

Domestic Fundamentals:**Market Outlook:**

The Rajkot mandi price for variety Shankar 6 stood Rs.38,400/per candy (67.86 cents/lb). The Indian domestic cotton market has been trending weaker on the wake of disturbance causing to outbreak of coronavirus. Cotton futures slumped more than 4 percent on Thursday to their lowest level in over four months as fears about the economic impact of the spreading coronavirus dented risk sentiment among investors. Cotton contracts for May settled down 2.97 cent, or 4.5%, at 62.5 cents per lb. It traded within a range of 62.47 and 65.47 cents a lb.

News: CCI purchased around 70 lakh bales this year till last week of Feb'20 along with CCI purchased 10,000 bales of cotton under commercial operations due to lower market prices. Last year, CCI purchased cotton under commercial operations in the March end. The agency has floated a tender to purchase cotton at Rs. 39,400-39,500 per candy from the open market through an electronic auction. Nearly 65% of the cotton arrivals have come into the market. P. Alli rani said CCI could even buy up to 96 lakh bales subject to market conditions under MSP. CCI is having 9 lakh bales of stock of previous year and 70 lakh bales of cotton procured this season so far. Nearly 53% of cotton procured so far this season is from Telangana.

CCI launched its own new cotton brand 'Hira' in Mumbai. The launch of this new premium quality of cotton aims to provide a good and reliable quality input for spinning and further value addition. CCI-Hira has the benefits of minimal trash (below 1.7 %), low moisture (below 8%), best grade (Rd 78 plus), optimal micronaire value (3.8-4.2) and strength (29 g/tex plus) which would result in good realization. CCI is maintaining the high quality standards so far this season. CCI likely to procure the target of 100 lakh bales this season till October 2020. The procurement is likely to stretch till March end to mid-April across India. And the trade and textile industry is waiting for a reasonable rate of CCI's sale which is yet to be started.

The yield in Andhra Pradesh is likely to have affected due to the severe infestation caused by Pink bollworm attack in many districts. Major area is affected in Guntur district, one of the main cotton belts in AP followed by some areas in West Godavari and Nellore district. Last year, the cotton was affected with pest in the 4th picking of the crop but this year the crop has been infested with pink bollworm from the 3rd picking onwards. Due to which the yield has been declined from 4-6 quintals/ha in the 1st and 2nd picking where as it reduced to 2-3 quintals only from 3rd picking onwards. Also the quality has been deteriorated that dipped the prices to around Rs.4000-4600/q purchased by the private traders only. CCI is rejecting the cotton that are not up to the standards required by CCI. Therefore, the farmers are selling their produce to private traders instead of CCI.

Due to heavy moisture and sluggish demand of cotton cake, nearly 60% cotton seed crushing units are closed since November last week in Gujarat. Of 1,000 cotton seed crushing units, nearly 400 mills are currently functional in the state as it is unviable to crush cotton seed in absence of cotton cake demand. 'In case of cotton seed crushing, millers get maximum 11% of oil, 80-85% cake and nearly 5-7% waste. Generally, cotton cake is purchased for cattle feed. As large quantity of groundnut cake is available this year, following bumper groundnut crop in the state, those who are in animal husbandry are preferring groundnut cake over cotton cake.

According to the 2nd advance estimate released by the government recently, the total cotton production in India might reach upto 348.91 lakh bales against the target of 357.5 lakh bales. The 2nd advance estimate is higher by around 8% compared to the first advance estimate due to the higher arrivals this year. The total cotton arrivals stood around 210 lakh bales till Feb 2nd week according to the trade sources. Another 140 lakh bales are expected to arrive in the coming months.

Cotton imports in India have come to a standstill as weak domestic prices have made overseas purchases economically unviable. Since start of the season on Oct 1, traders have contracted 0.9-1.0 mln bales of cotton imports. Of the total contracts signed, 600,000-700,000 bales of extra-long staple cotton have reached the Indian ports so far. Mills in north India have contracted another 150,000 bales of Egyptian cotton, the consignments would arrive in Jun-Aug. India usually takes the shipments from US, West Africa and Australia especially for extra-long staple length cotton as India does not

produces locally. Imports are currently muted as there is sufficient supply in the market due to bigger crop this year. In the domestic market, cotton is currently being sold in the range of 38,500-40,000 rupees per candy. And CCI is offering cotton at 46,500-46,900 rupees per candy procured in the current season. Due to which the spinners are willing to import cotton.

CCI has released a tender to buy cotton bales from ginners across India (AP, Telangana, Karnataka, MP, Gujarat, Maharashtra, Orissa, West Bengal, Haryana, Punjab, Rajasthan) under reverse e- auction high grade ready cotton bales under commercial operations. The ginners who are interested to participate in the e-tender for purchase of ready bales by CCI, has to register itself with the Corporation. Total 10 Samples will be drawn randomly from each lot of 100 bales by Authorized representatives of the Corporation at the factory. The moisture content should not exceed 8% or the lot will be rejected.

Cotton seed oil cake price remained steady to firm compared to the last week amid a rising demand from cattle feed makers mainly influenced cottonseed oil cake prices. With growing animal feed prices in the country, animal feed manufacturers have called CCI to release cotton seed stock in the market. The releasing of cotton seed stock can ease the cotton oil prices as well as animal feed prices in the country, as animal feed manufacturers will get additional raw material for producing animal feed. As CCI has so far extracted over 200,000 tons of cottonseed, which has not been released on the market. Due to this aggressive behaviour of CCI, the market has been distorted. With a lower production, firm oil prices and high demand.

