivals stood around 117.62 lakh bales. Out of which, 57.33 lakh bales has been arrived from Maharashtra, MP and Gujarat, followed by 34.47 lakh bales from the southern states including Telangana, AP and Karnataka. The arrivals from North India reported around 25.38 lakh bales from Punjab, Haryana and Rajasthan. Slight decline have been reported from Gujarat and Maharashtra due to untimely rains.

CAI retains the cotton crop estimates at 354 lakh bales from its earlier estimates for 2019-20 season. The CAI has reduced its cotton crop estimate of the Northern Zone (lower Rajasthan) by 2 lakh bales from its previous month's estimate to 61 lakh bales from 63 lakh bales. However, there is an increase of 2 lakh bales in the cotton crop estimate of Maharashtra State compared to the estimate. The total arrivals reached 125.89 lakh bales upto 31st December 2019 and the opening stock estimated by the CAI at 23.50 lakh bales at the beginning of the season.

According to CAI, shipment of imports from 1st October 2019 to 31st December 2019 which have reached Indian Ports are estimated at 6.50 lakh bales while balance 18.50 lakh bales are estimated to arrive Indian Ports till 30th September 2020. While cotton export shipments are estimated around 10 lakh bales from 1st October 2019 to 31st December 2019 and a balance of 32 lakh bales are expected to be shipped during the period from 1st January 2020 to 30th September 2020.

According to the trade sources, the Indian cotton exports for the Nov'19 were reported higher at 3.47 lakh bales against 1.33 lakh bales in the previous month. In Nov'19 also, Bangladesh was the largest importer, importing 2.69 lakh bales with an average FOB of 1.64 \$/Kg lower compared to 1.75 \$/kg previous month followed by Indonesia importing 26,857 bales at 1.48 \$/Kg, China at an average of 1.6\$/kg for 23,583 bales. China also has started importing cotton from India but in small quantities. Vietnam, Turkey and Iran also imported raw cotton from India in November contributing to the Indian exports of around 24,941 bales at an average FOB of 1.55-1.75\$/kg.

As on 2nd Jan'20 according to CCI, the cotton arrivals from all over India stood approximately 116.95 lakh bales this season so far. The arrivals in Gujarat reached around 25.68 lakh bales even after loss caused by the untimely rains in the state. The state is expecting 10% less production from the earlier estimates of 100 lakh bales. The arrivals were delayed in South India, but now Telangana is leading 2nd position with 23.41 lakh bales arrivals with moisture content ranging between 8-12% and CCI is procuring 95% of the cotton. Maharashtra also faced bad weather this year which affected the crop and so far 18.84 lakh bales have been arrived in the state. While the arrivals from North India declined this month after the sowing of wheat crop has started in the previous month (November) in Punjab and Haryana. Rajasthan is seen to have good crop growth that received 13.47 lakh bales this year so far followed by Haryana (12.94 lakh bales) and Punjab (5.07 lakh bales).

Recent untimely rains in the last week of December for around 4 days in Vidarbha region of Maharashtra have affected some of the area under cotton and other crops. During Wed-Thu, Nagpur received 15.9 mm rainfall, 1,349% above normal, according to data from India Meteorological Department. The weather agency has forecast the minimum temperature to fall to 9 degrees Celsius on Saturday. According to the sources, 13,228 ha of area under cotton, 4,084 ha under oranges and sweet lime, 3,030 ha under tur, 740 ha under wheat and 286 ha under vegetables have been damaged.

Weather Forecast for tomorrow:

During the next 24 hours, intense rain/snow may occur in Uttarakhand and Himachal Pradesh. Scattered rain/snow is likely in Jammu-Kashmir and Ladakh. Light to moderate rain and thundershowers with a few heavy spells are likely in West Uttar Pradesh. Scattered light to moderate rain and thundershowers with isolated hailstorm are expected in North Madhya Pradesh.

International Fundamentals:

Cotton futures came back up from midday lows, but still closed down by double digits with October down the most at 28 points, Mar 20 Cotton is at 70.22, down 10 points. The 01/15 Cotlook A index was steady and remained at 80.20. The new AWP for cotton is up 60 points to 61.40 cents/lb, the previous adjustment was a 45 point increase.

The US Export Sales report from USDA showed 232,900 RB of 2019-20 upland cotton sold in the week ending 9th Jan'20 were up by 53% compared to previous week. Increases primarily for Vietnam (71,600 RB), Pakistan (34,800 RB), Turkey (29,500RB), Taiwan (27,500 RB), and Bangladesh (25,000 RB), reductions were from Malaysia (6,200RB), Japan (1,400 RB). For 2020-21, net upland sales of 14,500 RB and were primarily for Honduras (10,100 RB) and Vietnam (4,400 RB).

The Cotton Crop Assessment Committee (CCAC) has estimated the country's cotton output at 9.45 million bales against the production target from the earlier estimate of 12 million bales for the current season. The cotton output in Punjab was expected to hit 6.671 million bales and in Sindh, it was assessed at 2.68 million bales. The crop output in Balochistan was estimated at 0.098 million bales as these areas have faced high temperature in critical stages of development. Also, severe

attack of pink bollworm both in Punjab and Sindh, white fly attack and lower cottonseed prices with rising input costs were the key elements impacting cotton production.

Vietnam imported 104.1 thousand tons of cotton in Nov'19, down 0.2% year on year and 2.9% month on month. In Jan-Nov, 2019, cotton imports totaled 1.351 million tons, down 6% year on year. Based on current growth rate, the imports may total 1.463 million tons in 2019, a fall of 93 thousand tons from 2018. Vietnam imported 104.1kt of cotton in Nov, 2019, down 0.2% year on year and 2.9% month on month. In Jan-Nov, 2019, cotton imports totaled 1.351 million tons, down 6% year on year.

The trade agreement announced Friday leaves hope a meaningful agreement can be signed. The impact on cotton is not yet known. The US presidential comments were that China would be buying 50 billion USD of agriculture products, and they had already started buying, which was a reference to the recent soybean purchases. Regarding cotton, no details are known as to whether cotton is receiving a mention specifically in any agreement. The USDA in its earlier December forecast had estimated slightly lower crop in US 2019-20 cotton production at 20.2 million bales instead of 20.8 million bales as estimated in November.

According to the latest USDA report, Pakistan -800,000 bales to 2.50 million US bales in 2019-20. Several changes in world trade were noted, with imports increased for Pakistan, India, and Turkey, with reductions in China and Vietnam. Imports in Pakistan are estimated to increase to 4.20 million US bales compared to 2.85 million bales in 2018-19. Untimely rains in some parts of country damaged the cotton crop, keeping ginners under pressure owing to huge losses. Total of 7.44 million bales of cotton have been arrived on 1st Dec'19 in 2019-20 season.
