

Domestic Fundamentals:

Market Outlook:

The Rajkot mandi price for variety Shankar 6 stood Rs.39,550/per candy (70.73 cents/lb). Cotton prices across India reported to showed mixed trend across. ICE cotton futures rose more than 1% on Tuesday following the recovery in the stock markets as concerns over major economic impact from China's coronavirus outbreak eased.

News: All India arrivals of cotton stood around 201 lakh bales so far this season till 28th Jan'20 from the starting of the season (1st Oct'20). Maximum arrivals are reported from Gujarat of around 44 lakh bales followed by Maharashtra with around 40 lakh bales, Telangana with 37 lakh bales and Rajasthan with 22 lakh bales till 28th Jan'20. Arrivals so increased by around 32% compared to the previous year arrivals of around 152 lakh bales in the same time last year.

CCI procured around 24% of the total cotton arrived in the market till 28th Jan'20. CCI bought the major quantity of cotton (57% of total procurement) from Telangana about 27 lakh bales out of total procurement of around 48 lakh bales. CCI procured 4.63 lakh bales from north zone (Punjab, Haryana and Rajasthan). CCI in Punjab procured 28% of the total arrived cotton as the central body introduced direct payment method in the state this season and disbursed Rs.430 crore to over 20,000 farmers in six districts of south Malwa belt. Payments were strictly made directly to bank accounts. After Telangana, CCI procured around 8 lakh bales from Maharashtra followed by Gujarat (2.57 lakh bales) till 28th Jan'20.

CCI procured around 44.88 lakh bales so far this season out of 31% total arrivals of cotton in the market. CCI is likely to achieve atleast 80 lakh bales of cotton this season against the target of procuring 100 lakh bales. The CCI has been buying in the regions, where private players were not actively buying. CCI procured the major supply from Telangana purchasing around 25 lakh bales followed by Maharashtra (7.73 lakh bales), Punjab, Haryana and Punjab (4.57 lakh bales), Gujarat (2.43 lakh bales) & Karnataka (1.34 lakh bales). While, the procurement in Andhra Pradesh has been lower around 1.25 lakh bales only due to which the prices in the local market has not still touched the MSP.

According to the trade sources, the Indian cotton exports for the Dec'19 were reported higher at 5.36 lakh bales against 3.47 lakh bales in the previous month. In Dec'19 also, Bangladesh was the largest importer, importing 3.82 lakh bales with an average FOB of 1.64 \$/Kg steady compared to previous month followed by China at an average FOB \$1.6/kg for 54,850 bales, Indonesia importing 42,672 bales at 1.51 \$/Kg and Vietnam (32,690 bales at an average FOB \$1.57/kg).

China has started importing cotton from India and the quantity of purchasing is increasing gradually. Mauritius, Iran, Turkey, Philippines & Thailand also imported raw cotton from India in December contributing to the Indian exports of around 21,854 bales at an average FOB of 1.40-1.63\$/kg.

The cotton season in Maharashtra is coming to an end in rainfed areas. About 44 lakh hectares of land was the planted area and about four lakh hectares is yet to be harvested. The harvesting is hampered due to the lower availability of labour to pick cotton from the fields. This year, the rainfed areas received good amount of rainfall that encouraged the farmers to grow more cotton. But at present, the farmers have left their fields due to the labour shortage.

CCI procured around 40 lakh bales so far this season out of 40% total arrivals of cotton in the market. CCI is likely to achieve atleast 70 lakh bales of cotton this season against the target of procuring 100 lakh bales. The CCI has been buying in the regions, where private players were not actively buying but due to the improvement in the global prices that made

the private traders to increase the purchase in last few days that could impact the CCI purchases. And now, Small and cooperative mills have been buying from CCI, but the big mills have not been participating in CCI's tenders as many mills are not willing to pay the price set by CCI (Rs.46,000/candy against Rs.40,000/candy).

The mills are not able to purchase cotton from CCI and the price quoted is very high compared to the present market price around Rs.46000/candy against the market price of Rs.40000/candy. So, The South India Mills' Association (SIMA) has urged the government to sell the cotton at market price on a regular basis to avoid the hike in prices and the spinning mills could procure the cotton at a competitive price. CCI is procuring around 50% of the total arrivals in the market under MSP and has accumulated the stock of around 38 lakh bales in the current season.

The cotton market across India showed mixed trend and the prices rose above MSP in the major markets while the arrivals started declining in northern cotton producing states. The export demand has started increasing since end of Dec'19 as the rupee currency started depreciating and prices in the overseas market has rallied encouraging the importing countries like China, Bangladesh and Vietnam to increase purchases from India and becoming competitive to US and Brazil. While this might put pressure on the global prices which are trading at their peak prices since last 5-6 months.

US expects further decline in production by around 0.61% than the previous estimates of 20.1 US million bales to 20.8 US million bales. Although, the production is still higher than previous year that stood at 18.37 US million bales (2018-19). The exports are also expected to increase to 16.5 US million bales in 2019-20 against 14.76 US million bales in 2018-19. According to the WASDE report, the cotton production in rest of the countries remained same in India (29.5 US million bales), Pakistan (6.2 US million bales) China (27.2 US million bales), and Brazil (12.5 US million bales) from previous month's estimates.