Cotton output to rise in Telangana in 2019-20 due to favourable weather conditions that led to higher acreage and yields. The cotton yield is likely to increase by 7-9% this year leading to the total rise in cotton production to around 40-43 lakh bales this year. Whereas the state has released its 2nd advance estimate recently this week projecting to increase in production around 48 lakh bales up by 13 lakh bales compared to the previous year's production.

Weather Forecast for tomorrow:

During the next 24 hours, we expect fairly widespread rain and snow in the hills of Jammu and Kashmir, Ladakh, Himachal Pradesh, and Uttarakhand. Scattered light to moderate rain is also expected in Punjab, Haryana, West Uttar Pradesh, Delhi and NCR, and at a few places in North Rajasthan. Coastal Karnataka and Kerala may also observe scattered light to moderate rains. While isolated rain is likely in Coastal Andhra Pradesh. North Madhya Pradesh may also observe isolated light rainfall activities.

International Fundamentals:

Cotton futures were 81 to 101 points lower on Friday, with March futures 7.15 cents/lb (10.37%) lower than last Friday's close, Mar 20 Cotton closed at 61.59, down 101 points. The Cotlook A index was down 75 points on 02/27, to 74.30 c/lb. The updated AWP for cotton is 57.93 c/lb.

The US Export Sales report from USDA showed 214,600 RB of 2019-20 upland cotton sold in the week ending 20th Feb'20 were down by 9% compared to previous week. Increases primarily for Vietnam (70,200), China (39,600 RB), Pakistan (35,800 RB), Turkey (26,900 RB), and Indonesia (19,200 RB) were offset by reductions primarily for Japan (4,600 RB). For 2020/2021, net sales of 198,900 RB were for Vietnam (176,000 RB), Indonesia (9,700 RB), El Salvador (4,900 RB), Mexico (3,400 RB), China (2,200 RB). Net Upland Shipment for exports of 324,100 RB were down 14 percent from the previous week, Exports were primarily to Vietnam (88,100 RB), Pakistan (83,800 RB), China (32,900 RB), Turkey (25,400 RB), Indonesia (14,700 RB).

Cotton futures slumped more than 4 percent on Thursday to their lowest level in over four months as fears about the economic impact of the spreading coronavirus dented risk sentiment among investors. Cotton contracts for May settled down 2.97 cent, or 4.5%, at 62.5 cents per lb. It traded within a range of 62.47 and 65.47 cents a lb. Investors are ignoring the good fundamentals for cotton and are trading on the panic of the coronavirus. The export sales were positive, especially with China being one of the major buyers this time.

USDA's early projection for 2020 U.S. cotton planted acreage is 12.5 million acres, 9% below 2019 and the smallest area since 2016. The decline is due to the effects of the Phase One trade agreement with China and the impact of the coronavirus on cotton demand. Based on regional average yields, USDA is forecasting a national average yield of 855 pounds per harvested acre up from 817 pounds in 2019 resulting in a projected crop of 19.5 million bales (3% below 2019 production).

Coronavirus outbreak in China is leading many countries to import sugar from other countries other than China. Several factories have been shut due to the outbreak of coronavirus. Many global buyers are finding new markets especially in sectors such as textile, garments and steel. Several buyers, especially in the textile sector, are expected to start purchasing products in Turkey after the coronavirus outbreak drove them away from China. Turkey is likely to bag the opportunity with increase in demand from textile industries. The cotton cultivation areas in Turkey increased 12% in 2019, reaching 4.8 million decares. The total production also increased by 5% in 2019, reaching up to 2.2 million tons. The Turkish cotton prices also expected to increase along with an increase in the global cotton prices.

According to the National Cotton Council (NCC), US cotton producers are going to plant 13 million acres down by 5.5% from 2019. Upland cotton are estimated around 12.8 million acres, down 5.6% from 2019, while extra-long staple on 224,000 acres represent a 2.7% decline. According to the survey conducted by NCC, Southeast respondents indicate a 9.3 per cent decrease in the region's upland area to 2.7 million acres. All states in the Southeast show a decline in acreage. Mid-South growers intend to plant 2.2 million acres, a decline of 6.5 per cent from the previous year. Southwest growers intend to plant 7.6 million cotton acres, a 3.4 per cent decline.

The US Export Sales report from USDA showed 350,900 RB of 2019-20 upland cotton sold in the week ending 6th Feb'20 were up by 6% compared to previous week. Increases primarily for Vietnam (152,000 MT, including 2,600 RB switched from South Korea), Turkey (74,000 RB), Pakistan (49,300 RB), Bangladesh (44,200 RB), and Indonesia (20,500 RB, including 1,200 RB switched from Japan), were offset by reductions primarily for China (48,400 RB). For 2020/2021, net sales of 57,300 RB were for Bangladesh (26,200 RB), Pakistan (18,500 RB), Malaysia (6,600 RB), Indonesia (5,300 RB), and Ecuador (700 RB). Exports of 400,500 RB were down 4 percent from the previous week, but up 20 percent from the prior 4-week average.