According to the sources, 390 procurement centers are operational out of 426 across India. CCI procured 35.7 lakh bales (30% of total arrivals) as of 8th January'20 but in last year, CCI took only 10 lakh bales from the farmers in 2018-19 season. It is expected that CCI likely to procure around 50-6- lakh bales this year. So far, Out of the 35.7 lakh bales, around 19 lakh bales was procured from Telangana, with Maharashtra (6 lakh), Gujarat (3.5 lakh), Haryana (2.8 lakh), Punjab (2.2 lakh) and Rajasthan (2 lakh) being the other major contributors.

According to the trade sources, all India cotton arrivals stood around 117.62 lakh bales. Out of which, 57.33 lakh bales has been arrived from Maharashtra, MP and Gujarat, followed by 34.47 lakh bales from the southern states including Telangana, AP and Karnataka. The arrivals from North India reported around 25.38 lakh bales from Punjab, Haryana and Rajasthan. Slight decline have been reported from Gujarat and Maharashtra due to untimely rains.

Weather Forecast for tomorrow:

The intensity of rain and snow will increase in the Western Himalayas. A few heavy spells are also likely. Light to moderate rain with one or two heavy spells may occur in Punjab, Haryana, West Uttar Pradesh. Hailstorm is also likely in a few parts. Scattered rain is likely in North Rajasthan, parts of Delhi and NCR, East and Central Uttar Pradesh, Odisha Chattisgarh, parts of Vidarbha as well as in a few parts of Bihar, Gangetic West Bengal and in one or two pockets of North Telangana and Coastal Maharashtra.

International Fundamentals:

Cotton futures rallied back to erase Monday losses as the Tuesday session ended with gains of 85 to 96 points, Mar 20 Cotton closed at 70.36, up 85 points. The Cotlook A index was another 50 points lower on 01/27, to 78.55 cents/lb for 01/24. The AWP for cotton is 61.29 cents/lb, good through Thursday.

According to the data released by Pakistan Cotton Ginner's Association (PCGA), total of 8.33 million bales of cotton have been arrived on 15th Jan'20 in 2019-20 season. The arrivals were down by 20.26 per cent which were over 10.45 million bales during the corresponding period of last season. Total cotton arrivals decreased by 22.99 per cent year-on-year to 4.87 million bales in the major state Punjab. While in Sindh province, cotton arrivals decreased 16.09 per cent to 3.46 million bales as on 15th Jan'20 during the ongoing cotton season 2019-20. The textile mills in Pakistan consumed 7.34 million bales, while another 55,984 bales of cotton were sold to exporters.

The US Export Sales report from USDA showed 307,800 RB of 2019-20 upland cotton sold in the week ending 16th Jan'20 were up by 32% compared to previous week. Increases primarily for Turkey (82,700 RB), Pakistan (72,200 RB), Vietnam (70,800 RB), Indonesia (33,600 RB, including 800 RB switched from Japan and decreases of 200 RB), and Egypt (17,600 RB), were offset by reductions for India (25,000 RB). For 2020-21, total net sales of 13,200 RB were for Vietnam. Exports of 282,600 RB were down 6 percent from the previous week, but up 20 percent from the prior 4-week average. Exports were primarily to Vietnam (80,500 RB), Pakistan (44,700 RB), China (41,400 RB), Turkey (29,000 RB), and Mexico (20,600 RB).

The Cotton Crop Assessment Committee (CCAC) has estimated the country's cotton output at 9.45 million bales against the production target from the earlier estimate of 12 million bales for the current season. The cotton output in Punjab was expected to hit 6.671 million bales and in Sindh, it was assessed at 2.68 million bales. The crop output in Balochistan was estimated at 0.098 million bales as these areas have faced high temperature in critical stages of development. Also, severe attack of pink bollworm both in Punjab and Sindh, white fly attack and lower cottonseed prices with rising input costs were the key elements impacting cotton production.

Vietnam imported 104.1 thousand tons of cotton in Nov'19, down 0.2% year on year and 2.9% month on month. In Jan-Nov, 2019, cotton imports totaled 1.351 million tons, down 6% year on year. Based on current growth rate, the imports may total 1.463 million tons in 2019, a fall of 93 thousand tons from 2018. Vietnam imported 104.1kt of cotton in Nov, 2019, down 0.2% year on year and 2.9% month on month. In Jan-Nov, 2019, cotton imports totaled 1.351 million tons, down 6% year on year.

The trade agreement announced Friday leaves hope a meaningful agreement can be signed. The impact on cotton is not yet known. The US presidential comments were that China would be buying 50 billion USD of agriculture products, and they had already started buying, which was a reference to the recent soybean purchases. Regarding cotton, no details are known as to whether cotton is receiving a mention specifically in any agreement. The USDA in its earlier December forecast had estimated slightly lower crop in US 2019-20 cotton production at 20.2 million bales instead of 20.8 million bales as estimated in November.
